Continued inside.

The high cost of catheter-related infections is enough to make you turn blue.

Catheter-related bloodstream infections can cost a hospital as much as \$40,000.¹ And the ultimate price is even higher: up to 12% of all central lines become infected, with an associated mortality rate of 20%.²

To reduce the incidence of these costly infections, turn to ARROWgard Blue®.

Central venous catheters with the built-in protection of ARROWgard Blue® are up to 80% less likely to develop bacteremia than unprotected catheters.³

Our patented colonization-resistant surface treatment molecularly bonds two antiseptic agents, chlorhexidine and silver sulfadiazine, into the polyurethane material along the entire

ARROWgard Blue® is active against major nosocomial pathogens.

indwelling length of the catheter. And the ARROWgard Blue® surface maintains its protective barrier.

Safeguard your patients against catheter-related infections while protecting your hospital against added costs. Choose the true blue

inhibiting power of ARROWgard Blue®.

To learn more, contact your Arrow representative or call 1 800 523-8446 or 610 378-0131.

ARROWgard Blue®
