

FORTHCOMING PAPERS

It is hoped to publish the following papers in the next issue of the *British Journal of Nutrition*:

The metabolic effects of 4-aminopteroylglutamic acid in the guinea-pig. By R. H. GIRDWOOD.

The nutrition of the young Ayrshire calf. 1. The endogenous nitrogen and basal energy metabolism of the calf. By K. L. BLAXTER and W. A. WOOD.

The nutrition of the young Ayrshire calf. 2. A spirometer for the determination of the respiratory exchange of the calf. By K. L. BLAXTER and A. HOWELLS.

The nutrition of the young Ayrshire calf. 3. The metabolism of the calf during starvation and subsequent realimentation. By K. L. BLAXTER and W. A. WOOD.

The nutrition of the young Ayrshire calf. 4. Some factors affecting the biological value of protein determined by nitrogen-balance methods. By K. L. BLAXTER and W. A. WOOD.

The growth response of rats to purified diets. By ALICE M. COPPING, PATRICIA J. CROWE and VANDA R. G. POND.

The estimation of glucose-containing substances in micro-organisms from the rumen of the sheep. By P. J. HEALD.

The assessment of glucose-containing substances in rumen micro-organisms during a digestion cycle in sheep. By P. J. HEALD.

Conference Proceedings:

Sixty-second Scientific Meeting, 23 September 1950. Vitamin A.

Sixty-third Scientific Meeting, 14 October 1950. Growth.

CONTENTS OF VOLUME 4, No. 4, 1950

(All rights reserved)

	PAGE
Changes occurring in the proteins as a result of processing groundnuts under selected industrial conditions. 2. Nutritional changes. By H. R. CAMA and R. A. MORTON	297
The energy metabolism of man during overfeeding. By H. N. MUNRO	316
Variations in the pigment and vitamin A contents of egg yolk. By F. H. GRIMBLEBY and D. J. G. BLACK	323
The effect of growth and development on the composition of mammals. By CHRISTINE M. SPRAY and ELSIE M. WIDDOWSON	332
A study of some aspects of reproduction by means of chemical analysis. By CHRISTINE M. SPRAY	354
Factors affecting the utilization of food by dairy cows. 1. The rate of passage of food through the digestive tract. By C. C. BALCH	361
Factors affecting the utilization of food by dairy cows. 2. Factors influencing the rate of breakdown of cellulose (cotton thread) in the rumen of the cow. By C. C. BALCH and V. W. JOHNSON	389
Factors affecting the utilization of food by dairy cows. 3. The specific gravity of digesta from the reticulo-rumen of cows. By C. C. BALCH and A. KELLY	395
Further studies of the conversion of β -carotene to vitamin A in the intestine. By S. Y. THOMPSON, R. BRAUDE, M. E. COATES, A. T. COWIE, J. GANGULY and S. K. KON	398
A demonstration of the conversion of carotene into vitamin A in conscious rats. By JUNE ALEXANDER and T. W. GOODWIN	421
