Nearly Ready, Two Vols. 8vo, 42s.

A DICTIONARY
OF
PSYCHOLOGICAL MEDICINE

GIVING THE DEFINITION, ETYMOLOGY AND SYNONYMS OF THE
TERMS USED IN MEDICAL PSYCHOLOGY

WITH THE

*SYMPTOMS, PATHOLOGY, AND TREATMENT OF THE
RECOGNIZED FORMS OF MENTAL DISORDER*

TOGETHER WITH

The Law of Lunacy in Great Britain and Ireland.

EDITED BY

D. HACK TUKE, M.D., LL.D.,

Examiner in Mental Physiology in the University of London; co-Editor of "The Journal of
Mental Science."

ASSISTED BY ONE HUNDRED AND TWENTY-SIX CONTRIBUTORS.

This Work, the first of the kind which has been attempted, aims at providing information, more or less systematic, in regard to the Definition, Etymology and Synonyms of the Terms used in Medical Psychology, with the Symptoms, Pathology and Treatment of the recognized Forms of Mental Disorder, together with an abstract of the Law of Lunacy in Great Britain and Ireland.

A large number of short Definitions of words have been introduced.

Articles of greater length treat of the most important subjects which fall under the head of Psychological Medicine.

The Philosophy of Mind is expounded in a separate Introductory Article, and is not lost sight of in the Shorter Definitions and other Articles; but it is to be borne in mind that the fundamental aim of the Dictionary is directed to Morbid Psychology, and not to Mental Science in its ordinary restricted sense.

An account is given of the methods of Psycho-Physical Research which have been introduced in recent times into Psychological Laboratories established in various Universities in Europe and in the United States; also of the results which have been reached in regard to the Reaction-time of Mental Phenomena.

The History of the Insane, and the reforms undertaken to ameliorate their condition in various countries of the world, have been fully given.

An important feature of the Dictionary is the introduction of Bibliographical References in connection with the most important subjects treated of in the Articles; and, in addition to these, a copious Bibliography of English works bearing upon Psychological Medicine will be found at the close of the Work.

Illustrations of the various types of Insanity are given, and in addition, Engravings intended to facilitate the understanding of other subjects described in the Dictionary.

THE NEUROSES OF DEVELOPMENT: being THE MORISON LECTURES FOR 1890.

By T. S. CLOUSTON, M.D., F.R.C.P.E.,

Physician-Superintendent, Royal Edinburgh Asylum for the Insane; Lecturer on
Mental Diseases, Edinburgh University.

"These lectures may be said to break new ground in a direction which is full of suggestiveness and interest. . . . It is a work which is full of interest, and is likely to have a very wide sphere of influence, and we are sure that no one can look into it without having suggested to him some fresh point from which to regard many of the commonest nervous disorders."—*Lancet*.

"This is a work of much originality. Conceived and carried through in a scientific spirit, and one which is bound to make its mark. It is well and vigorously written, and the illustrations, as far as they go, are good. . . . We must content ourselves with recommending it to the attention of our readers, satisfied that he who studies it carefully will enlarge his views of disease, and also that he will rise from the perusal of it with the feeling that he has been in contact with a powerful and original mind."—*The Practitioner*.

EDINBURGH: Oliver and Boyd.

LONDON: Simpkin, Marshall, Hamilton, Kent, & Co., Limited.

Second Edition, Enlarged and Rewritten, 8vo, 466 pp., 14s.

GENERAL PARALYSIS OF THE INSANE.

By WILLIAM JULIUS MICKLE, M.D., F.R.C.P.Lond.

"The second edition of this exhaustive monograph is to a large extent a new book, contains nearly double the amount of matter presented in the first edition, introduces many new points, and also treats old subjects on entirely new lines."—*Lancet*.

"The only book in the English language which is at all up to our present knowledge of general paralysis."—*British Medical Journal*.

"We have rarely welcomed a book more heartily than we have this by Dr. Mickle. . . . We recommend all our readers to get this book—a text-book for workers, and a repository of knowledge for all who seek it."—*Journal of Mental Science*.

London: H. K. LEWIS, 136, Gower Street, W.C.

Third Thousand, price 2s., Demy 8vo, cloth.

HANDBOOK

FOR THE

Instruction of Attendants on the Insane.

PREPARED

With an Appendix containing lists of Asylums and Licensed Houses throughout
the United Kingdom.

SPECIAL NOTICE TO SUPERINTENDENTS OF ASYLUMS.

The Publishers are prepared to supply copies of this book by the dozen at 1s. 6d.
each.—Address, Messrs. BAILLIÈRE, TINDALL & Co., 20 and 21, King William
Street, Strand, London.

Fourth Edition, 12 Plates (4 being Coloured), 8vo, 25s.

MANUAL OF PSYCHOLOGICAL MEDICINE.

BY

J. C. BUCKNILL, M.D., F.R.S., and D. HACK TUKE, M.D., F.R.C.P.

"It is not too much to say that it is the best and most favourably known to the medical and legal professions, by both of whom it is quoted as the highest authority. It has acquired this enviable standing from the high reputation of its authors, from the correctness of the views and opinions expressed, and from its fulness. More than any work by English authors it deals with the subject of insanity in all its relations."—*Amer. Journ. of Insanity*.

London: J. & A. CHURCHILL, 11, New Burlington Street.

Now ready, price 6d., demy 8vo.
