

Erratum

New Phytologist **140** (1998), 709–714

In the December 1998 issue of *New Phytologist*, we published the research paper entitled ‘Natural occurrence of *Ampelomyces* intracellular mycoparasites in mycelia of powdery mildew fungi’ by Levente Kiss (*New Phytol.* (1998) **140**, 709–714). Since its publication, an error in the published title has been brought to our attention: this refers to the *ampelomyces*, but the name should be *Ampelomyces*, meaning the genus.

We apologise to the author and to our readers for this mistake.
