

New and Exciting Titles!

**Ecology of Industrial Pollution**

*Edited by*  
**LESLEY C. BATTY**  
**KEVIN B. HALLBERG**

*Ecological Reviews*  
\$130.00: Hb: 978-0-521-51446-0: 362 pp.  
\$59.00: Pb: 978-0-521-73038-9

**Silent Summer**  
The State of Wildlife in Britain and Ireland

*Edited by*  
**NORMAN MACLEAN**

\$49.00: Hb: 978-0-521-51966-3: 768 pp.

**Ecological Restoration**  
A Global Challenge

*Edited by*  
**FRANCISCO A. COMIN**

\$78.00: Hb: 978-0-521-87711-4: 318 pp.

**Fern Ecology**

*Edited by*  
**KLAUS MEHLTRETER**  
**LAWRENCE R. WALKER**  
**JOANNE M. SHARPE**

\$125.00: Hb: 978-0-521-89940-6: 460 pp.  
\$59.00: Pb: 978-0-521-72820-1

**Second Edition**  
**Introduction to Conservation Genetics**

**RICHARD FRANKHAM**  
**JONATHAN D. BALLOU**  
**DAVID A. BRISCOE**

\$75.00: Pb: 978-0-521-70271-3: 642 pp.

**Globalisation and Agricultural Landscapes**  
Change Patterns and Policy trends in Developed Countries

*Edited by*  
**JØRGEN PRIMDAHL**  
**SIMON SWAFFIELD**

*Cambridge Studies in Landscape Ecology*  
\$130.00: Hb: 978-0-521-51789-8: 292 pp.  
\$59.00: Pb: 978-0-521-73666-4

**Mapping Species Distributions**  
Spatial Inference and Prediction

**JANET FRANKLIN**  
*Ecology, Biodiversity and Conservation*

\$125.00: Hb: 978-0-521-87635-3: 338 pp.  
\$60.00: Pb: 978-0-521-70002-3

**Ecosystem Ecology**  
A New Synthesis

*Edited by*  
**DAVID G. RAFFAELLI**  
**CHRISTOPHER L. J. FRID**

*Ecological Reviews*  
\$130.00: Hb: 978-0-521-51349-4: 172 pp.  
\$55.00: Pb: 978-0-521-73503-2

**Taking Stock of Nature**  
Participatory Biodiversity Assessment for Policy, Planning and Practice

*Edited by*  
**ANNA LAWRENCE**

\$105.00: Hb: 978-0-521-87681-0: 302 pp.

Prices subject to change.

# Become a Life Member of FFI today...

You may already be a member of FFI and we thank you for your support. Have you thought about upgrading your membership to make a lifetime's commitment to us?

Life Membership ensures you will continue to receive FFI's publications, including *Oryx*, for the rest of your life without having to worry about renewing every year. By sending us a one-off payment of £1,500 you will save money in the long run while allowing us to act now to protect the most threatened wildlife and wild places.

## A lifetime dedicated to conservation...

'I have been a member of FFI since the 1950s....investment in the work of Fauna & Flora International is truly an investment in the future of our planet' *Sir David Attenborough*

**Please invest in our planet's future by becoming a life member of FFI.**

For more information on how to become an FFI Life Member please contact Ken Richard.

+ 44 (0)1223 579472  
[ken.richard@fauna-flora.org](mailto:ken.richard@fauna-flora.org)  
[www.fauna-flora.org](http://www.fauna-flora.org)

## Upgrade your membership now

- I would like to become a Life Member of FFI (single payment of £1,500)

## Join FFI now

I would like to become a...

- Concessionary Member (£40 per year)**  
(reduced membership rate for students/senior citizens/unwaged)
- Member (£75 per year)**  
(receives *Oryx*, *Fauna & Flora* magazine and *FFI Update*)
- Sponsor Member (£120 per year)**  
(receives *Oryx*, *Fauna & Flora* magazine and *FFI Update*, and supports a conservationist in a developing country to receive the same)

Join or upgrade online at  
[www.fauna-flora.org/membership.php](http://www.fauna-flora.org/membership.php)

If posting this form please enclose payment and your contact details and send to FFI at the address below.

## I should be able to take care of myself...

... but, sadly, persecution, and poaching for my fur and body parts, have reduced wild snow leopard numbers to fewer than 2,500 adults.

A gift in your will helps **Fauna & Flora International** (FFI) to conserve snow leopards and other threatened species around the world, now and for years to come.

If everyone who supported FFI took the additional step of including a gift to FFI in their will, we would have the security and flexibility to save many more endangered species and habitats for future generations.

### There can be no more positive act than doing your part to conserve the planet.

For more information on how to leave a legacy to FFI, please contact Catherine Biggs.

## Instructions for Contributors

*Oryx*—*The International Journal of Conservation*, published quarterly on behalf of Fauna & Flora International, is a journal of biodiversity conservation, conservation policy and sustainable use, and the interactions of these with social, economic and political issues. The journal has a particular interest in material with the potential to improve conservation management and practice. *Oryx* also supports the publishing and communication aspirations of conservation practitioners and researchers worldwide, and helps build capacity for conservation.

*Articles* (2,000–7,000 words), *Reviews* (<7,000 words), *Forum* papers (<4,000 words) and *Short Communications* (<2,000 words) are invited on topics relevant to the journal's focus, including:

- The nature and results of conservation initiatives, including case studies
- Research on the sustainable use of wild species
- Research on the status of threatened species, taxonomic groups or habitats
- Reviews of conservation policy, strategy and legislation in practice
- Planning for species and biodiversity conservation
- The working of international conservation conventions
- The history of conservation, including the role of key people, organizations and initiatives
- The causes and consequences of biodiversity loss
- Case studies of conservation projects and programmes
- The social, economic and political dimensions of conservation

*Reviews* provide comprehensive overviews of a particular conservation topic. *Forum* papers promote debate about current and controversial issues, with critical responses commissioned from one or more authors. *Articles* on the status of threatened species, taxonomic groups or habitats should generally be <4,500 words and have, where relevant, a context beyond that of the subject studied.

*Submission* Online at <http://mc.manuscriptcentral.com/oryx> (see <http://www.oryxthejournal.org> for further advice). **Upon submission the Corresponding Author must confirm that: (1) the submitted manuscript has not been published or submitted for publication elsewhere, (2) all authors have read the submitted manuscript and agreed to its submission, and (3) all authors have abided by the Code of Conduct for authors contributing articles (see *Oryx*, 35, 99–100 or <http://www.oryxthejournal.org>).** If there is overlap with other articles, including any in press or in preparation, this should be stated and the articles in question sent to the Editor. Both quantitative and qualitative methodology used in the reported work should be appropriate to the research question and must be clearly described. Management recommendations should be made where appropriate, and details of any implementation provided. Dates of any fieldwork must be provided and, other than long-term studies, submissions with data >4 years old will not normally be considered.

*Preparation of manuscripts* Consult a recent issue of *Oryx* for general style. Contributions should be in English, with British English spelling and terminology, double-spaced, without footnotes, and with line numbers. Submissions, which can be a single file with all Tables, Figures, Plates and Appendices at the end or with text and other elements in separate files, must be in DOC format (not PDF). For submission, graphics can be in low to medium resolution as long as they are legible, with publication-quality graphics to be provided upon any final acceptance. Cover page should contain title, word count (all inclusive except for Tables and Figure and Plate legends), and full mailing address, e-mail, and address at the time the research was carried out, if different, of the corresponding author and all additional authors. Pages to be numbered, and order of sections to be: cover page, main text, biographical sketches, Tables, Figure and Plate legends, Figures, Plates. Short Communications must not have any subheadings.

*Title* A succinct description of the work (≤20 words) preferably embodying either the aim or the overall conclusion.

*Abstract* In <250 words, the aims, methods, major findings and conclusions; should be informative without reference to the text and should not contain any references or undefined abbreviations.

*Keywords* Up to eight pertinent words or phrases, in alphabetical order.

*Structure* Articles should generally follow the Introduction, Study Area (where appropriate), Methods, Results and Discussion format. Minimize use of other subheadings.

*References* Cited in the text as, for example, Hardcastle & Wilson (1996) or (Leadbeater, 1996). For three or more authors use the first author's surname followed by et al. Multiple references to be in chronological order. Reference list should be in alphabetical order, and article titles and the titles of serial publications to be given in full. If citations and bibliography are prepared using a bibliography manager any field codes, tags or similar must be removed. The following are examples of *Oryx* style:

Beck, B.B., Rapaport, L.G. & Stanley Price, M.R. (1994) Reintroduction of captive-born animals. In *Creative Conservation: Interactive Management of Wild and Captive Animals* (eds P.J.S. Olney, G.M. Mace & A.T.C. Feistner), pp. 265–286. Chapman & Hall, London, UK.

Bowler, M. (1991) *Implications of large predator management on commercial ranchland in Zimbabwe*. MSc thesis, University of Zimbabwe, Harare, Zimbabwe.

Brady, L.D., Huston, K., Jenkins, R.K.B., Kauffmann, J.L.D., Rabearivony, J., Raveloson, G. & Rowcliffe, M. (1996) *UEA Madagascar Expedition '93*. Unpublished Report. University of East Anglia, Norwich, UK.

IUCN (2008) *2008 IUCN Red List of Threatened Species*. IUCN, Gland, Switzerland. <http://www.iucnredlist.org> [accessed 24 July 2008].

LeBoeuf, B.J., Kenyon, K.W. & Villa-Ramirez, B. (1986) The Caribbean monk seal is extinct. *Marine Mammal Science*, 2, 70–72.

MacArthur, R.H. & Wilson, E.O. (1967) *The Theory of Island Biogeography*. Princeton University Press, Princeton, USA.

Sutherland, W.J. (ed.) (1998) *Conservation Science and Action*. Blackwell Science, Oxford, UK.

*Biographical sketches* The research interests of all authors (<150 words total), over and above what is obvious from the subject of the manuscript and the authors' affiliations.

*Tables* Each on a separate page, with captions that are comprehensible without reference to the text.

*Figures & Plates Guidelines for the preparation of Figures and Plates* are at <http://www.oryxthejournal.org>

*Appendices* For mathematical or statistical models, lengthy tables, and questionnaires. May be published online-only, depending on length. Online-only appendices can also include Figures and Plates, and these can be in colour.

*Abbreviations* Minimize use, and provide full expansion of any at first mention in the text.

*Symbols, units & currencies* Use SI units (International System of Units, <http://www.bipm.org/en/si/>) and ISO 4217 currency codes ([http://www.iso.org/iso/support/faqs/faqs\\_widely\\_used\\_standards/widely\\_used\\_standards\\_other/currency\\_codes/currency\\_codes\\_list-1.htm](http://www.iso.org/iso/support/faqs/faqs_widely_used_standards/widely_used_standards_other/currency_codes/currency_codes_list-1.htm)).

*Nomenclature* Where necessary, provide the basis used for nomenclature of taxa. The first time a species is mentioned its scientific name should follow without intervening punctuation, thus African elephant *Loxodonta africana*. English names should be in lower case throughout except when they incorporate a proper name.

*Offprints, page charges & colour figures* Contributors receive a PDF file of their article, and may purchase additional hard copy offprints. No page charges are levied. Colour Figures can be published but only at the author's expense.

*Copyright* Authors will be asked, upon acceptance of an article, to transfer copyright to Fauna & Flora International.

*Review* Manuscripts are subject to rigorous peer review. Contributors may suggest appropriate reviewers. For manuscripts with a substantial statistical content, one of the reviewers will be a statistician. The main criteria for acceptance are originality, scientific rigour, an appropriately broad context, relevance to the readership and acceptability of style. We receive more submissions than we are able to publish and the final authority in all matters relating to publication lies with the Editor.

*Proofs* Sent to authors as a PDF file (free viewer available from <http://www.adobe.com>). Corrected proofs must be returned to the Editor within 3 days of receipt; minor corrections can be communicated by e-mail.

The Editor welcomes contributions to the other sections of the journal (deadlines for the January, April, July and October issues are 1 October, 1 January, 1 April and 1 July, respectively), by e-mail to [oryx@fauna-flora.org](mailto:oryx@fauna-flora.org) (see <http://www.oryxthejournal.org> for further advice).

*Letters* Substantial and informative contributions (<700 words) in response to material published in the journal.

*Briefly News* (<6 months old) of general conservation interest based on authoritative published sources (<150 words), including reputable web sites.

*Conservation news* Major recent developments (<6 months old) in conservation or important announcements (<700 words), other than from published sources.

*Grants & Opportunities, Meetings and Publications* Availability of grants or funding opportunities, meeting announcements and book reviews, respectively. Authors and publishers are invited to send publications to the Editor for potential review.

These *Instructions for Contributors* (including the *Guidelines for preparation of Figures & Plates* and the *Code of Conduct for authors contributing articles*) are available on the *Oryx* web site (<http://www.oryxthejournal.org>), from Cambridge University Press (<http://journals.cambridge.org/oryx>), or from the Editor, *Oryx*—*The International Journal of Conservation*, Fauna & Flora International, 4th Floor, Jupiter House, Station Road, Cambridge, CB1 2JD, UK; E-mail [oryx@fauna-flora.org](mailto:oryx@fauna-flora.org); Tel. +44 (0)1223 571000; Fax +44 (0)1223 461481.

*Oryx* is covered by *Biological Abstracts*, *BIOBASE/Current Awareness in Biological Sciences*, *Current Contents Agriculture, Biology and Environmental Science*, *Science Citation Index*, *SciSearch*, *Research Alert* and *Ecology Abstracts*.

- 462 Grants and opportunities
- 463 Meetings
- Cover* Is reducing emissions from deforestation and forest degradation in developing countries (REDD) the new panacea that will simultaneously enhance biodiversity conservation in tropical forests, mitigate climate change and promote financial transfers to some of the world's poorest countries and their peoples? An Editorial (pp. 309–310), a Forum (pp. 330–338) and two articles (pp. 339–357) investigate various aspects of this question. (Photograph © Juan Carlos Muñoz / Naturepl.com)
