Bulletin of *Entomological Research*

journals.cambridge.org/ber

Aims and Scope

Established in 1910, the internationally recognised *Bulletin of Entomological Research* aims to further global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. The *Bulletin* publishes high quality and original research papers, 'critiques' and review articles concerning insects or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematics of individuals and populations, with a particular emphasis upon the major current and emerging pests of agriculture, horticulture and forestry, and vectors of human and animal diseases. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. The *Bulletin* does not publish the results of pesticide testing or traditional taxonomic revisions.

Bulletin of Entomological Research is published bimonthly by
Cambridge University Press

Editor-in-Chief

Dr Paul De Barro

CSIRO Health & Biosecurity, Brisbane,
Queensland 4001, Australia

Research Papers

A. Dor and P. Liedo

Survival ability of Mexican fruit fly males from different strains in presence of the predatory orb-weaving spider *Argiope argentata* (Araneae: Araneidae) 279

K. Canavan, I.D. Paterson, M.P. Hill and T.L. Dudley

Testing the Enemy Release Hypothesis on tall-statured grasses in South Africa, using *Arundo donax*, *Phragmites australis*, and *Phragmites mauritianus* as models 287

I. Martínez-Sañudo, L. Mazzon, M. Simonato, D. Avtzis, J. Pujade-Villar and M. Faccoli

Tracking the origin and dispersal of the Asian chestnut gall wasp *Dryocosmus kuripbilus* Yasumatsu (Hymenoptera, Cynipidae) in Europe with molecular markers 300

H.-S. Pan, B. Liu and Y.-H. Lu

Host-plant switching promotes the population growth of *Apolygus lucorum*: implications for laboratory rearing 309

M. Giovanetti

Foraging choices balanced between resource abundance and handling concerns: how the honeybee, *Apis mellifera*, select the flowers of *Robinia pseudoacacia* 316

E.G. Fidelis, E.S. Farias, R.S. Silva, M.C. Lopes, N.R. Silva and M.C. Picanço

Natural factors regulating mustard aphid dynamics in cabbage 325

E. Hernández, L. Ruiz-Montoya, J. Toledo, P. Montoya, P. Liedo, M. Aceituno-Medina and H. Perales

A comparison of sexual competitiveness and demographic traits of *Anastrepha obliqua* (Macquart) (Diptera: Tephritidae) among fruit-associated populations 333

A. Petrović, M. Mitrović, M.E. Ghaliow, A. Ivanović, N.G. Kavallieratos, P. Starý and Ž. Tomanović

Resolving the taxonomic status of biocontrol agents belonging to the *Aphidius eadyi* species group (Hymenoptera: Braconidae: Aphidiinae): an integrative approach 342

C.A. Boer, M.V. Sampaio and H.S. Pereira

Silicon-mediated and constitutive resistance to *Rhopalosiphum maidis* (Hemiptera: Aphididae) in corn hybrids 356

N. Mortazavi, Y. Fathipour and A.A. Talebi

The efficiency of *Amblyseius swirskii* in control of *Tetranychus urticae* and *Trialeurodes vaporariorum* is affected by various factors 365

M. Virgilio, J.-H. Daneel, A. Manrakhan, H. Delatte, K. Meganck and M. De Meyer

An integrated diagnostic setup for the morphological and molecular identification of the *Ceratitis* FAR complex (*C. anonae*, *C. fasciventris*, *C. rosa*, *C. quilicii*, Diptera, Tephritidae) 376

K. Czekońska, H. Szentgyörgyi and A. Tofilski

Body mass but not wing size or symmetry correlates with life span of honey bee drones 383

S.C. Ferreira, P.G. da Silva, A. Paladini and R.A. Di Mare

Climatic variables drive temporal patterns of α and β diversities of dung beetles 390

Y.-J. Cheng and Z.-X. Li

Spatiotemporal expression profiling of the farnesyl diphosphate synthase genes in aphids and analysis of their associations with the biosynthesis of alarm pheromone 398

A.K.P. Roriz, H.F. Japyassú, C. Cáceres, M. Teresa Vera and I.S. Joachim-Bravo

Pheromone emission patterns and courtship sequences across distinct populations within *Anastrepha fraterculus* (Diptera-Tephritidae) cryptic species complex 408

Corrigendum

A.K.P. Roriz, H.F. Japyassú, C. Cáceres, M. Teresa Vera and I.S. Joachim-Bravo

Pheromone emission patterns and courtship sequences across distinct populations within *Anastrepha fraterculus* (Diptera-Tephitidae) cryptic species complex – CORRIGENDUM

418

Bulletin of Entomological Research is an international journal published bimonthly by Cambridge University Press in February, April, June, August, October and December.

Subscription information:

The subscription rates for Volume 109, 2019 (6 issues):
Print and electronic access: £1561 (UK), (USA, Canada and Mexico US \$2655)
Electronic-only price: £1158 (UK), (USA, Canada and Mexico US \$1971)
The online edition is available at www.journals.cambridge.org/ber with free table of contents alert (upon registration).

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back Volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Information for Authors

Manuscripts should be submitted online at <http://www.editorialmanager.com/ber>. New users should register before submitting a manuscript. Further information about submission is available from the publisher at the given address and is printed on the inside back cover.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and should be ordered at proof stage. No page charges are levied by this journal.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organisations in the USA who are registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of USA copyright law) subject to payment to the CCC of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-4853/2019/\$16.00. Organisations authorised by the Copyright Licensing Agency may also copy material subject to the usual conditions. *For all other use*, permission must be sought from Cambridge or the American Branch of Cambridge University Press.
