B. A. NEWTON

*Director of the Medical Research Council Unit for Biochemical Parasitology and
Head of the Department of Parasitology, University of Cambridge*

Parasitology publishes original results from pure and applied studies of parasites and host-parasite relationships.

In addition to papers describing the taxonomy, life cycles and ecology of parasites, the journal includes reports of experimental work on biochemical, immunological and physiological aspects of parasitism and on the chemotherapy of parasitic diseases. Brief book notices are also published.

With effect from Volume 80, Parasitology regularly publishes articles in which Trends and Perspectives in parasitology are discussed. These titles are intended

- 1 To focus attention on developing and growing topics in parasitology.
- 2 To identify new and old problems in need of research.
- 3 To explain how results from one area of biology might have some bearing on current studies in parasitology.
- 4 To present teachers and students with concise summaries of recent discoveries and new theories.

The Quarterly Journal of Medicine

Official Organ of the
Association for Physicians
of Great Britain and Ireland

One of the leading medical journals published in the U.K. (Established 1907, New Series 1932). It covers the whole field of medicine but gives some emphasis to internal medicine. Its aim is to report advances in both diagnosis and treatment, and many of its papers are concerned with the development of growing points of current interest. The basic orientation is clinical, but the journal welcomes contributions with a patho-physiological approach. In the face of the present tendency to fragment the subject, *The Quarterly Journal of Medicine* attempts to provide general physicians with a synoptic view. Many of the contributions provide a desirable link between clinical and basic science. In addition to original papers, the journal also publishes occasional requested review articles on subjects of special interest.

Quarterly, 1980 prices: £25.00 (UK £19.50, US \$49.00) p.a.
Single issues, £6.75 (\$15.00)
