Covering all areas of human genetics

With an emphasis on twin studies, genetic epidemiology, psychiatric and behavioral genetics, and research on multiple births in the fields of epidemiology, genetics, endocrinology, fetal pathology, obstetrics and pediatrics.

December 2016

Volume 19 Number 6

ISSN 1832–4274
Twin Research and Human Genetics is the official journal of the International Society for Twin Studies and the Human Genetics Society of Australasia. Twin Research and Human Genetics communicates the results of original research in human genetics with a special emphasis on multiple birth research. It also provides timely state-of-the-art reviews on all aspects of human genetics and twin studies. Topics covered include: genetic epidemiology, behavioral genetics, genetics of the clinic, endocrinology, fetal pathology, medical genetics, obstetrics, psychiatric genetics and other areas of human genetics, with an emphasis on twin studies.

Editorial policy
All contributions and general correspondence regarding editorial matters should be addressed to the Editor and sent to the Editorial Office. Manuscripts submitted to the journal must represent reports of original research. Manuscripts will be sent for anonymous review either by members of the editorial board, or by individuals of similar standing in the field. Authors are requested to submit up to three suggested reviewers for the manuscript. Authors will be notified of acceptance or rejection within 6 weeks. When a manuscript is returned to the corresponding author for revision, it should be returned to the Editors within 2 months, otherwise it may be considered withdrawn. Accepted manuscripts will appear in the journal within 3 months, whenever possible.

Preparation of the manuscript
All manuscripts should be in English presented editorially in Word or Word Perfect. All sections of the manuscript should be double-spaced with one-inch margins on all four sides. Please submit manuscripts in electronic form to the Journal's online manuscript submission portal. The first page of the manuscript should contain only an abstract in a single paragraph of not more than 200–250 words. Abbreviations contained only in the abstract should be explained in the text in parentheses.

Introduction
The second page of the manuscript should contain a brief as possible, not exceeding 1500 words. Do not use the heading ‘Introduction’.

References
References should be listed alphabetically by author (or in the case of works in press, by title). Each reference should be numbered consecutively with Arabic numerals. Footnotes to tables indicated by lower case letters (e.g., a, b, c). Inclusion of an asterisk after the first author's name for papers published in a journal not indexed in MEDLINE should be avoided.

Full-page photographs should be labeled Figure X about here.

Electronic Only
1. Photographs, graphs and figures should be supplied as a PDF file as well as a TIF file. Include placement instructions in the manuscript Word file. Include a PDF file withms extensions for all 600 dpi for line art, and these should also be in TIF format.

2. Manuscripts that contain equations created with LaTeX or similar specialist software need to be supplied as a PDF file as well as a Microsoft Word document.

3. Prior to sending artwork, the separate files of figures, graphs, illustrations, and so on should be printed by the author to test that the fonts have been embedded correctly and there is no distortion in the artwork (e.g., lines and fonts are not rendered clearly and any halftones, especially halftones of low frequency, should be avoided). Authors may be charged for any changes to the submitted artwork.

4. Preferred method of submission: email as attachments to TWIN@ests.qimr.edu.au or by post. MANUSCRIPTS RECEIVED IN CONFORMITY WITH THESE GUIDELINES, IT MAY BE RETURNED TO THE AUTHOR.

Reviewers
Reviews of topics within the scope of Twin Research and Human Genetics will be considered for publication after peer review. Please ensure that you have read this guide before submitting your manuscript to the editor before preparing your manuscript to make sure it meets the submission criteria. A similar review is not in progress.

Proofs
Manuscripts will be scheduled for publication upon receipt of proofs. Extensive changes to the proofs will result in publication delay. Important new information that has become available between acceptance of the manuscript and receipt of final proofs may be inserted as an Addendum in proof with the permission of the Editors. Important new information that has become available between acceptance of the manuscript and receipt of final proofs may be inserted as an Addendum in proof with the permission of the Editors. Additional material may be added by agreement of the Editors. Addenda should be typed on separate sheets of paper.
