SUBJECT INDEX

Automatic Identification System:

- Estimating Navigation Patterns from AIS. *Karl Gunnar Aarsæther and Torgeir Moan* 587

Air Navigation:

- Quality Control in SBAS: Protection Levels and Reliability Levels. *João Oliveira and Christian Tiberius* 509
- A Simplified Method for the Analysis of Interference from JTIDS Radio Networks to DME Aeronautical Radionavigation System. *Vassilios A. Houdzoumis* 721
- Validation of EGNOS Helicopter Approach Procedures to North Sea Oil Platforms. *J. Valner and S. J. Leighton* 189

Air Traffic Management:

- SESAR: R&D and Project Portfolios for Airline Business Needs. *Peter Brooker* 203
- Simple Models for Airport Delays During Transition to a Trajectory-Based Air Traffic System. *Peter Brooker* 555

Animal Navigation:

- Conditioning as a Technique for Studying the Sensory Systems Involved in Animal Orientation, Homing and Navigation – a Review. *Cordula V. Mora, Michael Davison and Michael M. Walker* 571
- Modelling Group Navigation: Dominance and Democracy in Homing Pigeons. *Robin Freeman and Dora Biro* 33
- Optical Matrix Device: Technical Aspects of a New Tool for the Detection and Recording of Small Nocturnal Aerial Targets. *Michael Vorotkov, Alexandra Sinelschikova and Martin Griffiths* 23
- Weak GPS Signal Detection in Animal Tracking. *Grant MacLean* 1

Collision Avoidance:

- A Unified Analytical Framework for Ship Domains. *Ning Wang, Xianyao Meng, Qingyang Xu and Zuwen Wang* 643
- Behaviour Patterns in Crossing Situations. *John Kemp* 443
- Planning Emergency Manoeuvres. *Rafal Szlapczynski* 79
- Review of Collision Avoidance and Path Planning Methods for Ships in Close Range Encounters. *CheeKuang Tam, Richard Bucknall and Alistair Greig* 455
- When Do Collision Regulations Begin to Apply? *John Kemp* 167
- The Ship Domain – A Criterion of Navigational Safety Assessment in an Open Sea Area. *Zbigniew Pietrzykowski and Janusz Uriasz* 93
- The AIS-Assisted Collision Avoidance. *Hua-Zhi Hsu, Neil A. Witt, John B. Hooper and Anne P. McDermott* 657
- The Use of AIS for Collision Avoidance. *Ivica Tijardovic* 168

History:

- Alcock and Brown. *Terry Hayward* 411
- The Controversial Skill of Columbus as a Navigator: An Enduring Historical Enigma. *Douglas T. Peck* 417

Integrated Navigation Systems:

- GPS and Inertial Systems for High Precision Positioning on Motorways. *J. E. Naranjo, F. Jiménez, F. Aparicio, J. Zato* 351
- Inertial Navigation System Data Filtering Prior to GPS/INS Integration. *Sergio Baselga, Luis García-Asenjo, Pascual Garrigues and José Luis Lerma* 711

Navigation Integration Using the Fuzzy Strong Tracking Unscented Kalman Filter. <i>Dah-Jing Jwo and Shih-Yao Lai</i>	303
Interception Techniques:	
Exploring the Performance of Natural Search Strategies for the Control of Unmanned Autonomous Vehicles. <i>Alec Banks and Jonathan Vincent</i>	283
Land Navigation:	
Active RFID Trilateration and Location Fingerprinting Based on RSSI for Pedestrian Navigation. <i>Qing Fu and Guenther Retscher</i>	323
Error Mechanisms in Indoor Positioning Systems without Support from GNSS. <i>William R. Michalson, Abhijit Navalekar and Hemish K. Parikh</i>	239
Heuristic Reduction of Gyro Drift for Personnel Tracking Systems. <i>Johann Borenstein, Lauro Ojeda and Surat Kwanmuang</i>	41
A Hidden Markov Model-Based Map-Matching Algorithm for Wheelchair Navigation. <i>Ming Ren and Hassan A. Karimi</i>	383
Improved Filter Strategies for Precise Geolocation of Unexploded Ordnance using IMU/GPS Integration. <i>Jong Ki Lee and Christopher Jekeli</i>	365
Localisation Techniques:	
Verification of a Real-Time Attitude Determination Algorithm through Development of 48-Channel GPS Attitude Receiver Hardware. <i>Jaegyung Jang and Changdon Kee</i>	397
Marine Navigation:	
GPS Jamming and the Impact on Maritime Navigation. <i>Alan Grant, Paul Williams, Nick Ward and Sally Basker</i>	173
Revisiting the Lessons of the Early Steering and Sailing Rules for an e-Navigation Age. <i>John Wilde Crosbie</i>	109
The Performance of a Tunnel Bow Thruster with Slow Speed Ahead: A Revisited Issue. <i>Santiago Iglesias Baniela</i>	631
When is a VTS not a VTS? <i>Captain Terry Hughes</i>	439
Navigation Practice:	
Application of Computational Fluid Dynamics Simulations to the Analysis of Bank Effects in Restricted Waters. <i>D. C. Lo, Dong-Taur Su and Jan-Ming Chen</i>	477
New Algorithm for Great Elliptic Sailing (GES). <i>Athanasios Pallikaris and George Latsas</i>	493
Pilotage:	
A Navigation Safety Support Model for the Strait of Istanbul. <i>M. Anil Yazici and Emre N. Otay</i>	609
Shore-Based Pilotage: Pilot or Autopilot? Piloting as a Control Problem. <i>Karl Bruno and Margareta Lützhöft</i>	427
Transit Vessel Scheduling in the Strait of Istanbul. <i>Özgecan S. Ulusçu, Birnur Özbaşı, Tayfur Altıok, İlhan Or and Tuba Yılmaz</i>	59
Satellite Navigation Systems and Techniques:	
A Combined GPS/GLONASS Navigation Algorithm for use with Limited Satellite Visibility. <i>Changsheng Cai and Yang Gao</i>	671
A Comparison of Outlier Detection Procedures and Robust Estimation Methods in GPS Positioning. <i>Nathan L. Knight and Jinling Wang</i>	699
Evaluation of EGNOS Tropospheric Delay Model in South-Eastern Europe. <i>Tomislav Kos, Maja Botinčan and Ivan Markezic</i>	341
GPS-GLONASS-GALILEO: A Dynamical Comparison. <i>Stelian Cojocaru</i>	135
Improving Ambiguity Resolution Rate with an Accurate Ionospheric Differential Correction. <i>Mardina Abdullah, Hal J. Strangeways and David M. A. Walsh</i>	151
Klobuchar-Like Local Model of Quiet Space Weather GPS Ionospheric Delay for Northern Adriatic. <i>Renato Filjar, Tomislav Kos and Serdjo Kos</i>	543

Modified High-Resolution Correlator Technique for Short-Delayed Multipath Mitigation. <i>Hyungmin So, Ghangho Kim, Taikjin Lee, Sanghoon Jeon and Changdon Kee</i>	523
On-line Detection of Tracking Loss in Aviation GPS Receivers Using Frequency-Lock Loops. <i>Hyungmin So, Sujin Choi, Sanghoon Jeon and Changdon Kee</i>	263
On the Availability of Fault Detection and Exclusion in GNSS Receiver Autonomous Integrity Monitoring. <i>Jinling Wang and Pieter B. Ober</i>	251
A Performance Analysis of Low-Cost GPS Receivers in Kinematic Applications. <i>R. M. Alkan and M. H. Saka</i>	687

Space:

Precise Spacecraft Relative Positioning using Single-Frequency Pseudorange Measurements. <i>Marc-Philippe Rudel and Pini Gurfil</i>	119

THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication.

The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs) which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGS include: Animal Navigation Group (ANG), Civil and Military Aviation Group (CMAG), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Land Vehicle Navigation Group (LVNG), Marine Traffic Navigation Group (MTNG), Navigation On Foot (NOF), Small Craft Group (SCG) and Satellite Special Interest Group (SATSIG).

The Institute publishes *The Journal of Navigation* four times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is co-ordinated with that of similar organizations in other countries.

Membership

There are seven classes of Membership of the Institute:

(1) HONORARY FELLOWS: Distinguished persons upon whom the Council may see fit to confer an honorary distinction.

(2) FELLOWS: Members, of at least three years' standing, holding certain qualifications laid down in the by-laws; these qualifications include having made a contribution of value to navigation.

(3) ASSOCIATE FELLOWS: Individuals who satisfy the Council of their high level of professional achievement or experience in the advancement of navigation operations, concepts or equipment.

(4) MEMBERS: Persons over twenty-one years of age who satisfy the Council of their interest in navigation.

(5) STUDENT MEMBERS: Persons under twenty-five years of age studying at a recognized school or university with a view to making navigation, or an allied interest, their career.

(6) CORPORATE MEMBERS: Organizations such as universities, navigation schools, government departments or companies, here and abroad, who are directly or indirectly interested in the science of navigation. Corporate Members are entitled to send representatives to all Institute meetings and to receive six copies of its publications. They are encouraged to take an active part in the Institute's work. Applications should be sent by letter addressed to the Director.

(7) RETIRED MEMBERS: Fellows or Members of 65 years of age or over who have paid no fewer than 6 annual subscriptions.

There is also Associateship of the Institute, which gives entitlement of Membership to one Special Interest Group SIG, but not to receipt of the *Journal of Navigation*.

Subscriptions

Annual subscriptions to the Institute are payable in advance as follows (prices are inclusive of vat):

Fellows	£123
Members and Associate Fellows	£113
Student Members	£15
