CORRIGENDUM

Review of Jonathan Barnes’
Proof, Knowledge and Scepticism: Essays in Ancient Philosophy III

TAMAR NAWAR

doi:10.1017/S0031819115000042, Published by Cambridge University Press, 21 April 2015.

There are two errors in this review. On page 4, the quotation from Barnes should be corrected to read:

‘A Deduction is an ordered pair, \(<\{\alpha_1, \alpha_2, \ldots, \alpha_n\}, \sigma>\) such that (1) \(\sigma\) follows necessarily from \(\{\alpha_1, \alpha_2, \ldots, \alpha_n\}\), and (2) \(\sigma\) holds (if it holds) because of each \(\alpha_i\).’

The second error is in the third footnote, on page 5, wherein there is an extra word. The pertinent sentence, once revised, should read:

‘They offer us knowledge which we already had under a different mode of presentation but do not straightforwardly lead us to know new things.’
