SPECIAL ISSUE: INQUA LOESSFEST 2016

REVIEW ARTICLE

563–618 Approaches and challenges to the study of loess—Introduction to the LoessFest Special Issue

RESEARCH ARTICLES

619–628 Mineral magnetic record of the Miocene–Pliocene climate transition on the Chinese Loess Plateau, North China
Hong Ao, Mark J. Dekkers, Andrew P. Roberts, Eelco J. Rohling, Zhisheng An, Xiaodong Liu, Zhaoxia Jiang, Xiaoke Qiang, Yong Xu, and Hong Chang

629–644 Magnetostatigraphic dating of the Linyi Fauna and implications for sequencing the mammalian faunas on the Chinese Loess Plateau
Yuhao Ojo, Hong-An, Xujiang Zhang, Biaojuan Shi, Jiaojing Li, Xingyao Li, and Peng Zhang

645–659 Insights into the provenance of the Chinese Loess Plateau from joint zircon U-Pb and garnet geochemical analysis of last glacial loess
Yuck Joon, Thomas Stevens, Aria Bid, Max Laveno, Martin Ritter, Peter Verweij, Sergio Andò, Edoardo Garzanti, Xueshun Li, Houchu Zhang, and Zong Liu

660–673 Evaluating the palaeoecological significance of clay mineral records from a late Pleistocene loess–paleosol section of the Ill Basin, Central Asia
Yun Li, Zongyong Yang, Mengyue Zeng, Weiran Liu, Bratan Ochsendorf, Liangqin Cheng, Xiaoli Chen, and Tilmann Holzheuer

674–680 Reevaluation of Late Pleistocene loess profiles at Remizovka (Kazakhstan) indicates the significance of topography in evaluating terrestrial palaeoclimate records
Tobias Sprafke, Kathryn E. Fitzsimmons, Christoph Grützner, Austin Elliot, Laurent Marquer, and Saida Nigmatova

691–701 Relationships between loess and the Silk Road reflected by environmental change and its implications for human societies in the area of ancient Panjikent, central Asia
Piotr Ochsendorf, Magdalena Opała-Ochsendorf, Olimjon Trabonzhan, Zikailan Jiao, and Tedesco, Nadzhiti

702–717 Aeolian silt contribution to soils on mountain slopes (Mt. Ślęża, southwest Poland)
Tomasz Wierczynski, Tobias Sprafke, Grzegorz Rohański, Elżbieta Męszyńska-Biela, Marcin Ziółek, and Piotr Ochsendorf

718–733 Late Quaternary loess and soils on uplands in the Cuyahoga and Mesa Verde areas, Utah, and Colorado
Margaret C. Baker, Harold L. Goldberg, Richard L. Reynolds, Steven L. Fearn, Shannon A. Mahan, and Paul E. Carano

739–755 Episodic deposition of Illinois Valley Peoria silt in association with Lake Michigan Lobe fluctuations during the last glacial maximum
Thomson A. Neas, Jessica L. Conroy, David A. Grimley, William R. Goddard, and Ben Branden Carey

756–768 Mineralogical and geochemical evidence of weathering in a middle to late Pleistocene paleosol sequence in the Driftless Area of Wisconsin
Peter M. Jacobs and Anthony T. Davis

769–785 Eolian sand and loess deposits indicate west–northwest paleowinds during the Late Pleistocene in western Wisconsin, USA

786–796 Loess in the mid-Atlantic region, USA
John S. Whitt, Daniel P. Huyck, and Darren L. Lovel

797–819 Origin of last-glacial loess in the western Yukon-Tanana Upland, central Alaska, USA
Daniel R. Muhs, Jeffrey A. Piujig, James R. Budahn, Gary L. Stepp, E. Arthur Bettis III, and Britta Jensen

820–820 Aeolian silt contribution to soils on mountain slopes (Mt. Ślęża, southwest Poland) – ERRATUM
The climate and environment of the Shilou section on the eastern Chinese Loess Plateau, North China, with a mean annual temperature of ~9°C and mean annual precipitation of ~500 mm. The aeolian Shilou Red Clay provides an important archive of the tectonic- to orbital scale climate and environmental changes of the Shilou area. The seasonal reversal of Asian winter monsoon (AWM) and Asian summer monsoon (ASM) circulations, with the latter being stronger during the Late Miocene–Pliocene, suggest a substantial ASM precipitation increase across the Miocene–Pliocene transition, which was suggested by its mineral magnetic and lithological records. (See the article by Ao et al., pages 619–628, in this issue.)
