The Weed Science Society of America publishes original research and scholarship in the form of peer-reviewed articles in three international journals. Weed Technology is focused on understanding “why” phenomena occur in agricultural crops. As such, it focuses on fundamental research directly related to all aspects of weed science in agricultural systems. Weed Technology focuses on understanding “how” weeds are managed. As such, it is focused on more applied aspects concerning the management of weeds in agricultural systems. Invasive Plant Science and Management is a broad-based journal that focuses not only on fundamental and applied research on invasive plant biology, ecology, management, and restoration of invaded non-crop areas, but also on the many other aspects relevant to invasive species, including educational activities, policy issues, and case study reports. Topics for Weed Technology include all aspects of weed management in agricultural, horticultural, ornamental, forestry, aquatic, turf, recreational, rights-of-ways, and other settings; weed resistance to herbicides; herbicide resistant crops; biological weed control agents; new weed management techniques; impacts of weed competition with crops; vegetation management with plant growth regulators; weed surveys; weed-related grower surveys; education; and extension. Symposia papers and reviews are accepted. Consult the editor for additional information.

Associate Editors (Assignment Year)

Jason Bond, Stoneville, MS (2010)
Amit Jhala, Lincoln, NE (2018)
Robert Nurse, Guelph, ON (2016)
Kevin Bradley, Columbia, MO (2012)
David Johnson, Des Moines, IA (2019)
Darren Robinson, Ridgefield, ON (2008)
Barry Brecke, Jay, FL (2013)
William Johnson, West Lafayette, IN (2007)
Larry Steckel, Jackson, TN (2007)
Peter Dittmar, Gainesville, FL (2016)
Vipan Kumar, Hays, KS (2020)
Steve Fennimore, Salinas, CA (2004)
Drew Lyon, Pullman, WA (2018)
Mark VanGessel, Georgetown, DE (2013)
Aaron Hager, Urbana, IL (2012)
Patrick McCullough, Griffin, GA (2016)
Michael Walsh, Crawley, Australia (2016)
Prashant Jha, Ames, IA (2016)
Scott McElroy, Auburn, AL (2012)
Eric Webster, Baton Rouge, LA (2018)
Amit Jhala, Urbana, IL (2016)

Tracy Candelaria, Managing Editor

Officers of the Weed Science Society of America

http://wssa.net/society/bod/

Weed Technology (ISSN 0890-037X) is published by the Weed Science Society of America, 12011 Tejon Street, Suite 700, Westminster, CO 80234. It is published bimonthly, one volume per year, six issues per year beginning in February.

Membership includes online access to Weed Technology, Weed Science, Invasive Plant Science and Management, and the online WSSA Newsletter. Dues should be sent to WSSA, 12011 Tejon Street, Suite 700, Westminster, CO 80234 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

New subscriptions and renewals begin with the first issue of the current volume. Please visit the Weed Technology subscription page at https://www.cambridge.org/core/journals/weed-technology/subscribe; Email: subscriptions_newyork@cambridge.org in USA, journals@cambridge.org outside USA.

Weed Technology publishes six times a year in February, April, June, August, October, and December. Annual institutional electronic subscription rates: US $411.00; UK £286.00.

Please use Editorial Manager to access manuscript submissions (http://www.editorialmanager.com/wt). Authors are asked to pay $85 for the first page and $65 per page thereafter as a portion of the cost of publication, plus an additional processing charge of $55 per manuscript if none of the authors are WSSA members. The Editor can make exceptions in advance when justified.

The Weed Science Society of America fully subscribes to the belief that progress in science depends upon the sharing of ideas, information, and materials among qualified investigators. Authors of papers published in Weed Technology are therefore encouraged, whenever practicable and when state and federal laws permit, to share genotypically unique propagative materials they might possess with other workers in that area who request such materials for the purpose of scientific research.

Cover
Volunteer corn in hybrid corn, a problem weed particularly in corn after corn cropping systems in southcentral Nebraska. Enlist corn is a new trait resistant to aryloxyphenoxypropionate that can provide selective control of glyphosate/glufosinate-resistant volunteer corn. Refer to article by Striegel et al. in this issue. Photo credit: Amit Jhala.
• RESEARCH ARTICLES

Control of glyphosate/glufosinate-resistant volunteer corn in corn resistant to aryloxyphenoxypropionates
Adam Striegel, Nevin C. Lawrence, Stevan Z. Knezevic, Jeffrey T. Krumm, Gary Hein and Amit J. Jhala .................. 309

Off-target movement assessment of dicamba in North America
Nader Soltani, Maxwel C. Oliveira, Guilherme S. Alves, Rodrigo Werle, Jason K. Norsworthy, Christy L. Sprague,
Bryan G. Young, Daniel B. Reynolds, Ashli Brown and Peter H. Sikkema ................................................................. 318

Investigations of the sensitivity of ornamental, fruit, and nut plant species to driftable rates of 2,4-D and dicamba
Brian R. Dintelmann, Michele R. Warmund, Mandy D. Bish and Kevin W. Bradley .......................... 331

Crop signal markers facilitate crop detection and weed removal from lettuce and tomato by an intelligent cultivator
Hannah Joy Kennedy, Steven A. Fennimore, David C. Slaughter, Thuy T. Nguyen, Vivian L. Vuong, Rekha Raja
and Richard F. Smith ......................................................................................................................................................... 342

Survey of rice weed management and public and private consultant characteristics in Southern Brazil
Bruno de Lima Fruet, Aldo Merotto Jr. and André da Rosa Ulguim ................................................................. 351

Inheritance of resistance and response of Provisia™ rice to quizalofop-p-ethyl under U.S. field conditions
Jose R. Camacho, Steve D. Linscombe, Eric P. Webster and James H. Oard ......................................................... 357

Field dissipation of S-metolachlor in organic and mineral soils used for sugarcane production in Florida
Jose V. Fernandez, D. Calvin Odero, Gregory E. MacDonald, Jason A. Ferrell, Brent A. Sellers
and P. Christopher Wilson ........................................................................................................................................ 362

Evaluation of herbicide efficacy and application timing for giant miscanthus (Miscanthus x giganteus) biomass reduction
Nicole Barksdale, John D. Byrd, Maria Leticia M. Zaccaro and David P. Russell ......................................................... 371

Determination of weed hosts of soybean cyst nematode in South Dakota
Pawan Basnet, Sharon A. Clay and Emmanuel Byamukama ................................................................................. 377

Cover crops are not affected by tobacco soil residual herbicides but also do not provide consistent weed
management benefits
Erin R. Haramoto, Carolyn J. Lowry and Robert Pearce ........................................................................... 383

Influence of 2,4-D, dicamba, and glyphosate on clethodim efficacy of volunteer glyphosate-resistant corn
Nick T. Harre, Julie M. Young and Bryan G. Young ............................................................................................. 394

Relative activity comparison of aminocyclopyrachlor to pyridine carboxylic acid herbicides
Benjamin P. Sperry, José Luiz C. S. Dias, Candice M. Prince, Jason A. Ferrell and Brent A. Sellers .................. 402

Relationships between soil, forage, and grazing parameter effects on weed incidence in Missouri pastures
Gatlin Bunton, Zachary Trower and Kevin W. Bradley .......................................................................................... 408

Droplet size impact on lactofen and acifluorfen efficacy for Palmer amaranth (Amaranthus palmeri) control
