

## INSTRUCTIONS FOR CONTRIBUTORS

### SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

**Declaration of Interest:** A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

**REFERENCES** The APA referencing system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. In the References section. Where several references are cited together they should be listed in rising date order. The References section should be supplied in alphabetical order listing all authors up to 7 in number, or the first 6 authors plus the last author, date, article title, journal title in full, volume, page numbers and/or DOI. (authors' names in bold, journal titles in full), following the text. Some examples follow:

Journal article with DOI:

Nevin, A. (1990). The changing of teacher education special education. *Teacher Education and Special Education: The Journal of the Teacher Education Division of the Council for Exceptional Children*, 13(3-4), 147-148. doi:XXX

Light, M. A., & Light, I. H. (2008). The geographic expansion of Mexican immigration in the United States and its implications for local law enforcement. *Law Enforcement Executive Forum Journal*, 8, 73–82. doi:XXX

Journal article without DOI (when DOI is not available):

Good, C. D., Johnsrude, I. S., Ashburner, J., Henson, R. N. A., Firston, K. J., & Frackowiak, R. S. J. (2001). A voxel-based morphometric study of ageing in 465 normal adult human brains. *NeuroImage*, 14, 21–36. Retrieved from <http://xxxx>

No retrieval date is needed.

Journal article with DOI, more than seven authors:

Gilbert, D. G., McClernon, F. J., Rabinovich, N. E., Sugai, C., Plath, L. C., Asgaard, G., ... Botros, N. (2004). Effects of quitting smoking on EEG activation and attention last for more than 31 days and are more severe with stress, dependence, DRD2 A1 allele, and depressive traits. *Nicotine and Tobacco Research*, 6, 249–267. doi:XXX

Citations for Websites:

Simmons, B. (2015, January 9). The tale of two Flaccos. Retrieved from <http://grantland.com/the-trian...>

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

**FIGURES AND TABLES** Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

**PROOFS** Page proofs will be sent to the author designated to receive correspondence, corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article.

# PSYCHOLOGICAL MEDICINE

## CONTENTS

### REVIEW ARTICLES

Psychotic experiences in the general population, a review; definition, risk factors, outcomes and interventions  
Staines L et al 3297

Neurofunctional mapping of reward anticipation and outcome for major depressive disorder: a voxel-based meta-analysis  
Yang X et al 3309

Non-affective psychotic disorders and risk of dementia: a systematic review and meta-analysis  
Miniawi SE et al 3323

### ORIGINAL ARTICLES

Transdiagnostic group cognitive behavioural therapy for emotional disorders in primary care: the results of the PsicAP randomized controlled trial  
Cano-Vindel A et al 3336

Maternal mental health during the COVID-19 lockdown in China, Italy, and the Netherlands: a cross-validation study  
Guo J et al 3349

Mismatch negativity and P3a in drug-naive adults with attention-deficit hyperactivity disorder  
Hsieh MH et al 3360

An individualized treatment rule to optimize probability of remission by continuation, switching, or combining antidepressant medications after failing a first-line antidepressant in a two-stage randomized trial  
Kessler RC et al 3371

Social relationships and depression during the COVID-19 lockdown: longitudinal analysis of the COVID-19 Social Study  
Sommerlad A et al 3381

Investigating the genetic and environmental aetiologies of non-suicidal and suicidal self-harm: a twin study  
Lim KX et al 3391

The mental health of lesbian, gay, and bisexual adults compared with heterosexual adults: results of two nationally representative English household probability samples  
Pitman A et al 3402

Individualized risk components guiding antipsychotic delivery in patients with a clinical high risk of psychosis: application of a risk calculator  
Zhang TH et al 3412

Psychotic symptoms in mass shootings v. mass murders not involving firearms: findings from the Columbia mass murder database  
Brucato G et al 3422

Inflammation is correlated with abnormal functional connectivity in unmedicated bipolar depression: an independent component analysis study of resting-state fMRI  
Tang G et al 3431

Time-dependent depression and anxiety symptoms as risk factors for recurrent cardiac events: findings from the UPBEAT-UK study  
Norton J et al 3442

Attentional salience and the neural substrates of response inhibition in borderline personality disorder  
Wrege JS et al 3451

Psychosocial and medical predictors of 14-year mortality and morbidity in male and female coronary artery bypass graft recipients: a prospective observational study  
Linden W et al 3460

Comparison of different scoring methods based on latent variable models of the PHQ-9: an individual participant data meta-analysis  
Fischer F et al 3472

Comparative efficacy and acceptability of expressive writing treatments compared with psychotherapy, other writing treatments, and waiting list control for adult trauma survivors: a systematic review and network meta-analysis  
Gerger H et al 3484

Association between complement component 4A expression, cognitive performance and brain imaging measures in UK Biobank  
O'Connell KS et al 3497

Association between the glyco-metabolic adverse effects of antipsychotic drugs and their chemical and pharmacological profile: a network meta-analysis and regression  
Camovale C et al 3508

The relation of depression with structural brain abnormalities and cognitive functioning: the Maastricht study  
Geraets AFJ et al 3521

Prospective relationships of adolescents' screen-based sedentary behaviour with depressive symptoms: the Millennium Cohort Study  
Kandola A et al 3531

Associations between insomnia and reward learning in clinical depression  
Liverant GI et al 3540

Catastrophic cognitions about coronavirus: the Oxford psychological investigation of coronavirus questionnaire [TOPIC-Q]  
Rosebrock L et al 3550

Exploring the relationship between pain and self-harm thoughts and behaviours in young people using network analysis  
Hinze V et al 3560

Longitudinal courses of suicidal ideation in U.S. military veterans: a 7-year population-based, prospective cohort study  
Herzog S et al 3570

Effects of dietary interventions on depressive symptom profiles: results from the MoodFOOD depression prevention study  
Vreijling SR et al 3580

Developmental trajectories of ADHD symptoms in a large population-representative longitudinal study  
Murray AL et al 3590

Poverty transitions in severe mental illness: longitudinal analysis of social drift in China, 1994–2015  
Yu Y-H et al 3597

Examining the association between childhood autistic traits and adolescent hypomania: a longitudinal twin study  
Taylor MJ et al 3606

Successful metabolic control in diabetes type 1 depends on individual neuroeconomic and health risk-taking decision endophenotypes: a new target in personalized care  
Jorge H et al 3616

Depression and worry symptoms predict future executive functioning impairment via inflammation  
Zainal NH et al 3625

Late-life cynical hostility is associated with white matter alterations and the risk of Alzheimer's disease  
Cyprien F et al 3636

Dissecting the heterogeneity of posttraumatic stress disorder: differences in polygenic risk, stress exposures, and course of PTSD subtypes  
Campbell-Sills L et al 3646

Comparison of social cognition using an adapted Chinese version of the Reading the Mind in the Eyes Test in drug-naive and regularly medicated individuals with chronic schizophrenia and healthy controls in rural China  
Deng F et al 3655

Perceived major experiences of discrimination, ethnic group, and risk of psychosis in a six-country case-control study  
Misra S et al 3668

Adolescent social networks matter for suicidal trajectories: disparities across race/ethnicity, sex, sexual identity, and socioeconomic status  
Xiao Y et al 3677

Mediators of the longitudinal relationship between childhood adversity and late adolescent psychopathology  
Healy C et al 3689

Significant association between intracranial volume and verbal intellectual abilities in patients with schizophrenia and a history of birth asphyxia  
Wortinger LA et al 3698

Impact of maternal age on infants' emotional regulation and psychomotor development  
Moreno-Giménez A et al 3708

Attention allocation in posttraumatic stress disorder: an eye-tracking study  
Lazarov A et al 3720

Psychosocial working conditions and the risk of diagnosed depression: a Swedish register-based study  
Almroth M et al 3730

### CORRESPONDENCE

Stay-at-home orders due to the COVID-19 pandemic are associated with elevated depression and anxiety in younger, but not older adults: results from a nationwide community sample of adults from Germany  
Benke C et al 3739

Comment on Duthel, Mondillon, and Navel (2020): the importance of adjustment disorders and resilience  
Van Overmeire R 3741

COVID-19, masks and communication in the operating theatre: the importance of face value  
Sharif SP & Blagrove E 3743

A repeated cross-sectional survey assessing university students' stress, depression, anxiety, and suicidality in the early stages of the COVID-19 pandemic in Poland  
Debowska A et al 3744

COVID-19 induced social isolation; implications for understanding social cognition in mental health  
Bland AR et al 3748

COVID-19 vaccine hesitancy is associated with beliefs on the origin of the novel coronavirus in the UK and Turkey  
Salali GD & Uysal MS 3750
