Public policies

25-hydroxyvitamin D assay standardisation and vitamin D guidelines paralysis
CT Sempos and N Binkley

Assessment and methodology

Seasonal variation in serum 25-hydroxyvitamin D level: the case of vitamin D deficiency
Jung Hyun Kwak, Yun-Chul Hong and Yoon-Hyeong Choi

Behavioral nutrition

Association of nutrition, vitamin D deficiency, and psychiatric depression: a clinical perspective
Mirvahid J Saffari

Nutritional epidemiology

Vitamin D status of children in Kerala, southern India
Madhavan Ponnusamy, Nayagamuv Vasekka and Biju George

Vitamin D status in a multi-ethnic population of northern Norway: the SAMINOR 2 Clinical Survey
Natalia Petrenya, Christel Lamberg-Allardt, Marita Melhus, Ann Ragnhild Broderstad and Magritt Brustad

25-Hydroxyvitamin D and the risk of incident diabetes in Hong Kong Chinese
Raymond YH Leung, Bernard MY Cheung, Kathryn CB Tan, Annie WC Kung and Ching-Lung Cheung

Community nutrition

The association between iron and vitamin D status in Arab adolescents
Mohammad S Masoud, Sobhy M Yakout, Omar S Al-Attas, Majed S Alokail and Nasser M Al-Daghri

Nutritional epidemiology

Season 25-hydroxyvitamin D is associated with obesity and metabolic parameters in US children
Zh-Fu Dong, Xi-Yu Guo, Fang Fang, Guoyan Re, Chongfei Guo and Longli Li

Season 25-hydroxyvitamin D is associated with obesity and metabolic parameters in US children
Roser A Almaraz

Vitamin D sufficiency in young Brazilian children: associated factors and relationship with vitamin A corrected for inflammatory state
Viviane Nascimento, Letícia C Qing, Rebeca M F Araujo and Mona Al Calendar for the ESBRF Working Group

Jung Hyun Kwak, Yun-Chul Hong and Yoon-Hyeong Choi

Association of seasonality and serum albumin concentration with vitamin D deficiency in subjects with chronic hepatitis C infection living in a sunny country
Jenéen Pflug, Andrea Dapunt, Carol L. D thermometer, Andrea M. D thermometer, and Andrea C. D thermometer

Prevalence and determinants of vitamin D deficiency and insufficiency among three immigrant groups in Finland: evidence from a population-based study using standardised 25-hydroxyvitamin D data
Folasade A Adebayo, Suvi T Itkonen, Eero Lilja, Tuija Jääskeläinen, Annamari Lundqvist, Tiina Laatikainen, Päivikki Koponen, Kevin D Cashman, Maijaliisa Erkkola and Christel Lamberg-Allardt

Does vitamin D status predict weight gain or increase in waist circumference? Results from the Kangasalan Health 2000–2011 Survey
Naja Schibyebo, Luke Mínicos, Steve O’Donnell, Keith Elphinston, Sophie Hovestrand and Amanda Lafford

Vitamin D status and weight gain: results from the Kangasalan Health 2000–2011 Survey
Naja Schibyebo, Luke Mínicos, Steve O’Donnell, Keith Elphinston, Sophie Hovestrand and Amanda Lafford

Themed Issue: Vitamin D

Does vitamin D status predict weight gain or increase in waist circumference? Results from the Kangasalan Health 2000–2011 Survey
Naja Schibyebo, Luke Mínicos, Steve O’Donnell, Keith Elphinston, Sophie Hovestrand and Amanda Lafford

Public Health Nutrition

Volume 23, 2020  ISSN: 1368–9800
Eighteen issues per year

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of original papers and reviews, and for discussions in the form of editorials, comments, and correspondence, with a specific focus on nutrition-related public health.

The scope of Public Health Nutrition encompasses nutrition and nutrition policy at a population level, including work on assessment of nutritional status and nutritional environments, communication of nutrition policy at a population level, including work on assessment, monitoring, and surveillance in population-based samples. It includes nutrition-related public health, diet, and nutritional factors as determinants of health outcomes.

Aims and Scope

- Build intelligence about the development, implementation, and evaluation of interventions and community nutrition programs and policies
- Describe, discuss, debate and influence nutrition-related public policies
- Build, develop and capacity for effective public health nutrition action, including work on social, developmental and environmental issues
- Develop perspectives and study diets and nutrition related to the environment and sustainability

We welcome papers that are innovative and contribute new knowledge to the literature. Papers will be succinct (is, usually well under 5000 words not including the abstract, references, tables, figures and acknowledgments). Short communications (<2000 words) are welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics for debates are also welcome. We publish special issues. Public Health Nutrition is available on the internet at: http://www.nutrition society.org

Contents:

- Original research findings and scientific reviews are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgments.
- Editorials express the opinion of the journal, as represented by its invited editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- Position papers, including declarations and other statements of policy, may be invited or submitted.
- Invited commentaries and book reviews are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- Letters to the Editors are usually in response to material published in Public Health Nutrition. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and review system. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phn. Please contact the editorial office on phn.official@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their contribution, relevance, and originality. Authors are asked to provide names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the ‘Licence to Publish’ (in lieu of copyright transfer), available at https://www.nutrition society.org. It is the author’s responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (http://www.nutrition society.org). Manuscripts should be clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to external editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests. The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:
1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (full postal address, telephone and fax numbers, and email address), and a running title up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. Abstract should be structured, using usually the following headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, Conclusion, and References), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concise, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. Acknowledgements (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided following the submission process, not as part of the manuscript.
5. References should be in Vancouver style. Please refer to the full Directions to Contributors.
6. Tables should be reduced to the simplest form and should not contain duplicate text. Any tables should be reduced to the simplest form and should not contain duplicate text. Any tables may be published online only.
7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise stated. The corresponding author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.
