

STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 11,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are shorter empirical studies motivated by a previously published study (not necessarily one published in *SSLA*). The background and motivation sections will necessarily be shorter compared to research articles as the maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 11,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Methods Forum. Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 11,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

Studies in Second Language Acquisition

Volume 44 Number 2 May 2022

INTRODUCTION

- Editor's Message*
Susan Gass 303–304

RESEARCH ARTICLES

- Sources of Variation in Second and Native Language Speaking Proficiency Among College-Aged Second Language Learners*
Mona Roxana Botezatu, Taomei Guo, Judith F. Kroll, Sarah Peterson,
and Dalia L. Garcia 305–330
- Representation and Processing of Overtly Identical Complex Forms in L1 and L2: The Case of Conversion and its "Siblings"*
Denisa Bordag and Andreas Opitz 331–356
- The Effects of Talker Variability and Frequency of Exposure on the Acquisition of Spoken Word Knowledge*
Takumi Uchihara, Stuart Webb, Kazuya Saito, and Pavel Trofimovich 357–380
- Working Memory Capacity and L2 Reading: A Meta-Analysis*
Yo In'nami, Yuko Hijikata, and Rie Koizumi 381–406
- Quantifying the Difference in Reading Fluency Between L1 and L2 Readers of English*
Kelly Nisbet, Raymond Bertram, Charlotte Erlinghagen, Aleks Pieczykolan,
and Victor Kuperman 407–434
- Voice Onset Time in Multilingual Speakers: Italian Heritage Speakers in Germany with L3 English*
Miriam Geiss, Sonja Gumbsheimer, Anika Lloyd-Smith, Svenja Schmid,
and Tanja Kupisch 435–459
- Phonological Processing of Stress By Native English Speakers Learning Spanish as a Second Language*
Ramsés Ortín and Miquel Simonet 460–482
- Examining the Relative Effects of Task Complexity and Cognitive Demands on Students' Writing in a Second Language*
Ting Sophia Xu, Lawrence Jun Zhang, and Janet S. Gaffney 483–506
- L2 Processing of Linguistic and Nonguistic Information: L2 Speakers Use Definiteness If Real-World Knowledge is Unusable*
Hyunah Ahn 507–535
- Massed Task Repetition is a Double-Edged Sword for Fluency Development: An EFL Classroom Study*
Yuichi Suzuki and Keiko Hanzawa 536–561

RESEARCH REPORT

- Prosodic Patterns in Sylheti-English Bilinguals*
Kathleen M. McCarthy and Esther de Leeuw 562–579

STATE OF THE SCHOLARSHIP

- Advancing the State of the Art in L2 Speech Perception-Production Research: Revisiting Theoretical Assumptions and Methodological Practices*
Charles L. Nagle and Melissa M. Baese-Berk 580–605

ADDENDUM

- Prosodic Patterns in Sylheti-English Bilinguals – Addendum*
Kathleen M. McCarthy and Esther de Leeuw 606
