Parasitology

Back volumes. Vols. 1–71: Inquiries should be addressed to Wm. Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Vols. 72 onwards: quotations for parts still in print may be obtained from Cambridge or the American Branch of Cambridge University Press.

Copying. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0031–1820/2019 $16.00.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service. 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Claims for missing issues can only be considered if made immediately after receipt of the subsequent issue.

Advertising. Details of advertising in Parasitology may be obtained from the publisher.

Online submission. Authors are encouraged to submit their manuscripts online. Go to http://mc.manuscriptcentral.com/par/ to open an author's account for Parasitology. Manuscript Central is helping to improve the speed of the publication process for the journal.

Front Cover illustration: The figure illustrates the complex network of interactions between members of the human mucosa microbiota that includes viruses, bacteria and microbial eukaryotes and how these may influence human health and disease status. Fluctuations in the taxonomic composition, biomass and qualitative and quantitative aspect of the microbial interactions, and in turn their interactions with the host mucosa, can lead to microbiota with eubiotic (associated with homeostatic - healthy - states) or dysbiotic (associated with pathologic states) characteristics.

CONTENTS

Mucosal microbial eukaryotes in health and disease

EDITORIAL
Mucosal microbial parasites/symbionts in health and disease: an integrative overview
Robert P. Hirt 1109

RESEARCH ARTICLE
Entamoeba histolytica infection in humans, chimpanzees and baboons in the Greater Gombe Ecosystem, Tanzania
Jessica R. Deere, Michele B. Parsons, Elizabeth V. Lonsdorf, Idli Lipende, Shadrack Kamanya, D. Anthony Collins, Dominic A. Travis and Thomas R. Gillespie 1116

Detection of potentially human infectious assemblages of Giardia duodenalis in fecal samples from beef and dairy cattle in Scotland
Paul M. Bartley, Beeke K. Rohe, Sarah Thomson, Hannah J. Shaw, Frederike Petto, Elisabeth A. Innes and Frank Katzer 1123

REVIEW ARTICLE
A clinical guideline on Dientamoeba fragilis infections
Rosanne SFE van Gestel, Johannes G Kusters and Jan F Monkelbaan 1131

SPECIAL ISSUE REVIEW
Cross talk between Entamoeba histolytica and the human intestinal tract during amoebiasis
Elisabeth Labruyère, Roman Thibeaux, Jean-Christophe Olivo-Marin and Nancy Guillén 1140

RESEARCH ARTICLE
Trichomonas vaginalis and Mycoplasma hominis: new tales of two old friends
Daniele Dessì, Valentina Margarita, Anna Rita Cocco, Alessandra Marongiu, Pier Luigi Fiori and Paola Rappelli 1150

RESEARCH ARTICLE
Glucose-restriction increases Trichomonas vaginalis cellular damage towards HeLa cells and proteolytic activity of cysteine proteinases (CPs), such as TvCP2
Jesús F. T. Miranda-Ozuna, Luis Alberto Rivera-Rivas, Rosa Elena Cárdenas-Guerra, Mar Sarai Hernández-García, Sarah Rodríguez-Cruz, Arturo González-Robles, Bibiana Chavez-Mungula and Rossana Arroyo 1156

SPECIAL ISSUE REVIEW
A review on metronidazole: an old warhorse in antimicrobial chemotherapy
David Leitsch 1167

RESEARCH ARTICLE
Anti-Trichomonas vaginalis activity of 1,10-phenanthroline-5,6-dione-based metallodrugs and synergistic effect with metronidazole
Graziela Vargas Rigo, Brenda Petro-Silveira, Michael Devereux, Malachy McCann, André Luis Souza dos Santos and Tiana Tasca 1179

Addressing the constraints of Trichomonas foetus sample collection in remote areas: lyophilized modified Diamond’s media as a substitute for liquid medium
Gemma Rush, Michael William Reynolds, Nichola Eliza Davies Calvani and Jan Šlapeta 1184

STANDARD RESEARCH ARTICLES
Effects of some natural products from fungal and herbal sources on Giardia lamblia in vivo
Aroona Chabra, Bahman Rahimi-Esboei, Emran Habibi, Tahe Monadi, Mohammad Azadbakht, Tahir Elmi, Hossein Keshavarz vallian, Javad Akhtari, Mahdi Fakhar and Farshad Naghshvar 1188

Prevalence and multilocus genotyping of potentially zoonotic Giardia duodenalis in pigs in Shanghai, China
Hua Liu, Ning Xu, Jianhai Yin, Zhongying Yuan, Yujuan Shen and Jianping Cao 1199

Zinc-clotrimazole complexes are effective against Trichomonas vaginalis
Victor Midlej, Felippe Rubim, Wilmer Vilameal, Érica S. Martins-Duarte, Marcelo Navarro, Wanderley de Souza and Marlene Benchimol 1206
