

## CORRIGENDUM

## REDUCTION OF BINARY CUBIC AND QUARTIC FORMS

(*LMS J. Comput. Math.* 2 (1999) 62–92)

J. E. CREMONA

*Abstract*

Corrigendum to Proposition 14, on page 87 of the paper ‘Reduction of binary cubic and quartic forms’, *LMS Journal of Computation and Mathematics*, Volume 2, pp. 62–92.

There is an error in the second displayed equation of Proposition 14, on page 87 of the paper ‘Reduction of binary cubic and quartic forms’.

Replace  $4(\phi^2 - 4I) - 27a^2$  inside the second square root by  $4(\phi^2 - I) - 27a^2$ . The equation now reads:

$$B_a = \frac{2}{3} \sqrt{\phi^2 - 4I} \sqrt{4(\phi^2 - I) - 27a^2}.$$
