Subscriptions may be sent to any bookseller or subscription agent or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Department, 40 West 20th Street, New York, NY 10011-4211. All orders must be accompanied by payment. The subscription price of volumes 106 and 107, 1993 is £225 (US $440 in the USA, Canada and Mexico), payable in advance, for ten parts plus supplements; separate parts cost £20 or US $40 each (plus postage). Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo. Second class postage paid at New York, NY and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to Parasitology, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573-9864.

Preface: Positive interactions between anti-infection drugs and the immune response: an emerging paradigm

List of contributions

Immunomodulatory agents in the laboratory and clinic

Introduction

Biologic response modifiers and the concept of adjuvants

Adjuvants of gram-negative origin

Development of LPS derivatives with reduced or non-pyrogenicity

Adjuvants of gram-positive origin

Other adjuvants

Cytokines

Interferon-gamma (IFN-γ)

Interleukin-1 (IL-1)

Interleukin-2 (IL-2)

Interleukin-3 (IL-3)

Interleukin-4 (IL-4)

Interleukin-5 (IL-5)

Interleukin-6 (IL-6)

Tumor necrosis factor alpha (TNF-α)

Granulocyte-macrophage colony stimulating factor (GM-CSF)

Mechanisms involved in non-specific pathogen destruction and/or inhibition

NO-mediated pathogen alteration

Oxidative burst

Inflammatory response

Immunosuppressive drugs

Cytotoxic agents (antimetabolites and alkylating agents)

Azathioprine (Aza)

RS-61443 and mycophenolic acid (MPA)

Bredinin (BR) = mizoribine

Brequinar sodium

Cyclophosphamide (Cy)

Methotrexate (MTX)

Corticosteroids

Deoxyspergualin

T-cell directed immunosuppressive drugs

Cyclosporin A and FK506

Rapamycin

Monoclonal antibodies

Anti-CD4

Anti-IL-2R

MAb against allelic MHC class II gene products

Anti-TCR

Anti-LFA-1 (anti-CD 11a) and anti-ICAM-1 (anti-CD54)

Cytokines as targets for mediators of immunosuppression

MHC blocking peptides

References

Cyclosporin A: antiparasite drug, modulator of the host-parasite relationship and immunosuppressant

Summary

Introduction

Protozoa

Antiprozoal activity of cyclosporin A

Immunomodulation of protozoan infections by cyclosporin A

Leishmaniasis

Trypanosomiasis

Giardiasis

Theileriosis

Combined antiprotozoal and immunomodulatory effects of cyclosporin A

Toxoplasmosis

Avian coccidiosis

Other microorganisms

Helminth infections

Anthemintic activity

Trematodes

Cestodes

Nematodes

Immunomodulatory activity of CsA in helminth infections

Combined immunomodulatory and antiparasitic activity of CsA

Cyclosporin-binding proteins and possible mode of anthemintic action

Conclusions

Acknowledgement

References

Immune-dependent chemotherapy of schistosomiasis

Summary

Introduction

Demonstration of the immune-dependence of chemotherapy using immunosuppressed mice

Praziquantel-induced exposure of surface antigens: an explanandum for immune-dependent chemotherapy

Praziquantel-exposed surface antigens

Diethylcarbamazine (DEC): immunopharmacological interactions of an anti-filarial drug S49
Summary S49
Diethylcarbamazine (DEC) and other anti-filarial drugs S49
DEC has an indirect mode of action on filarial parasites S50
The microfilaricidal effect of DEC is independent of a specific antibody response S51
The effect of DEC does not require complement S51
DEC effects on arachidonic acid metabolism may be the primary mode of action S52
DEC-mediated changes to vasculature S53
DEC promotion of host cell adhesion S54
DEC enhancement of platelet and granulocyte killing S54
Immunological side-effects of DEC administration S55
T-cell reactivity after chemotherapy S56
Conclusions S56
Acknowledgements S57
References S57

Malaria: drug use and the immune response S61
Introduction S61
Depression of leucocyte function by antimalarial drugs S61
Anti-drug antibody responses S62
Drug-induced antibody responses S62
Chemoprophylaxis and the immune responses to vaccines S63
Chemoprophylaxis and acquired immunity to malaria S63
Immune dependence of chemotherapy S65
Future considerations S67
