Research papers

A.N. Laws and A. Joern
Variable effects of dipteran parasitoids and management treatment on grasshopper fecundity in a tallgrass prairie

E.A. Böckmann, J. Tormos, F. Beitia and K. Fischer
Offspring production and self-superparasitism in the solitary ectoparasitoid Spalangia cameroni (Hymenoptera: Pteromalidae) in relation to host abundance

G.K. Mironidis and M. Savopoulou-Soultani
Effects of constant and changing temperature conditions on diapause induction in Helicoverpa armigera (Lepidoptera: Noctuidae)

F.N. Nyabuga, H.D. Loudale, D.G. Heckel and W.W. Weisser
Corollorynomic fine-tuning: evidence for genetic tracking between a specialist wasp parasitoid and its aphid host in a dual metapopulation interaction

Mating disruption by a synthetic sex pheromone in the white grub beetle Dasylepida ishigakiensis (Coleoptera: Scarabaeidae) in the laboratory and sugarcane fields

A. Beltrà, A. Soto and T. Malassa
Molecular and morphological characterisation of Pseudococcidae surveyed on crops and ornamental plants in Spain

Including climate change in pest risk assessment: the peach fruit fly, Bactrocera zonata (Diptera: Tephritidae)

Comparing the genetic structure of codling moth Cydia pomonella (L.) from Greece and France: long distance gene-flow in a sedentary pest species

A.D. Miller, P.A. Umina, A.R. Weeks and A.A. Hoffmann
Population genetics of the wheat curl mite (Aceria tosichella Keifer) in Australia: implications for the management of wheat pathogens

S. Boyer, H. Zhang and G. Lempérière
A review of control methods and resistance mechanisms in stored-product insects

M. Traugott, J.R. Bell, L. Raso, D. Sint and W.O.C. Symondson
Generalist predators disrupt parasitoid aphid control by direct and coincidental intraguild predation
The aims of Bulletin of Entomological Research are to further our global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. Bulletin publishes high-quality and original research papers, ‘critiques’ and review articles concerning insects, mites, ticks or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, veterinary, health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematics of individuals and populations. This includes the interactions between species (plants, host-parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. Bulletin does not publish the results of spray trials.

Bulletin of Entomological Research is published bimonthly by Cambridge University Press

NOTES FOR AUTHORS

Aims and Scope

The aims of Bulletin of Entomological Research are to further our global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. Bulletin publishes high-quality and original research papers, ‘critiques’ and review articles concerning insects, mites, ticks or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, veterinary, health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematics of individuals and populations. This includes the interactions between species (plants, host-parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. Bulletin does not publish the results of spray trials.

Bulletin of Entomological Research is published bimonthly by Cambridge University Press

Editor-in-Chief

Professor Bill Symondson
School of Bioscience, Cardiff University, Cardiff CF10 3TL, UK
Email: entomology@cardiff.ac.uk

Subject Editors

Dr O. Kwon, Kangnung National University, Korea
Professor H.D. Loxdale, Friedrich-Schiller University, Jena, Germany
Dr S. Morris, The Robert H. Smith Faculty of Agriculture, Food and Environment, Rehovot, Israel
Dr Liu Shu-Sheng, Zhejiang University, China
Dr G. Purvis, University College Dublin, Ireland
Philip C. Stevenson, Royal Botanic Gardens, Kew, UK
Dr A.J.A. Stewart, University of Sussex, Brighton, UK
Dr S.J. Torr, University of Greenwich, Kent, UK
Professor H. Townsend, Liverpool School of Tropical Medicine, Liverpool, UK
Dr M. Traugott, University of Innsbruck, Austria
Dr M. Vrints-Dobler, National Institute of Biology, Ljubljana, Slovenia
Dr J. Vontas, University of Crete, Greece
Professor L. Winder, UNITEC, Auckland, New Zealand
Dr B.A. Woodcock, University of Reading, UK

Styless of Paper

Bulletin of Entomological Research publishes two types of paper:

- Full research papers
- Reviews

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication. We also welcome ‘Letters to the Editor’ with comments on recently published papers.

Manuscript Preparation

Language

Manuscripts should be in English.

Manuscript content

Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

- The text, divided under appropriate headings. Clearly define the text into sections that are named appropriately. Each section should begin with an appropriately named subheading. Authors should be cited in chronological order as: (Blackman et al., 1996; Polaszek, 1996). Authors should be cited in chronological order and alphabetically within each year.
- The text should be numbered consecutively with Arabic numerals and every table should be mentioned at least once in the text.
- Illustrations should be submitted as separate files in TIF or EPS format but captions should be listed at the end of the manuscript text.

Abstract

Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running head.

References

References must be based on the name and year system, give full titles and be listed chronologically. Authors are invited to suggest the names and contact information of the referees.

Illustrations

Illustrations should be submitted as separate files in TIF or EPS format but captions should be listed at the end of the manuscript text.

Tables

Tables should be in a simple form and should not be used if text or illustrations give the same information. They can either be submitted as separate files (Microsoft Word or Excel) or embedded within the main manuscript file. Each table must have a clear and concise caption.

References

Technical and Nomenclature Standards

All work should follow ILS and Latin conventions. Taxonomic categories may be a mixture of the English vernacular and Latin, depending on current usage.

Copyright

Authors will be asked to sign a licence to publish form, which must be completed and returned to the Publisher. Papers may not be published elsewhere.

Proofs

Authors will receive PDF files of proofs by email, and will be asked to return corrected proofs within 72 hours.

Offprints

The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and should be ordered at proof stage.
Research Papers

A.N. Laws and A. Joern
Variable effects of dipteran parasitoids and management treatment on grasshopper fecundity in a tallgrass prairie

E.A. Böckmann, J. Tornos, F. Beitia and K. Fischer
Offspring production and self-superparasitism in the solitary ectoparasitoid Spalangia cameroni (Hymenoptera: Pteromalidae) in relation to host abundance
