INDEX.

PAGE

ALLARDICE, Professor.

On some systems of conics connected with the triangle, 40

BLICHFELDT, H. F.

Demonstrations of a pair of Theorems in Geometry, - 16

BURGESS, A. G.

Theorems in connection with lines drawn through a pair of points parallel and antiparallel to the sides of a triangle, - - . - - - 6

BUTTERS, J. W.

Notes on Decimal Coinage and Approximation, - - 50

CARSLAW, H. S.

Note on the Use of Fourier's Series in the Problem of the Transverse Vibrations of Strings, - - 23

Note on the Inequality Theorem that

$mx^{m-1}(x-1) > x^m - 1 > m(x-1)$ unless when $0 < m < 1$,

when $mx^{m-1}(x-1) < x^m - 1 < m(x-1)$,

where x is any positive quantity other than unity, 29

CRAWFORD, L.

A Proof of Rodrigues' Theorem

$$\sin nx = \frac{n}{1.3.5\ldots(2n-1)}\left(\frac{1}{\sin x}\frac{d}{dx}\right)^{n-1}\sin^{2n-1}x$$

and some Expansions derived from it, 11

Note on a Property of Circulating Decimals with an even number of Repeating Figures equivalent to a Vulgar Fraction with a Prime Number as Denominator, - 31

https://doi.org/10.1017/S0013091500032697 Published online by Cambridge University Press

PAGE

DISCUSSION on proposed improvements in the Teaching of Elementary Mathematics, - - - - 33, 34

GIBSON, Professor.

The Second Integral Theorem of Mean Value: a geometrical proof, - - - - - 2

MACKAY, J. S.

History of a theorem in Elementary Geometry, - 18

Note on the Theorems of Menelaus and Ceva, - - 35

MILLER, JAS. N.

On an instrument for trisecting any angle [Title], - 7

MUIR, T.

The applicability of the Law of Extensible Minors to determinants of special form, - - - 44

MUIRHEAD, R. F.

Note on the theory of the rolling of one rigid surface on another, - - - - - - 8

Notes on the Theorems of Menelaus and of Ceva, - 62

Constructions connected with Euclid VI., 3 and A, and the Circle of Apollonius, - - - - 67

Geometry of the Isosceles Trapezium and the Contra-parallelogram, with applications to the geometry of the Ellipse, - - - - - 70

OFFICE-BEARERS, - - - - - - 1

PEDDIE, W.

A Construction for the Force, at any Point, due to Electric Point-Charges or Ideal Magnets, with an Extension to Continuous Distributions, - - 73

TWEEDIE, C.

Anallagmatic Curves. I., - - - - 76
