CONTENTS

SURVEY PAPER
A systematic review of unsupervised approaches to grammar induction 647
Vigneshwaran Muralidaran, Irena Spasic and Dawn Knight

ARTICLES
Towards syntax-aware token embeddings 691
Diana Nicoleta Popa, Julien Perez, James Henderson and Eric Gaussier

Imparting interpretability to word embeddings while preserving semantic structure 721
Lütfi Kerem Şenel, İhsan Uluu, Furkan Şahinç, Haldun M. Ozaktas and Aşkut Koç

Improving speech emotion recognition based on acoustic words emotion dictionary 747
Wang Wei, Xinyi Cao, He Li, Lingjie Shen, Yaqin Feng and Paul A. Watters

EMERGING TRENDS
Emerging trends: A gentle introduction to fine-tuning 763
Kenneth Ward Church, Zeyu Chen and Yanjun Ma

The cover illustration is computer generated from an engraving of the Tower of Babel in an eighteenth-century bible.
Natural Language Engineering meets the needs of professionals and researchers working in all areas of automatic language processing, whether from the perspective of theoretical or corpus linguistics, translation, lexicography, computer science or engineering. Its aim is to bridge the gap between traditional computational linguistics research and the implementation of practical applications with potential real-world use. As well as publishing original research articles on a broad range of topics - from text analysis, machine translation, information retrieval, speech processing and generation to integrated systems and multi-modal interfaces - it also publishes special issues on specific natural language processing methods, tasks or applications. The journal welcomes survey papers describing the state of the art of a specific topic. The Journal of Natural Language Engineering also publishes the popular Industry Watch and Emerging Trends columns as well as book reviews.
