The Bologna Opoectodymus: A Rediscovered Case of Conjoined Twins
Francesco M. Galassi

Editor

Nicholas G. Martin
The official journal of the International Society for Twin Studies and the Human Genetics Society of Australasia

Instructions to Authors

Scope
Twin Research and Human Genetics is the official journal of the International Society for Twin Studies and the Human Genetics Society of Australasia. Twin Research and Human Genetics communicates the results of original research in human genetics with a special emphasis on multiple birth research. It also provides timely state-of-the-art reviews on all aspects of human genetics and twin studies.

Topics covered include: genetic epidemiology, behavioral genetics, epigenetics, general and craniofacial dysmorphology, fetal pathology, medical genetics, molecular genetics, radiation genetics and other areas of human genetics, with an emphasis on twin studies.

Editorial policy
All contributions and general correspondence regarding editorial matters should be addressed to the Editor and sent to the Editorial Office. Manuscripts submitted to the journal must represent original research. Manuscripts will be sent for anonymous review either by members of the editorial board, or by individuals of similar standing in the field. Authors are requested to submit up to three suggested reviewers for the manuscript. Authors will be notified of acceptance or rejection of manuscripts within 6 weeks. When a manuscript is returned to the corresponding author for revision, it should be returned to the Editors within 2 months, otherwise it may be returned without review. Accepted manuscripts will appear in the journal within 3 months, whenever possible.

Preparation of manuscripts
All manuscripts should be in English, prepared electronically in Word or WordPerfect. All sections of the manuscript should be double-spaced with one-inch margins on all four sides. Please submit manuscripts into the following sequence: Title page, Abstract, Introduction, Materials and methods, Results, Discussion, Acknowledgement, References. Tables should be self-contained and placed after the references. Figures should be submitted in editable format, preferably as PDF files. If they are not submitted as PDF files, the figure files should be prepared to the correct size (max. width 80 mm).

Illustrations, figures, photographs
Illustrations, figures, photographs and tables should be submitted in electronic format. Figures must be prepared according to the guidelines provided by the publisher. If an article has more than seven authors, the names of the first six authors followed by "et al." should be used. Abbreviations should be used consistently throughout the manuscript. Initials should not be used. Each author's initials and surname should be included on all pages of the manuscript, including department, institution, city with state/province/zip code and country.

Electronic submission
Manuscripts may be submitted electronically to the Editorial Office via the manuscript submission website at www.twinresearch-and-human-genetics.com. The manuscript must be submitted in Word format. The manuscript should be composed in 12-point Times New Roman with one inch margins on all four sides. The title page should be as brief as possible, not exceeding 1500 words. Details on preparation of illustrations, figures, photographs and tables are available on the ISTS website.

Discussion
The discussion should be as short as possible, not exceeding 200–250 words. The section should present the results in context, compare and contrast with other results, and highlight areas for future research.

Acknowledgement
Acknowledgements should be placed in a separate section and appear after the references.

References
References should follow the general format recommended by the Publication Manual of the American Psychological Association (6th ed.). In-text citations should include the author’s surname and complete address in English, including department, institution, city with state/province/zip code and country (indicating clearly which author is at address). A corresponding author should be indicated with telephone, fax numbers and e-mail address provided. Please provide a running title of not more than 50 characters.

Abstract
The second page of the manuscript should contain only an abstract or a single paragraph of not more than 200–250 words summarizing the contributions and reference citations should be avoided.

Introduction
The introduction should state that the reader is knowledgeable in the field and should therefore be as brief as possible, not exceeding 500 words. Do not use the heading ‘Introduction’.

References
References should be listed alphabetically, with each reference on a separate line.

Discussion
Discussions of topics within the scope of Twin Research and Human Genetics will be considered for publication after peer review. Please consult the Submission Guidelines page to ensure that your manuscript is suitable for the journal. When submitting your manuscript, please include a brief title and 200–250-word abstract.

Proofs
Proofs will be submitted to the authors for approval prior to publication. Minor changes to the proofs will be presented for approval. Authors should consider acceptance of the manuscript and receive the proofs in a timely manner. Authors will be asked to sign the publication form. Authors will receive a PDF of their article.
Covering all areas of human genetics with an emphasis on twin studies, genetic epidemiology, psychiatric and behavioral genetics, and research on multiple births in the fields of epidemiology, genetics, endocrinology, fetal pathology, obstetrics and pediatrics.

Twin Research and Human Genetics is published six times annually and issued to all financial ordinary, institutional and student members of ISTS and HGSA.

Copyright in all articles rests with authors. A limited set of permanent copyright permission licences has been granted by authors to the publisher to allow publication in this journal. Rights in the reproduction and distribution of the published articles as visual facsimiles of this published edition by either mechanical or digital means is controlled by the publisher and any distributions by CAL for copying of an author's work are due to the publisher in the first instance. All other rights in the words contained in this edition are controlled by the authors. Authors are therefore free to adapt and/or republish the words making up their own articles either online or in print.
