

THE JOURNAL OF NAVIGATION

Instructions for Contributors

The Journal of Navigation is an international journal publishing original work on the latest research developments and historical aspects of navigation on land, at sea and in the air; it also provides a forum for navigators, engineers and academics to raise more controversial topics for discussion.

SUBMISSIONS

The Editor encourages submissions to the *Journal* by an e-mail attachment, or on a CD, preferably using MS Word. Copies of illustrations/figures should be in colour and need to be to a high standard or provided as hard copy prints. If submission is by post as a hard copy manuscript then two copies (the original plus one), should be submitted to the Editor:

Alan Peacock MSc FRIN FNI
Editor
Royal Institute of Navigation,
1 Kensington Gore,
London
SW7 2AT

Or e-mail: editor@rin.org.uk
Tel: +44(0)20 7591 3133, Fax +44(0)20 7591 3131

Articles intended for consideration in the main section should be 4000–6000 words long. However the FORUM section exists for the expression of opinion, and allows authors to submit material which might not be appropriate for full length articles but which contains ideas worthy of publication and discussion (1500–2500 words). Authors are responsible for ensuring that all manuscripts (whether original or revised) are accurately typed before final submission. Manuscripts may be returned to the author with a set of instructions if they are submitted in a form substantially different to our style.

Contributions are normally received with the understanding that they comprise original, unpublished material and are not being submitted for publication elsewhere. Translated material, which has not been published in English, will also be considered. Most articles are refereed to ensure both accuracy and relevance, and amendments to the script may thus be required before final acceptance. On acceptance, contributions are subject to editorial amendment, but authors will receive proofs for approval before publication. Corrections can be returned by normal (or air) mail or fax/e-mail if these are minor amendments (see PROOFS).

PRESENTATION OF MANUSCRIPTS

Manuscripts should be typed single-sided and double-spaced, and conform as closely as possible to the *Journal* style. Every sheet should be numbered. Footnotes, abstract

and references should also be double-spaced. International Standard Size A4 paper is preferred with a left-hand margin of 40 mm.

Submission Format. When submitting papers in MS Word (The Journal's preferred medium) the following global settings should be applied:

- 1 'Language' should be set to English (UK).
- 2 Automatic 'numbering' of paragraphs, figures, tables etc should be switched OFF throughout the paper. Manual numbering should be input instead.

Arrangement of Papers. The layout of papers should be as follows:

- 1 Short title (up to 40 characters including spaces), subtitle (if desired), author's name, affiliation and e-mail address (if desired). Respective affiliations of co-authors should be clearly indicated.
- 2 Self-contained abstract of up to 100 words, outlining in a single paragraph the aims, scope and conclusions of the paper; key words (maximum four).
- 3 Main body of text, suitably divided either under numbered side headings with un-numbered and un-titled paragraphs, or numbered main paragraphs with titles containing related, numbered sub-paragraphs for which further headings are optional (i.e. paragraph numbering – 3., 3.1, 3.1.1 etc).
- 4 Acknowledgements (if any).
- 5 References.
- 6 Appendices if appropriate.
- 7 Originals of tables used in the text (each on a separate sheet).
- 8 Originals of illustrations used in the text (preferably with captions on a separate sheet or well separated from the illustration to enable scanning).

The text should be organised under appropriate side or main paragraph headings, which, ideally, should not be more than 500–600 words apart. If side headings are used, they should be in capitals and placed on the left-hand side at the start of the related text, with a double-line space above and below. If main paragraph headings are used, they should be in capitals and placed at the beginning of the paragraph text with a double-line space above; the first line of sub-paragraphs should be indented with titles in italics. Authors are urged to write as concisely as possible, but not at the expense of clarity. Descriptive or explanatory passages, necessary as information but which tend to break up the flow of text, should be put into appendices. Units, symbols and abbreviations should conform to the recommendations contained in the Royal Society publication *Quantities, Units and Symbols* (1975).

REFERENCES

For **The Journal of Navigation** the Harvard style system is the preferred reference system: authors' names (no initials) and dates (and specific pages, only in the case of quotations) are given in the main body of the text, e.g. (Kemp, 1998. P.29) or (Steele and White, 1996) or for more than two authors (Kemp et al., 1999). References should

be listed alphabetically at the end of the paper, double spaced and conform to current *Journal* style as below:

For The Journal

Rosenkrans, W. A. (1978). Aeronautical chart servicing. *The Journal of Navigation*, **31**, 39–51.

For other journals:

Smart, W. M. (1946). On a problem in navigation. *Monthly Notices of the Royal Astronomical Society*, **106**, 124–127.

For book

Skolnik, M. I. (1976). *Radar Systems*. McGraw-Hill, Inc.

For Proceedings

Helwig, A. W. S., Offermans, G. W. A. and van Willigen, D. (1996). Implementation and testing of Eurofix in standard Loran-C receiver technology. *Proceedings of the 25th Annual Technical Symposium of the International Loran Association*, San Diego, CA.

Other publications

Where there is doubt include all bibliographical details.

TABLES

Tables should be numbered consecutively in Arabic numerals and given a suitable caption. Notes and references within tables should be included with the tables, separately from the main text. Notes should be referred to by superscript letters. All table columns should have an explanatory heading. Tables should not repeat data available elsewhere in the article, e.g. in an illustration.

ILLUSTRATIONS

All graphs, diagrams and other drawings should be referred to as Figures, which should be numbered consecutively in Arabic numerals and good camera-ready copies provided on separate sheets at the end of the manuscript. Colour is welcomed for all Figures which should be accompanied by captions well separated from the illustration to enable scanning. Copies should also be included in the text or their required position clearly indicated. Photographs are welcomed, where they add materially to the text. Only the original need be submitted; it should be identified on a label (by number, article title and journal) on the back. Electronic figures are preferred as ‘tiff’ or ‘eps’ files at 300 dpi.

COPYRIGHT

By submitting an article for possible publication, authors are expected to agree to the ‘Transfer of Copyright’ should the article be selected for publication. This transfer enables Cambridge University Press (on behalf of The Royal Institute of Navigation)

to protect the copyrighted material for the authors, but does not relinquish the author's proprietary rights. The transfer of copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproduction of similar nature and translations, and includes the right to adapt the article for use in conjunction with computer systems and programs, including reproduction or publication in machine-readable form and incorporation in retrieval systems.

CHECKLIST

- Have you told readers, at the outset, what they might gain by reading your paper?
- Have you made the aim of your work clear?
- Have you explained the significance of your contribution?
- Have you set your work in the appropriate context by giving sufficient background (including relevant references) to your work?
- Have you addressed the question of practicality and usefulness?
- Have you identified future developments that may result from your work?
- Have you structured your paper in a clear and logical fashion?

PROOFS

One set of proofs will be sent by e-mail to the corresponding author before publication, which should be returned *promptly* to the Editor by e-mail if the proposed amendments are minor or by first-class mail (by Express Air Mail if outside the UK). The publishers reserve the right to charge for any amendments made at the proof stage (other than printers' errors) since the insertion or deletion of a single word may necessitate the resetting of whole paragraphs.

OFFPRINTS

A link to a PDF file of the final printed paper will be sent free of charge by e-mail to the corresponding author for their use.

THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication.

The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs) which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), eLORAN Group (eLORAN), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* four times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is co-ordinated with that of similar organizations in other countries.

Membership

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

THE JOURNAL OF NAVIGATION

VOLUME 65 NUMBER 2 APRIL 2012

CONTENTS

Collision Avoidance at Sea in the Mid-20th Century	191
<i>John Kemp (with contributions from Mike Bechley, Norman Cockcroft, Miroslaw Jurdzinski and Søren Thirslund)</i>	
Vessel Collision Frequency Estimation in the Singapore Strait	207
<i>Jinxian Weng, Qiang Meng and Xiaobo Qu</i>	
A Fast Multidimensional Scaling Filter for Vehicular Cooperative Positioning	223
<i>Mahmoud Efatmaneshnik, Nima Alam, Allison Kealy and Andrew G Dempster</i>	
A Novel Three Dimensional Movement Model for Pedestrian Navigation	245
<i>Mohammed Khider, Susanna Kaiser and Patrick Robertson</i>	
TelOpTrak: Heuristics-enhanced Indoor Location Tracking for Tele-operated Robots	265
<i>Johann Borenstein, Russ Miller and Adam Borrell</i>	
An Autopilot Based on a Local Control Network Design for an Unmanned Surface Vehicle	281
<i>SK Sharma, W Naeem and R Sutton</i>	
Satellite AIS – Developing Technology or Existing Capability?	303
<i>J. Carson-Jackson</i>	
Ship Recognition by Integration of SAR and AIS	323
<i>Sudhir Kumar Chaturvedi, Chan-Su Yang, Kazuo Ouchi and Palanisamy Shanmugam</i>	
Chinese Area Positioning System With Wide Area Augmentation	339
<i>Cheng Xuan, Li ZhiGang, Yang XuHai, Wu WenJun, Lei Hui and Feng ChuGang</i>	
High-Precision Navigation Approach of High-Orbit Spacecraft Based on Retransmission Communication Satellites	351
<i>Wen YongZhi, Zhang ZeJian and Wu Jie</i>	
Computational Efficiency Improvement for Unaided Weak GPS Signal Acquisition	363
<i>Wen Zhang and Mounir Ghogho</i>	
Instructions to Contributors	377
