Single Copies, Three Shillings.

ENTERED AT STATIONERS' HALL.

"We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions."—*British Medical Journal*, May 3, 1890.

LISTERINE

*A safe, non-poisonous, unirritating
antiseptic solution*

LISTERINE is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle, or douche, in catarrhal conditions of the nose and throat.

LISTERINE in proper dilution may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

LISTERINE embodies a two-fold antiseptic effect, in that after the evaporation of its volatile constituents—thyme, eucalyptus, mentha, gaultheria, and ethyl alcohol—a film of boracic and benzoic acids remains upon the surface to which Listerine has been applied, affording more prolonged antiseptic protection.

LISTERINE is a trustworthy surgical dressing; it has no injurious effect upon the tissues in which the healing process is going on.

LISTERINE in teaspoonful doses will often afford relief in fermentative dyspepsia, and is largely prescribed, with excellent results, in the various forms of diarrhœa occurring in infants and adults.

LISTERINE literature, including special pamphlets upon *Respiratory Diseases*, may be had, by physicians, upon application to

DR. JOHN J. KYLE.	DR. DOUGLAS GUTHRIE.	DR. NEIL MACLAY.

Medication by Spray.

**ADRENALIN INHALANT
(P., D. & Co.)**

A 1:1000 solution of Adrenalin Chloride with 3 per cent. of Chloretone, which forms a soothing and antiseptic astringent spray valuable in acute nasal catarrh, hay fever, rhinitis, tonsillitis, pharyngitis, etc.

**THE "GLASEPTIC"
NEBULISER.**

An exceptionally effective appliance for the medication of the respiratory passages. Delivers an extremely fine nebula; does not readily get out of order.

The throat tube shown in the illustration is only sent when specially ordered.

A modified pattern (for carrying in the pocket) is also supplied.

**CHLORETONE INHALANT
(P., D. & Co.)**

A 1 per cent. solution of Chloretone in liquid petrolatum, with camphor, menthol and oil of cinnamon, whose antiseptic and local analgesic properties are very effective in nasal catarrh, asthma, bronchitis, pertussis, laryngitis, etc.

**COMPRESSED TABLET,
NASAL (P., D. & Co., No. 34).**

Sodium Bicarbonate	5 grains.
Sodium Borate ..	5 grains.
Sodium Chloride ..	5 grains.
Sodium Benzoate ..	7.24 grain.
Sodium Salicylate	7.24 grain.
Thymol	7.48 grain.
Menthol	7.96 grain.
Oil of Eucalyptus ..	7.48 minim.
Oil of Gaultheria ..	7.96 minim.

For use as a nasal douche or spray, powder one tablet and dissolve in four ounces of warm water.

MARGUERITE WILSON, M.B., CH.B., Glasgow.

THIS year's volume aims, like its predecessors, to be a faithful reflex of current Medical and Surgical thought. It is, therefore, of necessity coloured by the consideration of the many new problems which are thrust upon us by the War. These problems will confront the general Practitioner on every hand, and he must be prepared to deal with them.

Hence the current volume has a unique value, in that it furnishes the reader with a careful review of the latest achievements in War Surgery and Medicine, which will be of value now and in the years to come, and which cannot be obtained from any other source.

The civil side of the Practitioner's work has, of course, not been neglected.

The new "Annual" continues to be, as in the past, a digest of the best modern teaching culled by experts from the medical literature of the world.
