

Canton for the summer vacation and keep in close touch with the Bureau.

He was a fellow of the Entomological Society of London, a member of the American Association for the Advancement of Science, the Entomological Society of America, the South African Association for the Advancement of Science, the Royal Society of South Africa and other scientific societies. He was a member of the Pan African Trypanosomias Commission and of the First International Congress of Entomology, held in Brussels in 1909. He was to have been chairman of the sericultural section of the Fifth Congress, meeting in August of this year in Ithaca.

To Professor Howard science offered first of all a field for service. Wherever he worked his interest in the human element was paramount. The result was that as a teacher and administrator he had the love and loyalty of his students and his associates. But, withal, he had a very genuine ability for research of a high order and in spite of his manifold duties in public service he had published numerous papers dealing with ticks, tsetse flies, mosquitoes and other blood-sucking arthropods. His studies on the chiggers of Minnesota constituted the first detailed work on these forms in this country.—W. A. RILEY.

A CORRECTION

BY GEO. R. HOPPING.

In the Canadian Entomologist for September 1927, p. 201, through a mistake of the author of the article, the generic name was misspelled *Trachychele*. It should have been *Trachykele*.

Mailed Saturday, April 28th, 1928.
