Experimental Agriculture publishes the results of experimental work in animal and crop husbandry, with an emphasis on research carried out in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries where agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

Each annual volume comprises four parts (published in January, April, July and October) plus an index.

Subscriptions may be sent to any bookseller or subscription agent or direct to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1. Subscriptions in the U.S.A. and Canada should be sent to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is 75s. net (including postage) for an annual volume (\$13.50 in the U.S.A.), payable in advance; separate parts cost 25s. net or \$4.50 each (plus postage).

Back Volumes. Inquiries for Vols. 1-32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, 16 West Street, Farnham, Surrey. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of the Cambridge University Press.

NOTES FOR CONTRIBUTORS

Contributions will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, Orchard House, Long Ashton, Bristol.

Conditions of acceptance. Submission of a paper will

be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

General lay-out. Before having their manuscripts typed contributors are asked to look carefully at the lay-out of

TROPICAL AGRICULTURE

THE JOURNAL OF THE
IMPERIAL COLLEGE OF TROPICAL AGRICULTURE

and

FACULTY OF AGRICULTURE
UNIVERSITY COLLEGE OF THE WEST INDIES

*General Editor: H. K. ASHBY, M.A., DIP. AGRIC., A.I.C.T.A.
7 Linton Road, Oxford*

Published quarterly during January, April, July and October, TROPICAL AGRICULTURE serves ninety countries and holds the unique position of being the only journal, printed in English, which is devoted solely to agriculture within the tropical zone. Readership of the journal consists mainly of government departments, plantation managers and private farmers, and here it is of interest to note that in colonial countries government departments are heavy buyers of agricultural machinery, implements, fertilizers, insecticides and other requisites of tropical farming for experimental programmes and development schemes.

Annual Subscription £3 10s. (\$10.00) post free
Single issues 17s. 6d. post free

AGRONOMY JOURNAL

This bimonthly publication, the official organ of the American Society of Agronomy, is respected throughout the world for its technical reports on basic and applied research in crop and soil science. Articles in past issues contributed information on the importance of soil aeration, moisture content, and root-zone temperature to the growth, development, and survival of forage crops; improved methods for determining seeding rates; techniques for estimating sugar quantities in plant extracts; a computer program for estimating parameters; and the effects of fertilizers and irrigation on crop yield, composition, and quality. *Publication is open to Society members.*

THE ANNALS OF APPLIED BIOLOGY

INDEX TO VOLUMES 1-50

This work provides separate author and subject indexes to the first fifty volumes of the *Annals of Applied Biology* (1914-1962) 240 pages long, it contains references to more than 2,500 papers. It will be an invaluable tool for all applied biologists.
40s. net (U.S.A. \$6.00)

Orders should be sent to your usual bookseller or subscription agent, or direct to Cambridge University Press, Bentley House, 200 Euston Road, London N.W.1; orders in the United States and Canada should be sent to Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022, U.S.A.

THE ANNALS OF APPLIED BIOLOGY

Contents of Volume 59, No. 2, April 1967

Some aspects of the wheat bulb fly problem. By F. RAW.

The nature and causes of annual fluctuations in numbers of *Aphis fabae* Scop. on field beans (*Vicia faba*). By M. J. WAY. Intra-specific mechanisms in relation to the natural regulation of numbers of *Aphis fabae* Scop. By M. J. WAY and C. J. BANKS.

The effects of different aphid foods on *Adalia bipunctata* L. and *Coccinella 7-punctata* L. By R. L. BLACKMAN.

Factors affecting the toxicity of diazinon to *Musca domestica* L. by MARIA GWIAZDA and K. A. LORD.

Studies on the fungitoxicity of captan. V. Electron microscopy of captan-treated *Neurospora crassa* conidia. By D. V. RICHMOND, E. SOMERS and P. F. MILLINGTON.

Glasshouse experiments on apple scab. III. Fungicide mixtures, curative translocation, and the influence of mildew. By M. H. MOORE.

The role of water in the spread of *Phytophthora infestans* in the potato crop. By J. LACEY.

Susceptibility of potato tubers to infection by *Phytophthora infestans*. By J. LACEY.

Verticillium wilt of the hop: field studies on wilt in a resistant cultivar in relation to nitrogen fertilizer applications. By G. W. F. SEWELL and J. F. WILSON.

The multiplication of *Longidorus elongatus* (de Man) on different host plants with reference to virus transmission. By C. E. TAYLOR.

Soil leachings and the hatching of larvae of the potato-root eelworm, *Heterodera rostochiensis* Wollenweber. By C. ELLENBY and L. SMITH.

Studies on pollination and fertilization in the field bean (*Vicia faba* L.). By A. S. HANNA and D. A. LAWES.

Effects of shading on inflorescence size and development in temperate perennial grasses. By G. J. A. RYLE.

Proceedings of the Association of Applied Biologists:

Symposium on Productivity in Cereals.

Reviews

Subscription price 75s per volume (2 volumes of 3 parts a year). Orders may be sent to your bookseller or direct to CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1.

The Journal of AGRICULTURAL SCIENCE

(Established 1905)

Edited by G. D. H. Bell, K. L. Blaxter, G. W. Cooke, John Hammond, Jr.,
Prof. Sir J. B. Hutchinson, H. L. Penman, H. H. Rogers,
E. W. Russell and F. Yates

Contents of Volume 68, No. 3, June 1967

- L'ESTRANGE, J. L., OWEN, J. B. and WILMAN, D. The relationship between the serum magnesium concentration of grazing ewes and their dry matter intake and milk yield.
- L'ESTRANGE, J. L., OWEN, J. B. and WILMAN, D. Effects of a high level of nitrogenous fertilizer and date of cutting on the availability of the magnesium and calcium of herbage to sheep.
- BOND, D. A. Combining ability of winter bean (*Vicia faba* L.) inbreds
- RUSSEL, A. J. F. and BARTON, R. A. Bone-muscle relationships in lamb and mutton carcasses
- FORBES, J. M. Factors affecting the gestation length in sheep.
- CARE, A. D., VOWLES, L. E., MANN, S. O. and ROSS, D. B. Factors affecting magnesium absorption in relation to the aetiology of acute hypomagnesaemia.
- TINKER, P. B. H. The effects of magnesium sulphate on sugar-beet yield and its interactions with other fertilizers.
- ARNOLD, G. W. and DUDZINSKI, M. L. Comparison of faecal nitrogen regressions and *in vitro* estimates of diet digestibility for estimating the consumption of herbage by grazing animals.
- SHORLAND, F. B., CZOCHANSKA, Z., BARTON, R. A. and RAE, A. L. A comparison between the effects of ryegrass and white clover on the iodine values and melting points of some depot fats of sheep.
- KUBOTA, T. and WILLIAMS, R. J. B. The effects of changes in soil compaction and porosity on germination, establishment and yield of barley and globe beet.
- ENGLAND, F. Non-sward densities for the assessment of yield in Italian ryegrass. I. Comparison between sward and non-sward densities.
- BOND, D. A. and HAWKINS, R. P. Behaviour of bees visiting male-sterile field beans (*Vicia faba*).
- REID, D. Studies on the cutting management of grass-clover swards. V. The effect of changes in the closeness of cutting at different times in the season on the yield and quality of herbage from a perennial ryegrass-white clover sward.
- BURHAN, H. O. and MANSI, M. G. Rotation responses of cotton in the Sudan Gezira. I. The effect of crop rotation on cotton yields.
- MANSTON, R. The influence of dietary calcium and phosphorus concentration on their absorption in the cow.
- LAWRENCE, T. L. J. High level cereal diets for the growing/finishing pig. I. The effect of cereal preparation and water level on the performance of pigs fed diets containing high levels of wheat.
- HANBURY, L. F. and MAUGHAN, G. L. An investigation into the spacing of monogerm sugar beet seed in the development of the spring mechanization of the crop.
- GARWOOD, E. A. and WILLIAMS, T. E. Soil water use and growth of a grass sward.
- WIDDOWSON, F. V., PENNY, A. and WILLIAMS, R. J. B. Results of an experiment at Woburn testing farmyard manure and N, P and K fertilizers on five arable crops and on a long ley. II. N, P and K removed by the crops.
- TUMA, H. J., DINKEL, C. A., MINYARD, J. A. and BREIDENSTEIN, B. C. Methods of predicting kilograms of retail cuts in the beef carcass.

*Issued at two-monthly intervals in parts of about 136 pages with plates
and figures, three parts constituting a volume, 2 volumes yearly
Subscription price 75s. per volume. Single parts 35s. net*

ANIMAL PRODUCTION

Journal of the British Society of Animal Production

Contents of Volume 9, Part 3, August 1967

INCLUDE

- DONEY. The effect of inbreeding on feed consumption and utilization by sheep.
- HODGSON and WILKINSON. The relationship between live-weight and herbage intake in grazing cattle.
- O'CONNOR and WILLIS. The effect of artificial insemination on the breed structure of British Friesian cattle.
- SMITH. Improvement of metric traits through specific genetic loci.
- LANGLANDS. Studies on the nutritive value of the diet selected by grazing sheep. III. A comparison of oesophageal fistula and faecal index techniques for the indirect estimation of digestibility.
- FORBES, REES and BOAZ. Silage as a feed for pregnant ewes.
- TAYLOR and YOUNG. Variation in growth and efficiency in twin cattle on constant feeding levels.
- PERRY and WATSON. Sources of variation in the uptake of a marker antibody by piglets.
- PERRY and WATSON. Variation in the absorption of a colostrally secreted marker antibody in piglets.
- DONEY and GRIFFITHS. Wool growth regulation by local skin cooling.
- SLEE and SYKES. Acclimatization of Scottish Blackface sheep to cold temperatures. 1. Rectal temperature responses.
- HOLMES and CURRAN. Feed intake of grazing cattle. V. A further study of the influence of pasture restriction combined with supplementary feeding on production per animal and per acre.

The Journal is published quarterly in February, May, August and November.

The annual subscription rate is 90s. (U.S.A. \$14.00) single copy 25s. (U.S.A. \$4.00). Orders and subscriptions may be sent to any Bookseller or direct to:

JOURNAL OF THE BRITISH GRASSLAND SOCIETY

This Journal is a medium for the publication of the results of research and practical experience in the realm of grassland husbandry.

EDITOR: A. G. G. HILL

Contents of Volume 22, No. 1, March 1967

PRESIDENTIAL ADDRESS. *Dr. H. K. Baker.*

X INTERNATIONAL GRASSLAND CONGRESS, HELSINKI

REVIEW OF SECTION 1—GRASSLAND PRODUCTION. *J. G. Elliott.*

REVIEW OF SECTION 2—GRASSLAND UTILIZATION. *J. F. D. Greenhalgh.*

REVIEW OF SECTION 3—HERBAGE PLANT BREEDING AND SEED PRODUCTION. *D. J. Griffiths.*

REVIEW OF SECTION 4—IMPROVEMENT OF GRASS PRODUCTION AND UTILIZATION ON NATURAL GRASSLAND IN DIFFERENT CLIMATES. *John Eadie.*

THE RESIDUAL VALUE OVER THIRTEEN YEARS OF ROCK PHOSPHATE AND SUPERPHOSPHATE ON A PERMANENT GRASS SWARD. *G. H. A. Edwards.*

THE EFFECT OF CUTTING AND NITROGEN TREATMENTS ON YIELD, PROTEIN CONTENT AND CERTAIN MORPHOLOGICAL CHARACTERISTICS OF TIMOTHY AND SMOOTH BROMEGRASS. *H. J. Knutti and M. Hidioglou.*

THE EFFECT OF SEVERITY OF DEFOLIATION AND NITROGEN FERTILIZER ON THE GROWTH OF *Phalaris tuberosa* L. *S. G. Grimmett.*

THE ALTITUDINAL ZONING OF GRASSLAND AND SOILS ON THE BRECON BEACONS IN SOUTH WALES. *C. B. Crampton and R. Garrett Jones.*

A COMPARISON OF THE REACTION OF DIFFERENT GRASS SPECIES TO FERTILIZER NITROGEN AND TO GROWTH IN ASSOCIATION WITH WHITE CLOVER. II. YIELD OF NITROGEN. *D. W. Cowling and D. R. Lockyer.*

THE USE OF HERBICIDES IN WHITE CLOVER SEED CROPS. *A. Zaleski.*

THE USE OF GRASS PRODUCTS FOR DAIRY COWS IN MECHANIZED SYSTEMS. *A. S. Foot.*

CONSERVED GRASS FOR WINTER FEEDING. *P. J. Jones.*

GRASSLAND SYSTEMS. *W. Holmes and G. Allanson.*

GRASS, COWS, MILK AND MONEY. *John Hodges and Norman Coward.*

Published quarterly. The annual subscription is 60s. or \$8.40, post free. Back numbers are still available, at the following prices; Volume 1, 20s. or \$2.80; volumes 2-17, 40s. or \$5.60 each; volumes 18 onwards, 60s. or \$8.40.

Orders to: The Secretary, British Grassland Society, Grassland Research Institute, Hurley, Berkshire, England.
