Aims and Scope
Established in 1910, the internationally recognised Bulletin of Entomological Research aims to further global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. The Bulletin publishes high quality and original research papers, critiques and reviews articles concerning insects or other economic and important components in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the biology, ecology, behaviour, physiology and systematic of individuals and populations, with a particular emphasis upon the major current and emerging pests of agriculture, horticulture and forestry, and vectors of human and animal diseases. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole ecosystems), novel methodological developments, including molecular biology, in an applied context. The Bulletin does not publish the results of pesticide testing or traditional taxonomic revisions.

Bulletin of Entomological Research is published bimonthly by Cambridge University Press

Research Papers

X. Zhang, T. Pengpakul, M. Tokays, L. Yu, W. Fang and D. Luo
Host-location behavior of the tea green leafhopper Empoasca vitis Göthe (Hemiptera: Cicadellidae): olfactory and visual effects on their orientation 435

P. Remposoulakis, S. Sela (Sadigver), E. Nenay-Lary, R. Pinto, A. Birke and D. Nestel
Microbial composition affects the performance of an artificial diet for the larval mealworm 438

N. Gunanithika, R. Tanahatn, L. Udayanga, A. Wijegunawardena and W. Abeyewickreme
Oviposition preferences of Aedes aegypti and Aedes albopictus in Sri Lanka under laboratory settings 442

M.D. Cooling, B.D. Hoffmann, M.A.M. Grobler and P.J. Lester
Indirect evidence of pathogen-associated altered oocyte production in queens of the invasive yellow crazy ant, Anoplolepis gracilipes, in Australia 446

J. Proll, E. Tadeo, R. Costa and M. Aloe
The effect of water length on duration of dormancy and survival of specialized herbivores Rhagoletis fruit flies from high elevation environments with cyclic climatic variability 448

M. Matsukawa, Mihako Tanaki, Kanzo Koi, Kazumi Taira, Hidetoshi Konishi and Toshihara Tanaka
Regional population differences of the brown计划 (Didelphias argenteus) in Cambodia using genotyping-by-sequencing 471

Sulfur fertilization increases defense metabolites and nitrogen but decreases plant resistance against a host-specific insect 479

J. Buzupal, M. Meus and S.G. Goto
Cold acclimation increases cold tolerance independently of diapause programing in the bean bug, Rhizopogon pedestris 487

I. Kat, A. Jadsen, Y. Matza, F. Kuru and E. Zlotek
Biochemical responses induced in guts of three Cynipidae species in oak trees 494

A. Sharifloo, A. Zaba, J. Jialal, S. Kandi and K. Taleb Jirousami
Biochemical characterization of a digestive trypsin in the midgut of large cabbage white butterfly, Pieris brassicae (Lepidoptera: Pieridae) 501

Molecular cloning of heat shock protein 10 (Hsp10) and 60 (Hsp60) cDNAs from Galeruca daurica (Coleoptera: Chrysomelidae) and their expression analysis 510

V. Schichlina, M. Dedeleine, M. Mantovani and A. Luchetti
Molecular systematic, biogeography, and colony formation in the European red wood termite Kalotermes spp. (Blattodea, Termesinae, Kalotermitidae) 523

A.M. Gáratea, P. Gallardo and D. Toledo
Suitability of multiple Mediterranean oak species as a food source for the Mediterranean fruit pest Dactylopius (Diptera: Helioctenidae) 532

Biology of two larval morphological phenotypes of Aedes aegypti in Abidjan, Côte d’Ivoire 540

Assessing resistance of sugarcane varieties to sugarcane borer Diatraena saccharicola Fab. (Lepidoptera: Graminidae) 547

C.G. Melo, A.C. Tumaz, B.O. Soares, K.N. Kuki, L.A. Pereira and M.H. Barbosa
Anatomical, morphological, and physiological responses of two sugarcane genotypes of contrasting susceptibility to Mahanarva fimbriolata (Heteroptera: Cicadellidae) 556
