CONTENTS

A spectrum of series–parallel graphs with multiple edge evolution
Hosam M. Mahmoud 487

Winner Plays Structure in Random Knockout Tournaments
Yang Cao and Sheldon M. Ross 500

The degree profile and Gini index of random caterpillar trees
Panpan Zhang and Dipak K. Dey 511

On deterministic finite state machines in random environments
Joel Ratsaby 528

On optimal heterogeneous components grouping in series–parallel and
parallel–series systems
Xiaoliang Ling, Yinzhao Wei and Pung Li 564

A Note on Rényi's Entropy Rate for Time-inhomogeneous Markov Chains
Wenxi Li and Zhongzhi Wang 579

On Bouncing Geometric Brownian Motions
Xin Liu, Vidyadhar G. Kulkarni and Qi Gong 591

Inequalities for the dependent Gaussian noise channels based on Fisher
information and copulas
Fatemeh Asgari, Mohammad Hossein Alamatsaz and Nayereh Bagheri Khoolenjani 618

Probability in the Engineering and Informational Sciences

Volume 33 | 2019 Number 4

Pages 487–657 PROBABILITY in the ENGINEERING and INFORMATIONAL SCIENCES

PROBABILITY IN THE ENGINEERING AND INFORMATIONAL SCIENCES

INSTRUCTIONS FOR CONTRIBUTORS

CONTRIBUTIONS: Contributions are welcomed from all countries and must be written in English. Cambridge recommends that authors have their manuscripts checked by an English language native speaker before submission; the cost of such services is at the author’s expense. Submission must be accompanied by a letter signed by all authors (in the case of Ph.D. theses, a letter from the current supervisor is required). Authors are responsible for ensuring the correctness of their contributions. Cambridge recommends that authors have their manuscripts checked by an English language native speaker before submission; the cost of such services is at the author’s expense.

SHORT MANUSCRIPTS: Please note - we are no longer accepting submissions via e-mail. All submissions to the journal should be made electronically through ScholarOne Manuscripts at http://mc.manuscriptcentral.com/probabilityengineering. Authors are asked to submit a new account by clicking on “Register here.” Once logged in, authors can access “New Submissions” from which a new submission can be submitted, with step-by-step instructions provided. When your submission is complete you will receive an email confirmation.

Submitted manuscripts are first sent to the Editor who will determine the suitability of the paper for the journal. The Editor is authorized to render an immediate “reject” decision on manuscripts without review should they deem them unsuitable or inappropriate.

After a submission is approved, a peer review process will be initiated. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published, nor is presently submitted elsewhere. While under editorial review, it is the responsibility of the author to keep the Editor informed about submissions, publication plans, and actual publication of related research or abstract thereof in other outlets, including journals, review publications, journals in other disciplines, conference proceedings, and published dissertations. It is also understood that all persons named as authors have given their approval for the submission of the paper and that any person cited as a source of personal communication has given the author’s last name and the reference number in brackets. For the author’s last name and the reference number in brackets, written authorization may be required at the Editor’s discretion. An author is also required to obtain written permission for material for which he/she does own copyright.

After an editorial decision is made, an email containing the comments from the reviewers and the Editor will be sent to the author. The decision email is also accessible at the “Author Center” of the online system.

Authors submitting their work in LaTeX should upload a single PDF document for the peer review process. If your paper has been (continuously) accepted you will be asked to upload your LaTeX source file along with individual figures files and a PDF of the final version of your manuscript for production purposes.

In case of any difficulties submitting your work through ScholarOne please contact editorial@cambridge.org.

MANUSCRIPT ORDER: Manuscripts submitted in LaTeX should be arranged as follows (stated items are optional):

1. Abstract
2. Text (with tables, figures and captions embedded)
3. Acknowledgements
4. References
5. Appendixes

Manuscripts submitted in Word should be arranged as follows (stated items are optional):

1. Abstract
2. Text
3. Acknowledgements
4. References
5. Figures with captions

PREPARATION OF MANUSCRIPT: Manuscript pages should be numbered consecutively. All papers must include an abstract of 100 words maximum. Contact your nearest Cambridge University Press office for the latest instructions for author(s) at: 020-8946-1533. Printed in the United States of America.

REFERENCES:

5. Smith and Wollensky [4] have ascertained that the stress factor on the metal wave varies with the amount of heavy metal into said metal composition. According to Bishop et al. [1], this variance takes on an exponential factor yet unlike that shown in the Mathew’s Variable Rate Differential (see Mathew [3], p. 110).
6. Wing stress tests conducted by the Max Ensminger Laboratory [2] have verified such findings.

FOOTNOTES: When more than a simple reference citation is needed, notes may be used. In general, however, they should be avoided.

COPYRIGHT ASSIGNMENT: Authors are required to transfer their copyright, on certain conditions, to Cambridge University Press.
