Public Health Nutrition
Volume 22, 2019 ISSN: 1368–9800
Eighteen issues per year

Aims and Scope

• Build evidence about the development, implementation, and evaluation of interventional and community nutrition programs and policies.

• Describe, discuss, debrief and influence nutrition-related public policies.

• Create a build capacity for effective public health action nutrition, including workforce development and educational issues.

• Develop perspectives and models to study diets and nutrition as related to the environment and sustainability.

We publish papers that are innovative and contribute new knowledge to the literature. Papers should be succinct (ie, usually well under 5000 words not including the abstract, references, tables, figures and acknowledgement). Short communications (<2000 words) are welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics for debate are also welcome. We publish special issues.

Public Health Nutrition is available on the internet at journals.cambridge.org/phn

Dr. Matthew Santer, University of Dusseldorf, Germany
Dr. Clementa Sason, University of Florida, USA
Dr. Ivan Sanz, University of Alcalà, Spain
Dr. Francisco Sanchez, University of Athens, Greece

Preparation of manuscripts:

6. Authors are requested to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews) should be divided under headings (typically to include name, role, and institution). Each author should be credited according to the nature of the contribution of each author to the manuscript. If the manuscript is prepared by a team, the corresponding author should explain the role of each team member and should not include it as part of the manuscript to allow for an objective evaluation.

7. The submission must include a statement within an email that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the ‘Licence to Publish (in lieu of copyright transfer)’ available at http://www.nutritionsociety.org.uk. It is the author’s responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (http://www.nutritionsociety.org). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests. The submission includes a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature and extent of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.

2. Abstract should be structured, usually following the internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.

3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, Conclusion, Appendices), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are credible, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.

4. Acknowledgements (sources of funding, competing interests, declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.

5. References should be in Vancouver style. Please refer to the full Directions to Contributors on our website (http://www.nutritionsociety.org.uk).

6. Tables should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables should be published online.

7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs are returned promptly. Authors may be charged for any alterations in excess of 15% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.
