FIND THE MICROBE THAT COULD COST THIS PATIENT HER LIFE.

80% of the bacteria that cause infections reside in the first five layers of the patient's own skin! That's why there's ChloraPrep®. ChloraPrep combines the CDC-recommended formulation of 2% CHG with innovative, "hands-off" applicators to provide a more effective system for helping reduce infections associated with skin bacteria. ChloraPrep is fast-acting on a broad spectrum of bacteria, including MRSA, and inhibits bacterial growth for at least 48 hours.^{2,3} **Help stop infection from the start with ChloraPrep.**

- **PERSISTENT** antimicrobial activity inhibits the growth of bacteria for at least 48 hours^{2,3}
- **PROVEN** in 33 published studies as best practice for helping reduce the risk of infection
- **RECOMMENDED** use of 2% CHG formulation in at least 10 evidence-based guidelines, including the CDC, SCAI and IHI
