DIRECTOR, INFECTION CONTROL

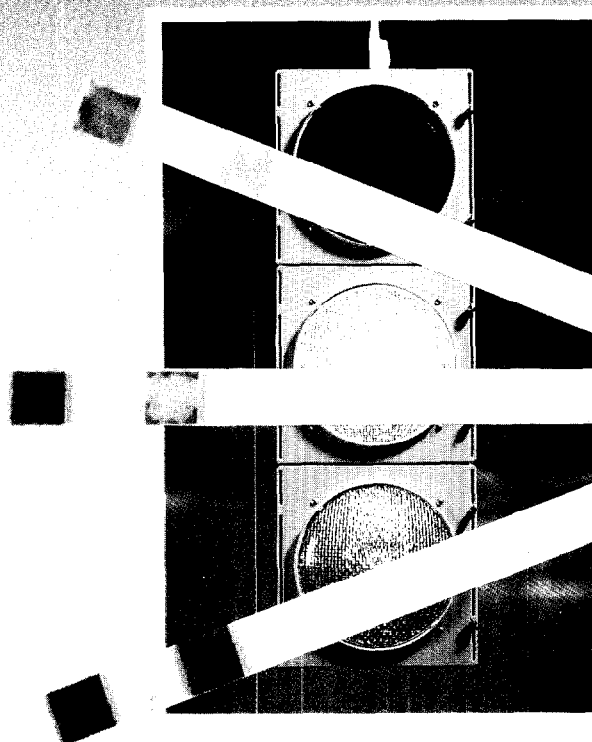

High-level excellence in patient care, medical education and research reflects the leadership of 970-bed Summa Health System. Comprised of two major hospitals and several satellite facilities, we are among Ohio's foremost care providers. Currently, we seek the proven professional who will coordinate, guide and develop a system-wide Infection Control and Prevention Program.

Broad program responsibility includes monitoring patient populations • overseeing Infection Control Practitioners • preparing and presenting statistical reports • interfacing with our Infection Control Committee • directing the inservicing of all departments • and more. This key position acts as our primary infection control resource and acts autonomously in initiating problem solving.

Requirements include current Ohio RN license plus a master's degree in nursing, public health (epidemiology) or the equivalent. APIC certification also essential as are 3 years experience in nursing, public health or epidemiology. Previous experience as an Infection Control Practitioner is a must. Knowledge of related computer systems, microbiology plus regulatory standards/requirements essential. We offer attractive salary, benefits and development. For

DisIntek™ Reagent Strips

for determination
of effective levels of
GLUTARALDEHYDE in
high level disinfection.

A free sample because "...it is important to emphasize that the Environmental Protection Agency (EPA) defines a reuse day as three immersion loads of clean, dry instruments into the same glutaraldehyde solution over a day. If the instruments are wet, contaminated with organic debris or make up one of many instrument loads circulated through the solution, biocidal efficiency and reuse life may be decreased markedly!"

And because "At 78% of the facilities, failure to sterilize all

biopsy forceps was observed. A total of 23.9% of the bacterial cultures from the internal channels of 71 gastrointestinal endoscopes grew 100,000 colonies or more of bacteria."²
