Mathematics
Books and Journals from Cambridge University Press

Cambridge is a world leading publisher in pure and applied mathematics, with an extensive programme of high quality books and journals that reaches into every corner of the subject.

Our catalogue reflects not only the breadth of mathematics but also its depth, with titles for undergraduate students, for graduate students, for researchers and for users of mathematics.

We are proud to include world class researchers and influential educators amongst our authors, and also to publish in partnership with leading mathematical societies.

CONTENTS

Ardizzoni, A. and El Kaoutit, L.
Invertible bimodules, Miyashita action in monoidal categories and Azumaya monoids................................................. 1

Marsh, R. J. and Palu, Y.
Nearly Morita equivalences and rigid objects..................... 64

Imai, N. and Tsushima, T.
Stable models of Lubin–Tate curves with level three........... 100

Klein, J. R.
Embeddings, normal invariants and functor calculus .......... 152

Komyo, A.
Mixed Hodge structures of the moduli spaces of parabolic connections................................................................. 185

Bhupal, M. and Ono, K.
Symplectic fillings of links of quotient surface singularities – CORRIGENDUM ....................................................... 207
