**Figure 1.** Mean modelled time effects (in mm) for the teat ultrasound measurements in lactating cows, starting from time T0 (just before milking) as baseline. Shaded regions show 95% bootstrap confidence intervals (10,000 replications) for the means; darker shaded regions are 80% confidence intervals. TCL = Teat canal length; TCDP = Proximal teat canal diameter; TCDM = Midpoint teat canal diameter; TCDD = Distal teat canal diameter; TCIW = Teat cistern width; TEW = Teat end width; TWT = Teat wall thickness.

The publisher and typesetters apologise for this error.
