Why Has Japan 'Succeeded'?

Western Technology and the Japanese Ethos

Michio Morishima

A prominent Japanese economist offers an interpretation of the factors unique to Japan's history and culture that are responsible for its current economic success. Among the points analyzed are Japan's dualistic social structure (which corresponds to the division between large enterprise and medium to small enterprise), the relationship between government and big business, the poor reception of liberalism and individualism, and the strength of Japanese nationalism. Morishima emphasizes the importance of the role played by ethical doctrines in the creation of Japanese capitalism, especially the Confucian tradition of complete loyalty to the firm and to the state.

A History of Chinese Civilization

Jacques Gernet

J.R. Foster, Translator

The grand sweep of Chinese civilization from the earliest times to the present is captured in a beautifully illustrated survey. Gernet writes an elegant, flowing narrative, synthesizing the social, political, religious, scientific, intellectual, and artistic trends that make up China's past and present.

First published in French, this distinguished book was winner of the Prix Saintour of the Institute of France and was enthusiastically received as one of the most comprehensive and readable single-volume histories of China to appear.

80 plates, 29 maps, 16 diagrams, many tables.

Koreans in Japan

Ethnic Conflict and Accommodation

Changsoo Lee and George DeVos

Foreword by Robert A. Scalapino

An examination of the persistence of complex mechanisms of discrimination against ethnic Koreans in modern Japan. After summarizing the long history of Korean-Japanese interaction, the authors consider the political and educational institutions of the approximately 650,000 Koreans now living in Japan. Their documentation of the psychocultural effects of discrimination includes ethnographic description, an examination of the role of the mass media, and case studies of Korean youth. \$32.50

New in paperback—

Political Women in Japan

The Search for a Place in Political Life

Susan J. Pharr

Tracing developments that led to the grant of suffrage to women in Japan during the Allied occupation, Pharr analyzes the process by which young Japanese women today overcome numerous constraints to become involved in politics. She examines both the satisfactions of political volunteerism and the psychological and social costs associated with it. \$6.95

A Warbler's Song in the Dusk

The Life and Writings of Ōtomo Yakamochi

Paula Doe

Eighth-century Japanese poet Ōtomo Yakamochi was the major writer of his day and the compiler of Japan's first and perhaps greatest poetic anthology. This unique collection of material on Yakamochi's life and times, together with large selections from his work and the poetry he collected, enables us to see early Japanese poetry in context, and gain a clear understanding of Yakamochi's particular accomplishment. \$28.50

Eighth Voyage of the Dragon

A History of China's Quest for Seapower

By Bruce Swanson

Emphasizing the unchanging nature of China's career on the sea, Bruce Swanson cites the fundamental conflict between the land-minded continentalists and those who sought to make their country a great seapower. *Eighth Voyage of the Dragon* reveals the key forces and issues that for centuries have affected, and will continue to affect, China's attitude toward the sea: the burden of extensive bureaucracy, the naval-officer ethic, a preference for coastal-defense tactics, the failure of naval modernization, regional jealousies, and the employment of foreign advisors. The use of previously classified U.S. naval attache reports provides further insight into the complex workings of China's navy. A stunning collection of photographs, taken in China over the last hundred years, adds the finishing touch to what undoubtedly will be considered the definitive work on its subject for many years to come. 1982 (April). 400 pages. 45 photographs. 20 line drawings. List price: \$26.95.

STROKES OF CHINESE GENIUS

The Compelling Image **Nature and Style in Seventeenth-Century Chinese Painting** *James Cahill*

The seventeenth century was a remarkable period in Chinese painting.

Artists began to reconsider their traditional relationship to nature, and to the works of previous generations.

The influence of Western pictorial techniques was being felt for the first time.

In an elegant and readable book, Cahill focuses on the works of this period's brilliant masters.

Beginning with their common heritage, he illuminates their diverging paths of style and approach.

This unique book is more than a guide to the art of China's golden era, it reflects the nature of Chinese painting as a whole. For China enthusiasts and art lovers alike.

"This book ranks among the most important works on later Chinese painting to appear in any Western language." — Thomas Lawton

A Narrative History
 JEROME B. GRIEDER, *Brown University*
 The first panoramic survey of intellectuals as they helped shape—and were shaped by—Chinese culture and society from the mid-nineteenth century to the People's Republic. "[Grieder's] broad learning and vitality of spirit make him an excellent narrator and companion for this eventful journey. . . a major contribution."—*New York Times Book Review* "...the best overview of the accomplishments and dilemmas of modern Chinese intellectuals available in a Western language."—*Choice*

MITI and the Japanese Miracle

The Growth of Industrial Policy, 1925-1975

Chalmers Johnson. Central to an understanding of Japan's "miracle"—the unprecedented economic growth that has made Japan the second most productive open economy in history—is the role of the Ministry of International Trade and Industry (MITI), an elite bureaucratic department with no precise equivalent in any other country. This study, the first in any language, describes MITI's origins, structure, and activities from its beginnings in the 1920's to the immediate aftermath of the international oil crisis of 1973-74. The author analyzes how and why MITI directs the collaboration between the state and the private sector in Japan's development goals, and shows the continuity of MITI's leadership from World War II (when it was the Ministry of Munitions) to the decade of the miracle. A concluding chapter contrasts the Japanese "developmental state" with the American "regulatory state," and considers its possible relevance to other countries that would like to emulate Japan's economic achievements. \$28.50

Early Ming China

A Political History, 1355-1435

Edward L. Dreyer. This is the first modern history, in any language, of the very late Yuan and early Ming period of China, a time of momentous changes whose impact on China's subsequent history is only imperfectly understood. Among these changes were the moving of the capital to Peking and the launching of an ambitious naval program that took Chinese ships as far as the coast of Africa. Even more important was the decline of the Ming military and the growth of a Neo-Confucian bureaucracy that remained the chief instrument of government until the fall of the empire in 1911. \$30.00

Organizing China

The Problem of Bureaucracy, 1949-1976

Harry Harding. Since establishment of the People's Republic in 1949, Chinese Communist leaders have constructed an administrative apparatus that has exercised broader and tighter control over Chinese society than any government in the country's history. This is a history of the development of Chinese organizational policy—a topic of constant concern and often strident debate—from 1949 to the death of Mao Tse-tung in 1976. The author argues that Chinese organizational policy has been controversial because of the complexity of administrative problems, the effects of policy changes on the distribution of power and status, and the philosophical dilemma of whether the efficiency of modern bureaucracy outweighs its social and political costs. \$29.50

Asian Village Economy at the Crossroads

An Economic Approach to Institutional Change

Yujiro Hayami and Masao Kikuchi

The pressures of modernization are having a dramatic impact on rural Asian communities. This book analyzes, within an economic framework, the effects of the market economy, decreasing ratios of land to labor, and efforts to increase productivity in Asian villages. The authors also suggest ways in which village institutions can adjust to these changes and use them to their best advantage. \$25.00

Announcing . . .

The first official economic survey of the People's Republic of China

1981 ALMANAC OF CHINA'S ECONOMY

Xue Maquiao, *Editor-in-Chief*

Compiled province by province, this compendium gives a systematic account of China's economy over the past 30 years and reviews governmental policies, decrees, and regulations for agriculture, industry, finance, taxation, and foreign trade. Statistical data, covering the period 1949-1980, are published here for the first time. This valuable reference—the most complete picture of China's economy ever assembled—will facilitate economic cooperation and academic exchange.

New Works on China

The Foundations of Mao Zedong's Political Thought, 1917–1935

Brantly Womack, *Northern Illinois University*

ca. 256 pages, \$17.50s

“This is the most thorough description and analysis of the early Mao Zedong and the origins of his thought to have appeared since the early Schram anthology. The publication of the book at this time seems particularly timely, because it shows us how much of Mao’s thought still remains standing even if one discounts the controversial innovations of his later years.” —Lowell Dittmer, *Chairman, Center for Chinese Studies, University of California, Berkeley*

Western Reports on the Taiping

A SELECTION OF DOCUMENTS

Prescott Clarke, *Monash University*, and

J. S. Gregory, *La Trobe University*, editors

ca. 432 pages, \$25.00s cloth, \$15.95s paper

This collection reflects the state of knowledge about the Taiping movement of 1850–1864 among Westerners in China during the time of this seminal event in modern Chinese history. Gregory and Clarke thoroughly combed the Western sources and brought together not only the lesser known and even the unknown, but also, by orderly presentation and judicious introductions and notes, brought out the significance of some of the better known materials. Essential for readers interested in 19th century Chinese history, Chinese revolutionary history, and the Western impact in China.

The Unity of Knowledge and Action

A STUDY IN WANG YANG-MING'S MORAL PSYCHOLOGY

A. S. Cua, *Catholic University of America*

152 pages, \$12.95s

As a classic formulation of Neo-Confucian ethics, Wang Yang-Ming’s doctrine of the unity of knowledge and action dominated Chinese philosophy during the Ming dynasty and has fascinated scholars since. Distinguished by original insight, disciplined analysis, and persuasive power, Cua’s study will be read not only by students of Chinese philosophy and comparative ethics, but also by those concerned with the state of contemporary moral philosophy.
