Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 24, 2021 (18 issues):
Internet/print package: £1390/\$2666 Americas only/€2227 EU only
Internet only: £1006/\$1909 Americas only/€1599 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press
1 Liberty Plaza
Floor 20, New York

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database. *Public Health Nutrition* participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

Streamlined data-gathering techniques to estimate the price and affordability of healthy and unhealthy diets under different pricing scenarios
Christina Zorbas, Amanda Lee, Anna Peeters, Meron Lewis, Timothy Landrigan and Kathryn Backholer 1

Assessment of *trans*-fatty acid content in a sample of foods from the Slovenian food supply using a sales-weighting approach
Anita Kušar, Maša Hribar, Živa Lavriša, Nina Zupanič, Urška Pivk Kupirovič, Hristo Hristov, Helena Abramovič, Rajko Vidrih, Emil Zlatič, Doris Kokalj, Saša Piskernik, Marjeta Mencin, Petra Peče, Urška Blaznik, Katja Žmitek and Igor Pravst 12

Assessment and methodology

Concordance of children's intake of selected food groups as reported by parents via 24-h dietary recall and ecological momentary assessment
Katie A Loth, Angela Fertig, Amanda Trofholz, Lisa Harnack, Ross Crosby, Dianne Neumark-Sztainer and Jerica M Berge 22

Relative validity of a computer-based semi-quantitative FFQ for use in the Pelotas (Brazil) Birth Cohort Studies
Júliana S Vaz, Romina Buffarini, Bruna C Schneider, Renata M Bielemann, Helen Gonçalves and Maria Cecília F Assunção 34

Nutritional status and body composition

Evaluation of nutritional status of foreign students at King Saud University, Kingdom of Saudi Arabia
Mohammed A Mohammed, Ghedeir M Alshammari and Elfadil E Babiker 43

Catch-up growth is a better indicator of undernutrition than thresholds for stunting
Christiane Scheffler, Barry Bogin and Michael Hermanussen 52

Nutrition communication

The efficacy of 'high in' warning labels, health star and traffic light front-of-package labelling: an online randomised control trial
Lana Vanderlee, Beatriz Franco-Arellano, Mavra Ahmed, Angela Oh, Wendy Lou and Mary R L'Abbé 62

Behavioural nutrition

A goal-systems perspective on plant-based eating: keys to successful adherence in university students
Maricarmen Vizcaino, Linda S Ruehlman, Paul Karoly, Katy Shilling, Andrew Berardy, Sidney Lines and Christopher M Wharton 75

Nutritional epidemiology

Dietary patterns generated by the Treelet Transform and risk of stroke: a Danish cohort study
Signe B Frederiksen, Heidi H Thomsen, Kim Overvad and Christina C Dahm 84

Body image disorders associated with lifestyle and body composition of female adolescents
Valter PN Miranda, Paulo Roberto S Amorim, Ronaldo R Bastos, Vítor GB Souza, Eliane R Faria, Sylvia CC Franceschini, Paula C Teixeira, Núbia de S de Moraes and Sílvia E Priore 95

Economics and environment

Maternal height and double-burden of malnutrition households in Mexico: stunted children with overweight or obese mothers
Lucía Félix-Beltrán, James Macinko and Randall Kuhn 106

Community nutrition

Food deserts and cardiovascular health among young adults
Alexander Testa, Dylan B Jackson, Daniel C Semenza and Michael G Vaughn 117

The University of British Columbia healthy beverage initiative: changing the beverage landscape on a large post-secondary campus
Katie M Di Sebastiano, Sara Kozicky, Melissa Baker, Matt Dolf and Guy Faulkner 125

Healthy beverage initiatives in higher education: an untapped strategy for health promotion
Anisha I Patel and Laura A Schmidt 136

Interventions

Guidance materials from 2014 to 2019 on nutritional care for Ebola patients in Ebola Treatment Units: an analysis
Mija Ververs and Cecilia Vorfeld 139

The role of improved social support for healthy eating in a lifestyle intervention: *Texercise Select*
Aya Yoshikawa, Matthew Lee Smith, Shinduk Lee, Samuel D Towne Jr and Marcia G Ory 146

Evaluating the effect of the initiative 'Caring for the Newborn and the Mother at Home' in Mexico
Mishel Unar-Munguía, Teresita González de Cosío, Ericka Ileana Escalante-Izeta, Isabel Ferré-Eguiluz, Matthias Sachse-Aguilera and Carolina Herrera 157

Public policies

Perspectives from South African dietitians on infant and young child feeding regulations
Megan Clarke, Nelene Koen and Lisanne du Plessis 169
