Molecular Nutrition
Fish oil combined with SCFA synergistically prevent tissue accumulation of NEFA during weight loss in obese mice.
M. H. Pedersen, L. Lauritzen & L. I. Hellgren
1449–1456

Diet × genotype interactions in hepatic cholesterol and lipoprotein metabolism in Atlantic salmon (Salmo salar) in response to replacement of dietary fish oil with vegetable oil.
S. Morais, J. Pratoomyot, B. E. Torstensen, J. B. Taggart, D. R. Guy, J. G. Bell & D. R. Tocher
1457–1469

Metabolism and Metabolic Studies
A high-amylopectin diet caused hepatic steatosis associated with more lipogenic enzymes and increased serum insulin concentration.
J. He, D. Chen, K. Zhang & B. Yu
1470–1475

A high dietary concentration of inulin is necessary to reduce the incidence of swine dysentery in pigs experimentally challenged with Brachyspira hyodysenteriae.
1506–1513

Nutritional Immunology
Long-term dietary antioxidant cocktail supplementation effectively reduces renal inflammation in diabetic mice.
N.-Y. Park, S.-K. Park & Y. Lim
1514–1521

Therapeutic effect of antisecretory factor-rich egg yolk on the late phases of 2,4,6-trinitrobenzenesulphonic acid colitis in mice.
J. Maité, V. Lorin, E. Pedrosa, I. Ojanguren, E. Domeinich, M. A. Gassull & E. Cabré
1522–1528

Human and Clinical Nutrition
Serum 25-hydroxyvitamin D concentrations are associated with erythrocyte levels of n-3 PUFA but not risk of CVD.
Y. Park & M. Kim
1529–1534

Mild dehydration impairs cognitive performance and mood of men.
1535–1543

Antioxidant enzymes induced by repeated intake of excess energy in the form of high-fat, high-carbohydrate meals are not sufficient to block oxidative stress in healthy lean individuals.
S. Lim, H. Won, Y. Kim, M. Jung, K. R. Jyothi, Y. Kim, P. Dandona, J. He & S. H. Kim
1544–1551

Glycaemic index and glycaemic load of breakfast predict cognitive function and mood in school children: a randomised controlled trial.
R. Micha, P. J. Rogers & M. Nelson
1552–1561

Dietary Surveys and Nutritional Epidemiology
Colours of fruit and vegetables and 10-year incidence of CHD.
L. M. O. Griep, W. M. M. Verschuren, D. Kromhout, M. C. Ocke & J. M. Geleijnse
1562–1569

Fish consumption in relation to other foods in the diet.
1570–1580

(Contents continued facing inside back cover)
The Nutrition Society is an international, peer-reviewed journal publishing original papers, review articles, technical notes and correspondence on topics of particular interest. Correspondence is encouraged in a Nutrition Discussion Forum. The Journal recognizes the multidisciplinary nature of nutritional sciences and encourages the submission of material from all of the specialties involved in research and clinical practice. The Journal also publishes supplements on topics of particular interest.

The British Journal of Nutrition is published twice monthly by Cambridge University Press on behalf of The Nutrition Society.

The British Journal of Nutrition is available online to subscribers at journals.cambridge.org/bjn. Tables of contents and abstracts are available free at the same website.

Editor-in-Chief
P C Calder, School of Medicine, University of Southampton, Southampton, UK

Deputy Editors
F Bellisle, INRA, University of Paris, Bobigny, France

Typescripts can be submitted as Word, WordPerfect, EP, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typescripts, authors are given the opportunity to do this once only, the need for any further changes should at most reflect any minor issues.

Title Page. The first page should include a concise, informative title together with the names of the authors. The contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (each containing up to three words). The title should be up to 45 characters is required as a running head. Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be printed without underlining, bold or italics except for scоснов name. Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. “The conceptual difficulty of this approach has recently been reported” (Jaffe 1958). It is cited only on the page when it first appears in the text.

References. Authors are asked to submit the names of up to four reviewers who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

Proofs. PDF page proofs will be emailed to authors for checking, and should be returned within 5 days by fax or Express mail to the Editorial Office. The proofs should be returned to the Editorial Office no later than 10 working days after receipt. Authors are asked to submit the proofs to the Editorial Office directly on +44 (0)20 7652 1756 (telephone) or +44 20 7652 1756 (fax) or edoffice@nutsoc.org.uk (email).

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.
Contents

**Molecular Nutrition**
Fish oil combined with SCFA synergistically prevent tissue accumulation of NEFA during weight loss in obese mice.
M. H. Pedersen, L. Lauritzen & L. I. Hellgren
1449–1456

Diet × genotype interactions in hepatic cholesterol and lipoprotein metabolism in Atlantic salmon (*Salmo salar*) in response to replacement of dietary fish oil with vegetable oil.
S. Morais, J. Pratoomyot, B. E. Torstensen, J. B. Taggart, D. R. Guy, J. G. Bell & D. R. Tocher
1457–1469

**Metabolism and Metabolic Studies**
A high-amylopectin diet caused hepatic steatosis associated with more lipogenic enzymes and increased serum insulin concentration.
J. He, D. Chen, K. Zhang & B. Yu
1470–1475

Effects of Nori- and Wakame-enriched meats with or without supplementary cholesterol on arylesterase activity, lipaemia and lipoproteinemia in growing Wistar rats.
1476–1486

A dairy product fermented by lactobacilli cancels the adverse effects of hypothorhydrinemia induced by a proton pump inhibitor on bone metabolism in growing rats.
S. Takasugi, K. Ashida, S. Maruyama, Y. Komaba, T. Kaneko & T. Yamaji
1487–1494

Mango modulates body fat and plasma glucose and lipids in mice fed a high-fat diet.
1495–1505

A high dietary concentration of inulin is necessary to reduce the incidence of swine dysentery in pigs experimentally challenged with *Brachyspira hyodysenteriae*.
1506–1513

**Nutritional Immunology**
Long-term dietary antioxidant cocktail supplementation effectively reduces renal inflammation in diabetic mice.
N.-Y. Park, S.-K. Park & Y. Lim
1514–1521

Therapeutic effect of antisercretory factor-rich egg yolk on the late phases of 2,4,6-trinitrobenzene sulfonic acid colitis in mice.
J. Maté, V. Lorén, E. Pedrosa, I. Ojanguren, E. Domènech, M. A. Gassull & E. Cabrè
1522–1528

**Human and Clinical Nutrition**
Serum 25-hydroxyvitamin D concentrations are associated with erythrocyte levels of n-3 PUFA but not risk of CVD.
Y. Park & M. Kim
1529–1534

Mild dehydration impairs cognitive performance and mood of men.
1535–1543

Antioxidant enzymes induced by repeated intake of excess energy in the form of high-fat, high-carbohydrate meals are not sufficient to block oxidative stress in healthy lean individuals.
S. Lim, H. Won, Y. Kim, M. Jang, K. R. Jyothi, Y. Kim, P. Dandona, J. Ha & S. S. Kim
1544–1551

Glycaemic index and glycaemic load of breakfast predict cognitive function and mood in school children: a randomised controlled trial.
R. Micha, P. J. Rogers & M. Nelson
1552–1561

**Dietary Surveys and Nutritional Epidemiology**
Colours of fruit and vegetables and 10-year incidence of CHD.
L. M. O. Griep, W. M. M. Verschuren, D. Kromhout, M. C. Ocké & J. M. Geleijnse
1562–1569

Fish consumption in relation to other foods in the diet.
1570–1580
Adherence to the Mediterranean diet reduces mortality in the Spanish cohort of the European Prospective Investigation into Cancer and Nutrition (EPIC-Spain).

The role of infant feeding practices in the explanation for ethnic differences in infant growth: the Amsterdam Born Children and their Development study.
M. L. A. de Hoog, M. van Eijsden, K. Stronks, R. J. B. J. Gemke & T. G. M. Vrijkotte

Behaviour, Appetite and Obesity

Length and site of the small intestine exposed to fat influences hunger and food intake.
