

OBJECTS  
OF THE  
**Marine Biological Association**  
OF THE UNITED KINGDOM.

---

THE ASSOCIATION was founded at a Meeting called for the purpose in March, 1884, and held in the Rooms of the Royal Society of London.

The late Professor HUXLEY, at that time President of the Royal Society, took the chair, and amongst the speakers in support of the project were the late Duke of ARGYLL, the late Sir LYON PLAYFAIR, the late Lord AVEBURY, the late Sir JOSEPH HOOKER, the late Dr. CARPENTER, the late Dr. GÜNTHER, the late Lord DALHOUSIE, the late Professor MOSELEY, the late Mr. ROMANES, and Sir E. RAY LANKESTER.

The Association owes its existence and its present satisfactory condition to a combination of scientific naturalists, and of gentlemen who, from philanthropic or practical reasons, are specially interested in the great sea fisheries of the United Kingdom. It is universally admitted that our knowledge of the habits and conditions of life of sea fishes is very small, and insufficient to enable either the practical fisherman or the Legislature to take measures calculated to ensure to the country the greatest return from the "harvest of the sea." Naturalists are, on the other hand, anxious to push further our knowledge of marine life and its conditions. Hence the Association has erected at Plymouth a thoroughly efficient Laboratory, where naturalists may study the history of marine animals and plants in general, and where researches on food-fishes and molluscs may be carried out with the best appliances.

The Laboratory and its fittings were completed in June, 1888, at a cost of some £12,000. Since that time investigations, practical and scientific, have been constantly pursued at Plymouth. Practical investigations upon matters connected with sea-fishing are carried on under the direction of the Council; in addition, naturalists from England and from abroad have come to the Laboratory, to carry on their own independent researches, and have made valuable additions to zoological and botanical science, at the expense of a small rent for the use of a working table in the Laboratory and other appliances. The number of naturalists who can be employed by the Association in special investigations on fishery questions, and definitely retained for the purpose of carrying on those researches throughout the year, must depend on the funds subscribed by private individuals and public bodies for the purpose. The first charges on the revenue of the Association are the working of the sea-water circulation in the tanks, stocking the tanks with fish and feeding the latter, the payment of servants and fishermen, the hire and maintenance of fishing-boats, and the salary of the Resident Director and Staff. At the commencement of this number will be found the names of the gentlemen on the Staff.

The purpose of the Association is to aid at the same time both science and industry. It is national in character and constitution, and its affairs are conducted by a representative Council, by an Honorary Secretary and an Honorary Treasurer, without any charge upon its funds, so that the whole of the subscriptions and donations received are devoted absolutely to the support of the Laboratory and the prosecution of researches by aid of its appliances. The reader is referred to page 4 of the Cover for information as to membership of the Association.

# CONTENTS OF NEW SERIES, Vol. XIII, No. 3.

	PAGE
1. ON THE GROWTH OF SOME LAMELLIBRANCHS IN RELATION TO THE FOOD-SUPPLY OF FISHES. By E. FORD. <i>With Plates I to III and 5 Figures in the Text</i> . . . . .	531
2. THE FOOD OF THE BOTTOM FAUNA OF THE PLYMOUTH FISHING GROUNDS. By O. D. HUNT. <i>With Plates I and II and 1 Figure in the Text</i> . . . . .	560
3. SOME MARINE CILIATES LIVING IN THE LABORATORY TANKS AT PLYMOUTH, WITH A DESCRIPTION OF A NEW SPECIES. By W. DE MORGAN. <i>With 1 Plate and 32 Figures in the Text</i> . . . . .	600
4. WATER MOVEMENT AND SEA TEMPERATURE IN THE ENGLISH CHANNEL. By H. W. HARVEY. <i>With 2 Diagrams in the Text</i> . . . . .	659
5. THE WATER MOVEMENTS IN THE NEIGHBOURHOOD OF THE ENGLISH CHANNEL—NORTH SEA JUNCTION. DRIFT BOTTLE EXPERIMENTS. By J. N. CARRUTHERS. <i>With 1 Chart in the Text</i> . . . . .	665
6. A NOTE ON THE WATER MOVEMENTS IN THE ENGLISH CHANNEL AND NEIGHBOURING SEAS, CONSIDERED ON THE BASIS OF SALINITY DISTRIBUTION. By J. R. LUMBY . . . . .	670
7. A RELEASING APPARATUS FOR HORIZONTALLY-TOWED PLANKTON NETS. By F. S. RUSSELL. <i>With 4 Figures in the Text</i> . . . . .	673
8. EVAPORATION AND TEMPERATURE CHANGES IN THE ENGLISH CHANNEL. By H. W. HARVEY. <i>With 4 Figures in the Text</i> . . . . .	678
9. ON THE THERMAL STRATIFICATION OF SEA WATER AND ITS IMPORTANCE FOR THE ALGAL PLANKTON. By W. R. G. ATKINS. <i>With 3 Figures in the Text</i> . . . . .	693
10. SEASONAL CHANGES IN THE PHOSPHATE CONTENT OF SEA WATER IN RELATION TO THE GROWTH OF THE ALGAL PLANKTON DURING 1923 AND 1924. By W. R. G. ATKINS. <i>With 8 Figures in the Text</i> . . . . .	700
11. YOUNG ANGLERS IN CAPTIVITY AND SOME OF THEIR ENEMIES. A STUDY IN A PLUNGER JAR. By M. V. LEBOUR. <i>With 9 Figures in the Text</i> . . . . .	721
12. NOTES ON EUPHAUSIIDS. By C. F. HICKLING. <i>With 2 Figures in the Text</i> . . . . .	735
13. OBISUM MARITIMUM LEACH FOUND AT WEMBURY, NEAR PLYMOUTH, TOGETHER WITH ITS ORIGINAL DESCRIPTION, AND SHORT NOTES ON ITS GEOGRAPHICAL DISTRIBUTION. By H. F. BARNES . . . . .	746
14. SEASONAL CHANGES IN THE WATER AND HELEOPANKTON OF FRESH-WATER PONDS. By W. R. G. ATKINS AND G. T. HARRIS. <i>Abstract, with 3 Figures in the Text</i> . . . . .	750

## NOTICE.

The Council of the Marine Biological Association wish it to be understood that they do not accept responsibility for statements published in this Journal excepting when those statements are contained in an official report of the Council.

### TERMS OF MEMBERSHIP.

	£	s.	d.
Annual Members . . . . . per annum	1	1	0
Life Members . . . . . Composition Fee	15	15	0
Founders . . . . .	100	0	0
Governors . . . . .	500	0	0

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they receive the Journal of the Association free by post; they are admitted to view the Laboratory at Plymouth, and may introduce friends with them; they have the first claim to rent a place in the Laboratory for research, with use of tanks, boats, &c.; and have access to the books in the Library at Plymouth.

All correspondence should be addressed to the Director, The Laboratory, Plymouth.
