Number sequences and phyllotaxis [A]  
L. van Wyk  
See Y. Fong  
M.H. Vasavada  
See R.D. Mehta  
Peter John Vassiliou  
The geometry of nonlinear wave equations in two independent variables: methods for exact solution [A]  
Enzio Venturino  
Solving singular integral equations via (0, 2, 3) lacunary interpolation  
P. Viera  
The generation of water waves by travelling pressure disturbances [A]  
C. Vinsonhaler
See H.P. Goeters
C. Vinsonhaler and W. Wickless
Locally irreducible rings
J. Vukman
Some results concerning the Cauchy functional equation in certain Banach algebras
A note on additive mappings in noncommutative fields
See M. Brešar
Relja Vulanović
See Dragoslav Herceg
Peter L. Walker
A class of functional equations which have entire solutions
Roger James Wallace
Optimal solutions of restricted subadditive inequalities [A]
W.D. Wallis
See S.S. Sane
R.F.C. Walters
Data types in distributive categories
Hwai-Chiuan Wang
On the Fourier transforms
C.L. Wangneo
Polynomial rings over rings integral over their centres
N.C. Weber
See S.N. Evans
T. Weir
A duality theorem for a multiple objective fractional optimization problem
T. Weir and V. Jeyakumar
A class of nonconvex functions and mathematical programming
T. Weir and B. Mond
Generalised convexity and duality in multiple objective programming
R. Wells and J.A. Dutton
Bifurcating attractors and Galerkin approximates
H. Werner
See B.A. Davey
Walter Wessel
See Klaus Kriegel
E.A. Whelan
Normalising elements and radical, I
J. Whitfield
See T. Lewis
J.H.M. Whitfield and V. Zizler
Mazur's intersection property of balls for compact convex sets
Geoffrey P. Whittle
Some aspects of the critical problem for matroids [A]
W. Wickless
See C. Vinsonhaler
See also H.P. Goeters
R. Wiegandt
See P.N. Ánh

James Wiegold
On some groups with trivial multiplicator
See A.G.R. Stewart
F.G.J. Wiid
Weak compactness in spaces of vector valued measures
David Charles Wilson
Structure and existence of Sidon sets on compact groups [A]
C.S. Withers
The moments of the multivariate normal

Kar Hung Wong
On the computational algorithms for time-lag
optimal control problems [A]
Pak-Ken Wong
A note in annihilator Banach algebras
Sing Yan, Robert Wong
On the dictionary between ergodic transformations,
Krieger factors and ergodic flows [A]

R.J. Wood
See R. Paré
Nicholas C. Wormald
On the frequency of 3-connected subgraphs of planar graphs
Stephen J. Wright
Algorithms and application for special classes
of nonlinear least squares problems [A]

T.F. Xie and S.P. Zhou
On approximation by trigonometric Lagrange
interpolating polynomials
Mingyao Xu
The power structure of finite p-groups
Weimin Xue
Morita duality and artinian left duo rings
Shri Ram Yadav and R.N. Mukherjee
A note on arcwise connected sets and functions
Sadayuki Yamamuro
Absolute values in orthogonally decomposable spaces
A note on positive semigroups
Symmetry groups on ordered Banach spaces
Homomorphisms on an orthogonally decomposable Hilbert space V
Shinji Yamashita
Blaschke-type maps and harmonic majoration on
Riemann surfaces
The higher derivatives of functions bounded in various senses
Meromorphic Lipschitz functions
Jurang Yan
Necessary and sufficient conditions for oscillations
of delay differential inequalities
Kichoon Yang
Frenet formulae for holomorphic curves in the two quadric
Almost complex structures on the orthogonal twistor bundle
Plücker formulae for the orthogonal group
