Economics
Books and Journals from Cambridge University Press

Cambridge’s economics list is renowned for the breadth and quality of its publishing.

Our book list is home to the work of some of the most important economists in the history of the discipline, most notably John Maynard Keynes, as well as the work of almost 30 Sveriges Riksbank Nobel Prize laureates, including Kenneth Arrow, Herbert Simon, Robert Solow and Joseph Stiglitz.

This is complemented by a cluster of key journals such as Econometric Theory, Journal of Economic History and Journal of Financial and Quantitative Analysis.

Journal of Demographic Economics

Demographic variables such as fertility, mortality, migration and family structures notably respond to economic incentives and in turn affect the economic development of societies. Journal of Demographic Economics welcomes both empirical and theoretical papers on issues relevant to Demographic Economics with a preference for combining abstract economic or demographic models together with data to highlight major mechanisms.

The journal was first published in 1929 as Bulletin de l’Institut des Sciences Économiques. It later became known as Louvain Economic Review, and continued till 2014 to publish under this title. In 2015, it moved to Cambridge University Press, increased its international character and changed its focus exclusively to demographic economics.

Editors-in-chief: DAVID DE LA CROIX, Université catholique de Louvain
Co-editor: MURAT IYIGUN, University of Colorado
Editorial Assistant: SÉBASTIEN SCHILLINGS, Université catholique de Louvain

Notes for Contributors

All manuscripts should be submitted via our on-line system, ScholarOne Manuscripts at: http://mc.manuscriptcentral.com/jode Other forms of submission will not be accepted by the editors. Articles submitted to the Journal should be original contributions. They should not be under consideration by another journal, nor have been published or be awaiting publication elsewhere. Submission should have been approved by all co-authors.

Replication Policy: On acceptance of their paper, authors must submit a complete set of any data used in the paper. Computer code necessary to run a commercial program or the source code of a non-commercial program must also be submitted. The results of the paper must be capable of replication given access to any commercial program used to obtain the results. The data, computer programs, and code will be maintained in the data archive which is linked to the journal’s homepage.

Authors are responsible for obtaining permission to reproduce any material they do not own the copyright for and for ensuring appropriate acknowledgment of such material.

All manuscripts should follow the manuscript preparation guidelines available online in the full instructions for contributors.

Full Instructions for Contributors can be found online at cambridge.org/dem/ifc
