DEVELOPMENT AND PSYCHOPATHOLOGY

EDITORS:

Dante Cicchetti, University of Rochester
Barry Nurcombe, Child and Adolescent Psychiatric Hospital, Vanderbilt University

This multidisciplinary journal is devoted to the publication of original empirical, theoretical and review papers which address the interrelationship of normal and pathological development in adults and children. It is intended to serve and integrate the emerging field of developmental psychopathology which strives to understand patterns of adaptation and maladaptation throughout the life span. Explorations of abnormal functioning in the social, emotional, cognitive, linguistic and biological domains help to clarify normal developmental processes. Reciprocally, elucidations of principles of normal development help to broaden our understanding of psychopathological conditions. Contributions may also be on the processes underlying the adaptive outcomes in populations "at risk" for psychopathology. This journal is of vital interest to psychologists, psychiatrists, social scientists, neuroscientists, pediatricians and researchers.

Development and Psychopathology (ISSN 0954-5794) is published quarterly. Subscriptions to Volume 1 (1989) or Volume 2 (1990) are each $75.00 for institutions; $35.00 for individuals; single parts $20.00.

BEHAVIORAL and BRAIN SCIENCES

EDITOR:
Stevan Harnad, Princeton, NJ

Behavioral and Brain Sciences publishes particularly significant and controversial "target articles." These have been successful in drawing out the leading investigators in a wide range of fields who discuss, debate and critically analyze topics of current interest to the entire biobehavioral science community. Fascinating and often surprising results come from the 20-30 open peer commentaries on each target article from psychologists, linguists, philosophers, neuroscientists, anthropologists, developmentalists and other specialists within and across these disciplines.

Selected Papers

Sex differences in human mate preferences:
Evolutionary hypothesis tested in 37 cultures,
D.M. Buss

A solution to the tag-assignment problem for neural networks, Gary W. Strong, Bruce A. Whitehead

Strategies for the control of voluntary movements with one degree of freedom, G.L. Gottlieb et al.

Numerical competence in animals: Definitional issues, current evidence and a new research agenda, H. Davis, R. Perusse

Genetic similarity, human altruism, and group intelligence, J. Philippe Rushton

Behavioral and Brain Sciences (ISSN 0140-525X) is published quarterly. Subscription to Volume 13 1990 (US and Canada only): $164.00 for institutions; $69.00 for individuals; single parts $45.00.

Psychological Science is a new bimonthly publication being launched as the flagship journal of the American Psychological Society, founded 1988, to regain the scientific focus of psychological research. The journal is designed to be the forum for research, theory, and application in psychology and the closely related behavioral, cognitive, neural, and social sciences. The journal also considers psychology in government and public affairs. Unlike most research journals, Psychological Science encourages articles of general theoretical significance or of broad interest across specialties.

Recent Articles

The Prenatal Origins of Behavioral Organization, William P Smotherman and Scott R Robinson

Facts, Fantasies, and the Future of Child Care in the United States, Sandra Scarr et al.

Serial vs Parallel Processing, James T Townsend

Answering Reading Comprehension Items Without Passages on the SAT, Stuart Katz et al.

Infants’ Perception of Phase Structure in Music, Carol L Krumhansl and Peter W Jusczyk

Psychological Science (ISSN 0956-7976) is published bimonthly. Volume 1 (1990) subscriptions (US and Canada only): $100.00 institutions; $50.00 for non-member individuals. APS members receive the journal as part of their dues.
