ARTICLES

Kazuya Saito, Pavel Trofimovich, and Talia Isaacs
Second language speech production: Investigating linguistic correlates of comprehensibility and accentuatedness for learners at different ability levels 217

Eniko Atagi and Tessa Bent
Auditory free classification of native and nonnative speech by nonnative listeners 241

Angelica Fulga and Kim McDonough
The impact of first language background and visual information on the effectiveness of low-variability input 265

Joanne C. Bovee and Gary E. Raney
Evaluating missing-letter effects and comprehension in proficient and nonproficient languages 285

Joan Sereno, Lynne Lammers, and Allard Jongman
The relative contribution of segments and intonation to the perception of foreign-accented speech 303

Shenai Hu, Anna Gavarró, and Maria Teresa Guasti
Children’s production of head-final relative clauses: The case of Mandarin 323

Zoe Hopkins, Nicola Yuill, and Bill Keller
Children with autism align syntax in natural conversation 347

Ying Wang and Catherine McBride
Character reading and word reading in Chinese: Unique correlates for Chinese kindergarteners 371

Chien-Ju Chang and Cho-Chi Huang
Mother–child talk during joint book reading in two social classes in Taiwan: Interaction strategies and information types 387

Meredith Saletta, Lisa Goffman, and Diane Brentari
Reading skill and exposure to orthography influence speech production 411

Michael J. Tat and Tamiko Azuma
Remembering “txt” but not “text”: The effect of context and lexicality on memory for text message abbreviations 435

Giang Pham and Kerry Danahy Ebert
A longitudinal analysis of sentence interpretation in bilingual children 461

Julia Festman and Harald Clahsen
How Germans prepare for the English past tense: Silent production of inflected words during EEG 487
Applied Psycholinguistics publishes original articles on the psychological processes involved in language. The articles address the development, use, and impairment of language in all its modalities, including spoken, signed, and written, with a particular emphasis on crosslinguistic studies. Studies appearing in Applied Psycholinguistics need to have clear applied relevance to professionals in a variety of fields, including linguistics, psychology, speech and hearing, reading, language teaching, special education, and neurology. Contributors should explicitly consider the relevance of their work to the larger community, as well as its theoretical and psychological significance. Specific topics featured in the journal include language development (the development of speech perception and production across languages, the acquisition and use of sign language, bilingualism, and second language learning), language disorders in children and adults (including those associated with brain damage, retardation and autism, specific learning disabilities, and hearing impairment), literacy development (early literacy skills, dyslexia and other reading disorders, and spelling development and disorders), and psycholinguistic processing (lexical access, time course of language processing, semantics, and syntax). In addition to research reports, theoretical reviews will be considered for publication, as well as keynote articles and commentaries (the latter normally invited by the Editors). The journal will occasionally publish issues devoted to special topics within its purview.

Manuscript Submission. The journal’s full Instructions for Contributors can be found online at http://journals.cambridge.org/aps. Authors should submit their manuscripts electronically at http://mc.manuscriptcentral.com/appliedpsych. All manuscripts must be accompanied by a letter stating explicitly that the authors have obtained institutional review and approval for ethical treatment of human subjects and have not simultaneously submitted this manuscript to another publication.

Publishing, Subscription, and Advertising Offices. Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA, or (outside the USA, Canada, and Mexico) Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK.

Subscription Information. Applied Psycholinguistics (ISSN 0142-7164) is published bimonthly by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA/Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Annual subscription rates for Volume 37, 2016: Institutions print and electronic: US $700.00 in the USA, Canada, and Mexico; UK £437.00 elsewhere. Institutions electronic only: US $861.00 in the USA, Canada, and Mexico; UK £350.00 elsewhere. Individuals print only: US $180.00 in the USA, Canada, and Mexico; UK £109.00 elsewhere. Prices include postage and insurance.
