EDINBURGH JOURNAL OF BOTANY: INSTRUCTIONS FOR AUTHORS (March 2010)

Edinburgh Journal of Botany is an international journal of plant systematics. Contributions relating to plant systematics and allied subjects, including biodiversity, conservation science and phytogeography, will be considered. Papers reporting the results of research that link traditional and modern techniques are especially welcomed. Manuscripts are expected to be in electronic form to ebijournal.co.uk. All manuscripts will be subject to multiple peer review before publication. Submitted manuscripts should not have been accepted for publication or be under consideration elsewhere. Authors whose mother tongue is not English should if possible have their papers checked by a fluent or proficient English speaker before submission.

There are no page charges. A PDF offprint will be supplied free of charge. Paper offprints may be purchased through the publisher. Colour plates may be included but the cost for these will be charged to the author. Half-tone plates are free of charge.

Text pages should be numbered serially, with the title and abstract on the first. Genus and species names should be italicised and should be followed by the authority when first used in the main text or in diagnoses. SI (metric) units must be used other than in specimen citations where appropriate. Authors are advised not to return loan material of new taxa until papers have been reviewed. Refer to volume 63 onwards to see how nomenclatural details, typification and specimens are formatted.

The title page should include the title, the name(s) and address(es) of the author(s), the abstract, a short running title and a few important keywords. Titles do not normally include authors of scientific names. It will be assumed that correspondence should be addressed to the first author unless otherwise indicated. The abstract should be concise and informative, indicating what the paper contains without summarising it.

References in the text should be cited by author and publication date: Smith (2009) or ‘as stated by Smith (2009)’. Multiple references should be arranged chronologically. For three or more authors use et al. In the reference list, references should be in alphabetical order and should appear in the following style: ZHU, R.-L. & CHENG, X. F. (2008). The status of Amblyopterum (Lippeaceae) from Ecuador and Guadeloupe. Syst. Bot. 33: 617-620.

Tables should be numbered in Arabic numerals and carry a descriptive title. Figures, whether line drawings or photographs, should be numbered consecutively in Arabic numerals and referred to in the text thus (Fig. 1), (Figs 2, 3), (Figs 1-4). Line drawings should be scanned in black and white at 600 dpi and photographs at 300 dpi (but correspond with the editor if this should prove problematic) and sent electronically with the manuscript. Please use LZW compression for tif files, remove excess space and elements from around the image, and crop or scale the image to the journal page size (12.5 × 19.5 cm to include caption). A measured scale mark should be included on each illustration to indicate magnification.
