The Proceedings of the Nutrition Society publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the Directions to Contributors on the journal's web page at http:// journals.cambridge.org or contact the Publications Office on +44 1223 347382 (telephone), or pubs.adoffice@cambridge.org (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to complete a copy of the ‘Licence to Publish’ (in lieu of copyright transfer) at the proof stage.

Page format. The Proceedings of the Nutrition Society is printed in double-column format (column width of 85 mm) with a text area of 235×177 mm.

Abstract. Text-wordprocessed text provided electronically is required. Test files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (rft) files). The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared. Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures, starting with the objective followed by the key findings and ending in clear conclusion. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed in a separate paragraph at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Audis Freehand, Cheddar or CoreDraw. Preferred formats are TIF or JPEG, if a TIF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. Must be based on the numbered (Vancouver) system. When an article has more than ten authors, only the names of the first three should be given followed by et al.; give abbreviated journal titles and conform to the following style:

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. (1). The conceptuality of this approach has recently been highlighted(2,3). If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the hypetext's server and should be returned within 48 hours (by email or Express mail) to:

Proceedings of the Nutrition Society, published by Cambridge University Press on behalf of the Nutrition Society 2019

https://doi.org/10.1017/S002966511900065X Published online by Cambridge University Press
Symposia featured in this issue:

**Symposium 1: Current nutritional issues at the population level**

- The effect of iodine deficiency during pregnancy on child development
  - S. C. Bath 150–160

- Picky eating in children: causes and consequences
  - C. M. Taylor & P. M. Emmett 161–169

**Symposium 2: Developing and using novel health and nutritional biomarkers**

- Approaches to improving micronutrient status assessment at the population level
  - Y. Lamers 170–176

- Gut microbiota and health: connecting actors across the metabolic system
  - F. Pasa, L. Misuzzo & R. M. Tuske 177–180

- Role of metabolomics in identification of biomarkers related to food intake
  - C. Coblenz, A. E. McKenzie & I. Bransum 181–186

**Symposium 3: Global strategies to improve micronutrient status; current opinion and implications for nutrition policy**

- Iron biofortification interventions to improve iron status and functional outcomes
  - J. L. Finkelstein, A. Fothergill, L. S. Hackl, J. D. Haas & S. Mehta 197–207

- Dietary fats composition: replacement of saturated fatty acids with polyunsaturated fatty acids as a public health strategy, with an emphasis on e-omega-3 fatty acids
  - Y. M. Longman, R. A. McIntyre & H. M. Koele 210–213

- Julie Wallace Medal Lecture

- Dietary sugars, exercise and hepatic carbohydrate metabolism
  - J. T. Gonzalez & J. A. Betts 246–256

**Postgraduate Symposium**

- Maternal foetal nutrition and offspring health: evidence and current controversies

- Dietary challenges for older adults in Europe: current status and future directions
  - L. Relton, J. Walton & A. Flynn 221–233

- Nutritional challenges for older adults in Europe: current status and future directions
  - L. Relton, J. Walton & A. Flynn 221–233

- Nutritional challenges for older adults in Europe: current status and future directions
  - L. Relton, J. Walton & A. Flynn 221–233

- Nutritional challenges for older adults in Europe: current status and future directions
  - L. Relton, J. Walton & A. Flynn 221–233

- Nutritional challenges for older adults in Europe: current status and future directions
  - L. Relton, J. Walton & A. Flynn 221–233

- Nutritional challenges for older adults in Europe: current status and future directions
  - L. Relton, J. Walton & A. Flynn 221–233

- Nutritional challenges for older adults in Europe: current status and future directions
  - L. Relton, J. Walton & A. Flynn 221–233

- Nutritional challenges for older adults in Europe: current status and future directions
  - L. Relton, J. Walton & A. Flynn 221–233
