Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 16, 2013 (12 issues):
Internet/print package: £886/\$1700 Americas only/€1420 EU only
Internet only: £675/\$1280 Americas only/€1420 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn.edoffice@cambridge.org

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

School – a multitude of opportunities for promoting healthier eating
BE Mikkelsen 1191

HOT TOPIC – Public health nutrition in schools

Comparison of two school-based programmes for health behaviour change: the Belo Horizonte Heart Study randomized trial
RQC Ribeiro and L Alves 1195

Fundraising, celebrations and classroom rewards are substantial sources of unhealthy foods and beverages on public school campuses
SL Caparosa, M Shordon, AT Santos, ME Pomichowski, DA Dzewaltowski and KJ Coleman 1205

Is the school food environment conducive to healthy eating in poorly resourced South African schools?
M Faber, S Laurie, M Maduna, T Magudulela and E Muehlhoff 1214

Evaluating free school fruit: results from a natural experiment in Norway with representative data
A Øvrum and E Bere 1224

Vegetable variety: an effective strategy to increase vegetable choice in children
T Bucher, M Siegrist and K van der Horst 1232

Do Dutch nutrition and dietetics students meet nutritional requirements during education?
JJ van der Kruk, H Jager-Wittenaar, RMB Nieweg and CP van der Schans 1237

Programme coordinators' perceptions of strengths, weaknesses, opportunities and threats associated with school nutrition programmes
RF Valaitis, RM Hanning and IS Herrmann 1245

Food choice, plate waste and nutrient intake of elementary- and middle-school students participating in the US National School Lunch Program
SL Smith and L Cunningham-Sabo 1255

System of planning and evaluation of school meals
A Rocha, C Afonso, MC Santos, C Morais, B Franchini and R Chilro 1264

Factors influencing take-up of free school meals in primary- and secondary-school children in England
P Sahota, J Woodward, R Molinari and J Pike 1271

Impacts of the Primary School Free Breakfast Initiative on socio-economic inequalities in breakfast consumption among 9–11-year-old schoolchildren in Wales
GF Moore, S Murphy, K Chaplin, RA Lyons, M Atkinson and L Moore 1280

Examining local-level factors shaping school nutrition policy implementation in Ontario, Canada
MM Vine and SJ Elliott 1290

Do attitudes, intentions and actions of school food coordinators regarding public organic food procurement policy improve the eating environment at school? Results from the iPOPY study
C He, FJA Perez-Cueto and BE Mikkelsen 1299

Epidemiology

Racial/ethnic and immigrant differences in early childhood diet quality
MLA de Hoog, KP Kleinman, MW Gillman, TGM Vrijkotte, M van Eijsden and EM Taveras 1308

Maternal mental health is associated with child undernutrition and illness in Bangladesh, Vietnam and Ethiopia
PH Nguyen, KK Saha, D Ali, P Menon, S Manohar, LT Mai, R Rawat and MT Ruel 1318

Coffee intake and risk of type 2 diabetes: the Multiethnic Cohort
T Doo, Y Morimoto, A Steinbrecher, LN Kolonel and G Maskarinec 1328

Nutrition and health

Total *n*-3 fatty acid and SFA intakes in relation to insulin resistance in a Canadian First Nation at risk for the development of type 2 diabetes
C Paquet, SL Propsting and M Daniel 1337

Selenium levels and hypertension: a systematic review of the literature
D Kuruppu, HC Hendrie, L Yang and S Gao 1342

Iodine status during pregnancy in India and related neonatal and infant outcomes
MIFA Lean, MEJ Lean, CS Yajnik, DS Bhat, SM Joshi, DA Raut, HG Lubree and E Combet 1353

Nutritional contribution of street foods to the diet of people in developing countries: a systematic review
NP Steyn, Z Mchiza, J Hill, YD Davids, I Venter, E Hinrichsen, M Opperman, J Rumbelow and P Jacobs 1363

Interventions

The folate status of reproductive-aged women in a randomised trial of a folate-fortified oral contraceptive: dietary and blood assessments
PM Castaño, A Aydemir, C Sampson-Landers and R Lynen 1375

Prevention of overweight in children younger than 2 years old: a pilot cluster-randomized controlled trial
V Verbestel, V De Coen, M Van Winckel, I Huybrechts, L Maes and I De Bourdeaudhuij 1384

Marketing and communication

Does nutrition information on menus impact food choice? Comparisons across two hospital cafeterias
L Vanderlee and D Hammond 1393

Adolescents' ability to select healthy food using two different front-of-pack food labels: a cross-over study
N Babio, P Vicent, L López, A Benito, J Basulto and J Salas-Salvadó 1403

Public policies

Consumer preferences for micronutrient strategies in China. A comparison between folic acid supplementation and folate biofortification
H De Steur, S Feng, S Xiaoping and X Gellynck 1410

Public health policy to redress iodine insufficiency in pregnant women may widen sociodemographic disparities
SR Mallard and LA Houghton 1421
