Political Science Research and Methods

Political Science Research and Methods (PSRM) is a general political science journal dedicated to publishing original scholarly work of the highest quality from all subfields of political science. PSRM also welcomes work that involves the intersection of political science and related disciplines. Manuscripts should apply rigorous methods to empirical or theoretical problems. PSRM is the official journal of the European Political Science Association (EPSA), the organization that sets the journal’s policies.

Editors-in-chief: Vera E. Trogisch, University of Warwick, UK
Associate Editors: Cameron G. Thies, Arizona State University, USA
Kenneth Benoit, London School of Economics, UK
Simos Hoil, University of Geneva, Switzerland
Paul Kellstedt, Texas A&M University, USA
Massimo Morrelli, Bocconi University, Italy
Daniel Stieglmueller, Duke University, USA

Media Editors: Mary Stegmaier, University of Missouri, USA
Laron Williams, University of Missouri, USA

Data Analyst: Davina Dostycha, University of Warwick, UK

Editorial Assistants: Brina Kidouzdis, University of Warwick, UK
Daniel Haeremacher, University of Warwick, UK

Editorial Board

James Alt, Harvard University, USA
Pablo Beramendi, Duke University, USA
William T. Bernhard, University of Illinois in Urbana-Champaign, USA
Sara Birnzer-Hobolt, London School of Economics, UK
Frederick Boehmke, University of Iowa, USA
William R. Clark, Texas A&M University, USA
Michael Colaresi, University of Michigan, USA
Catherine de Vries, University of Essex, UK
Tobin DeWan, London School of Economics, UK
Fabio Franchino, University of Milan, Italy
Roi Fraenze, University of Michigan, USA

Notes for Contributors

All manuscripts should be submitted via our on-line system, ScholarOne Manuscripts at http://mc.manuscriptcentral.com/psrm
Other forms of submission will not be accepted by the editors.

The journal publishes two types of articles:

a) full length manuscripts that present original, well researched, and fully developed empirical or theoretical work
b) research notes

Research notes that should not exceed 9,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes should not exceed 4,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an on-line appendix.

Research notes should contain original work and present a new method or methodology (particularly useful if related software components are included) to solve an important problem in applied data analysis, present a new theoretical idea or argument, or comment on other publications published in PSRM, or welcome comments to as well as replications of published articles. These will undergo the usual peer review process and if accepted will be published in the research notes section of the journal.

PSRM uses a single-blind peer review process, thus anonymizing your manuscript is not necessary. If you feel strongly about a truly anonymous review process, you may opt out and your manuscript will undergo a double-blind review process.

Replication Policy: PSRM has a strict replication policy which adheres to the Data Access and Reproducibility Transparency (DA-RT) statement subscribed to by many Political Science Journal Editors in 2015. Authors are required to make replication material publicly available at time of publication of the article. The replication materials must be sufficient to replicate results in all tables and figures printed in the article, including simulation material for both theoretical (e.g. agent based models) and empirical (e.g. Monte Carlo experiments) work. Data and replication code for your article, as well as a log demonstrating smooth running of all the replication files, must be uploaded in a single .zip file to the PSRM Dataverse at https://dataverse.harvard.edu/dataverse/PSRM. (See the PSRM Dataverse Guide for a step-by-step walkthrough for uploading your material, which is also linked to on the PSRM Dataverse homepage). This is a necessary condition for publication of the manuscript. All manuscripts are accepted contingent on their replicability, which will initially be assessed by PSRM staff. Manuscripts that are not replicable will be rejected for publication. If your analysis relies on simulation techniques (MCMC, MC experiments) we require authors to set and communicate a seed, so that exact results can be replicated. If this is impossible due to the design of the analysis, replication results need not deviate by more than 5 per cent from published results in the manuscript.

Authors are responsible for obtaining permission to reproduce any material they do not own the copyright for and for ensuring appropriate acknowledgment of such material.

All manuscripts should follow the manuscript preparation guidelines available online in the full instructions for contributors.

Full Instructions for Contributors can be found online at http://www.journals.cambridge.org/psrm/ifc

Rights and Permissions info

All rights reserved. No part of this publication may be reproduced, stored or transmitted in any form or by any means without the prior permission in writing from the copyright holder. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with the C.C.C. may, therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. Copyright law) subject to payment to the C.C.C. of the appropriate fee per copy. This consent does not extend to multiple copying for promotional or commercial purposes.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Subscriptions

Political Science Research and Methods is published four times a year in January, April, July, and October. The 2017 subscription price (excluding VAT) of a volume, which includes print and electronic access, is $429.00 (US $611.00 in USA, Canada and Mexico), $355.00 (US $544.00 for individuals), which includes print and electronic access, ordering direct from the publishers and certifying that the journal is for their personal use. The electronic-only price available to institutional subscribers is $367.00 (US $588.00 in USA, Canada and Mexico). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country’s rate. VAT registered subscribers should provide their VAT registration number. Prices include delivery by air when appropriate. Japanese prices for institutions are available from Kinokuniya Company Ltd, 5-5-5 Chuo, Tokyo 156, Japan. Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent or direct to the publisher: Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK, or in the USA, Canada and Mexico: Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Periodicals postage paid at New York, NY and additional mailing offices.
Contents

587 Alliances and the High Politics of International Trade
Scott Wolford and Moonhawk Kim

613 The Bar Fight Theory of International Conflict: Regime Type, Coalition Size, and Victory
Benjamin A.T. Graham, Erik Gartzke and Christopher J. Fariss

641 What To Do About Atheoretic Lags
Skyler J. Cranmer, Douglas R. Rice and Randolph M. Siverson

667 Gaffe Appeal
A Field Experiment on Partisan Selective Exposure to Election Messages
Timothy J. Ryan and Ted Brader

689 The Effect of Electoral Systems on Voter Turnout: Evidence from a Natural Experiment
Carlos Sanz

711 “Don’t Know” Responses, Personality, and the Measurement of Political Knowledge
Stephen A. Jessee

733 Measuring Emotional Response: Comparing Alternative Approaches to Measurement
George E. Marcus, W. Russell Neuman and Michael B. MacKuen

755 Heuristics, Heterogeneity and Green Choices Voting on California’s Proposition 23
Harold D. Clarke, Euel Elliott and Marianne C. Stewart

775 Electoral Competitiveness and Turnout in British Elections, 1964–2010
Jack Vowles, Gabriel Katz and Daniel Stevens
