Twenty-eight years ago
we declared germ warfare.

Cidex*

Meet our newest Weapons.

Twenty-eight years ago, Johnson & Johnson Medical, Inc. revolutionized disinfection with the introduction of CIDEX*

Activated Dialdehyde Solution. And now, we're offering two new additions to the CIDEX Solution Family of Products.

Introducing ENZOL* Enzymatic Detergent — it breaks down and removes tough, dried-on organic matter from instruments. Plus, easy rinsing means no clogging of scopes.

And, new CIDEX Solution Test Strips — developed **exclusively** for monitoring the effectiveness of CIDEX Solution. It's the easiest, most reliable way to detect unintentional dilution. Simply dip a test strip in CIDEX Solution, remove and read.

Depend on Johnson & Johnson Medical to lead the charge in asepsis and infection control. For additional product information, call 1-800-433-5009, or contact your Johnson & Johnson Medical sales representative.

With our two newest additions, the CIDEX Solution Family of Products is the most powerful weapon you have.

Johnson & Johnson
MEDICAL INC.

They show all the signs of having HIV.

There aren't any you can see. The truth is there is absolutely no way to tell from outward appearance who is infected with HIV, the virus that causes AIDS. So don't fool yourself.

How you act will determine your risk for HIV infection. There are some general rules. Never share drug needles or syringes. And unless you're sure your sex partner isn't infected, don't take a chance. Or at least use a latex condom, correctly, every single time you have sex.

Know how to determine your risk for HIV and AIDS. There is help available. Call our State or local AIDS hotline, or the National AIDS Hotline at 1-800-342-AIDS. Call 1-800-243-7889 (TTY) for deaf access.

HIV is the virus that causes AIDS.
