

# STUDIES IN SECOND LANGUAGE ACQUISITION

## Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

**Research Article.** These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

**Research Report.** These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Replication Study.** These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

**State-of-the-Scholarship Article.** These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

**Critical Commentary.** These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Methods Forum.** Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

# Studies in Second Language Acquisition

## Volume 45 Number 2 May 2023

---

### RESEARCH ARTICLES

- Effects of distributed practice on the acquisition of verb-noun collocations*  
Satoshi Yamagata, Tatsuya Nakata, and James Rogers 291–317
- A role for verb regularity in the L2 processing of the Spanish subjunctive mood: Evidence from eye-tracking*  
Sara Fernández Cuenca and Jill Jegerski 318–347
- The additive use of prosody and morphosyntax in L2 German*  
Nick Henry 348–369
- “Bread and butter” or “butter and bread”? Nonnatives’ processing of novel lexical patterns in context*  
Suhad Sonbul, Dina Abdel Salam El-Dakhs, Kathy Conklin, and Gareth Carrol 370–392
- The elusive impact of L2 immersion on translation priming*  
Adel Chaouch-Orozco, Jorge González Alonso, Jon Andoni Duñabeitia, and Jason Rothman 393–415
- A closer look at a marginalized test method: Self-assessment as a measure of speaking proficiency*  
Paula Winke, Xiaowan Zhang, and Steven J. Pierce 416–441
- Explicit Instruction within a Task: Before, During, or After?*  
Gabriel Michaud and Ahlem Ammar 442–460
- Sources and effects of foreign language enjoyment, anxiety, and boredom: A structural equation modeling approach*  
Jean-Marc Dewaele, Elouise Botes, and Samuel Greiff 461–479
- Second language productive knowledge of collocations: Does knowledge of individual words matter?*  
Suhad Sonbul, Dina Abdel Salam El-Dakhs, and Ahmed Masrai 480–502
- A longitudinal study into learners’ productive collocation knowledge in L2 German and factors affecting the learning*  
Griet Boone, Vanessa De Wilde, and June Eyckmans 503–525

### METHODS FORUM

- Network analysis for modeling complex systems in SLA research*  
Lani Freeborn, Sible Andringa, Gabriela Lunansky, and Judith Rispens 526–557

### RESEARCH REPORTS

- The importance of psychological and social factors in adult SLA: The case of productive collocation knowledge in L2 Swedish of L1 French long-term residents*  
Fanny Forsberg Lundell, Klara Arvidsson, and Andreas Jemstedt 558–570
- Revisiting the moderating effect of speaker proficiency on the relationships among intelligibility, comprehensibility, and accentedness in L2 Spanish*  
Amanda Huensch and Charlie Nagle 571–585

### REPLICATION STUDY

- Wh-Dependency Processing in a Naturalistic Exposure Context: Sensitivity to Abstract Syntactic Structure in High-Working-Memory L2 Speakers*  
Robyn Berghoff 586–598
