Cut Your Sheet Metal by the New and Better Method.

FOR speed in operation, sensitive control and variety of shapes and outlines cut, the Gray Sheet Metal Cutter is in a class by itself.

Instead of forcing the metal apart as in a rotary shear, the Gray cuts it; there is no springing or buckling of the metal.

No matter how intricate the pattern the machine will cut it with perfect ease.

The stock is fed by the rollers and the vertically reciprocating high speed steel cutter does the work.

The operator can stop or start the machine at will. Made in two sizes for sheets up to $\frac{3}{16}$ " and $\frac{1}{2}$ " respectively.

The Gray Sheet Metal Cutter will effect considerable economies in cutting your sheet metal.

MAY WE SEND FURTHER PARTICULARS ?

TRADE MARKS

B.S.A.

There is no element of speculation

about the cutting value, durability and quality of a Twist Drill bearing the name "B.S.A." The fact that thousands of B.S.A. Twist Drills are daily employed in the manufacture of the famous B.S.A. Productions is the finest possible recommendation. The B.S.A. name has been associated with highest quality of material and workmanship for over half-a-century.

Aeroplane Models

THE Silver Model of an Aeroplane illustrated shows how technical knowledge and skilled workmanship are allied in the models produced by the Goldsmiths and Silversmiths Company.

Infinite care is taken to ensure every detail being accurate and of proper proportions, and to reproduce an exact replica of the original.

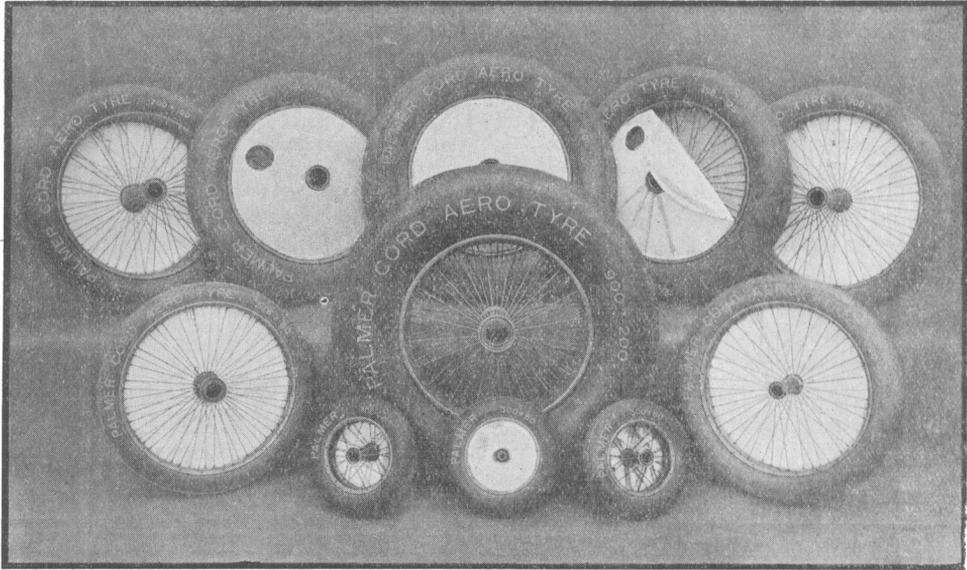

Models can be prepared from the original or from a photograph. Estimates and designs will be submitted free upon application.

The Goldsmiths and Silversmiths Company have no other establishments in Regent Street, Oxford Street, or anywhere else in London, and no branches in the Provinces or Abroad.

For many years Engineers who used leather for clutches and brakes have substituted **FERODO FRICTION SURFACES** which are vastly more efficient.

Over twenty years ago we invented Ferodo Fabrics. Since then, by specialising on the one product, and as a result of practical experience, we have so improved them that they are to-day readily acknowledged to be the finest friction surfaces in the world.

They are entirely unaffected by water, oil or acid, and absorb more foot lbs. of energy per square inch than any other material known. Wood and leather linings char and quickly wear out. Ferodo Fabrics are spark-proof and non-inflammable.

Ferodo Fabrics have the name stamped on each foot. Look for it when ordering your new linings.

For the production of these and similar parts

USE

National Acme Automatics.

Because—

1. They produce each part in the time required for turning the length marked A, thus effecting a saving of 50 to 75 per cent. in comparison to single spindle production.
2. They are entirely automatic.
3. They save labour and floor space.
4. They ensure accuracy and output.

1 $\frac{5}{8}$ " and 2 $\frac{1}{4}$ " MACHINES IN STOCK.

$\frac{3}{4}$ " and 1" MACHINES NOW IN TRANSIT.

We can equip them with Tools to suit your requirements, and set up the Machines in your shops.
