ARTICLES

Amanda Huensch and Nicole Tracy-Ventura
Understanding second language fluency behavior: The effects of individual differences in first language fluency, cross-linguistic differences, and proficiency over time 755

Kyriakos Antoniou and Napoleon Katsos
The effect of childhood multilingualism and bilectalism on implicature understanding 787

Monique Charest
Cumulative semantic interference in young children’s picture naming 835

Nia Williams and Endli Mõn Thomas
Exploring minority language input sources as means of supporting the early development of second language vocabulary and grammar 855

Johanne Paradis, Ruiting Jia, and Antti Arppe
The acquisition of tense morphology over time by English second language children with specific language impairment: Testing the cumulative effects hypothesis 881

Anna Chrabaszcz and Kira Gor
Quantifying contextual effects in second language processing of phonologically ambiguous and unambiguous words 909

Rebecca Treiman and Kelly Boland
Young children's knowledge about the links between writing and language 943

Sanako Mitsugi
Incremental comprehension of Japanese passives: Evidence from the visual-world paradigm 953

Lucia Pozzan and Inés Antón-Méndez
English possessive gender agreement in production and comprehension: Similarities and differences between young monolingual English learners and adult Mandarin-English second language learners 985
Applied Psycholinguistics publishes original articles on the psychological processes involved in language. The articles address the development, use, and impairment of language in all its modalities, including spoken, signed, and written, with a particular emphasis on crosslinguistic studies. Studies appearing in Applied Psycholinguistics need to have clear applied relevance to professionals in a variety of fields, including linguistics, psychology, speech and hearing, reading, language teaching, special education, and neurology. Contributors should explicitly consider the relevance of their work to the larger community, as well as its theoretical and psychological significance. Specific topics featured in the journal include language development (the development of speech perception and production across languages, the acquisition and use of sign language, bilingualism, and second language learning), language disorders in children and adults (including those associated with brain damage, retardation and autism, specific learning disabilities, and hearing impairment), literacy development (early literacy skills, dyslexia and other reading disorders, and spelling development and disorders), and psycholinguistic processing (lexical access, time course of language processing, semantics, and syntax). In addition to research reports, theoretical reviews will be considered for publication, as will keynote articles and commentaries (the latter normally invited by the Editors). The journal will occasionally publish issues devoted to special topics within its purview.

Manuscript Submission. The journal’s full Instructions for Contributors can be found online at cambridge.org/aps. Authors should submit their manuscripts electronically at http://mc.manuscriptcentral.com/appliedpsych. All manuscripts must be accompanied by a letter stating explicitly that the authors have obtained institutional review and approval for ethical treatment of human subjects and have not simultaneously submitted this manuscript to another publication.
