

Physics of the Pulsar Magnetosphere

VASILY BESKIN, A. V. GUREVICH
and YA. N. ISTOMIN

The authors present the theory of the electrodynamic phenomena which occur in the magnetosphere of a pulsar. Fully illustrated throughout and well referenced this book will be of particular value to graduate students and researchers in astrophysics and plasma physics.

£75.00 net HB 0 521 41746 5 432 pp. 1993

Theory of Space Plasma Microinstabilities

S. PETER GARY

This book describes the linear theory of many different waves and instabilities that may propagate in a collisionless plasma. Key points are summarised at the end of each chapter with problems to solve interspersed throughout the text, making it of great value to both the student and researcher.

£29.95 net HB 0 521 43167 0 200 pp. 1993
Cambridge Atmospheric and Space Science Series 7

Whistler-mode Waves in Hot Plasma

SERGEI SAZHIN

The book provides an extensive theoretical treatment of whistler-mode propagation, instabilities and damping in a hot, anisotropic and collisionless plasma.

£40.00 net HB 0 521 40165 8 269 pp. 1993
Cambridge Atmospheric and Space Science Series 6

Nonlinear Magnetohydrodynamics

DIETER BISKAMP

This book provides a self-contained introduction to magnetohydrodynamics (MHD). Emphasis is on the physical principles rather than on special formalisms, ensuring that this book will be essential reading for theorists and experimentalists in MHD effects.

£50.00 net HB 0 521 40206 9 400 pp. 1993
Cambridge Monographs on Plasma Physics 1

Forthcoming April 1994

Plasma Physics

An Introduction to the Theory of Astrophysical, Geophysical, and Laboratory Plasmas

P. A. STURROCK

Plasma Physics presents an authoritative and wide ranging pedagogic study of the 'fourth' state of matter. The author provides an ideal introduction to this complex and fascinating field of research; balancing the theoretical and practical and preparing the student for further study.

£50.00 net HB 0 521 44350 5 416 pp. 1994
£16.95 net PB 0 521 44810 7

Relativistic Non-Linear Waves

With Applications in Astrophysics and Plasma Physics

A. M. ANILE

The author provides a unified and systematic treatment of the main results and techniques of relativistic fluid dynamics. This text will be of interest to astrophysicists, plasma physicists, nuclear physicists, and applied mathematicians.

£55.00 net HB 0 521 30406 7 348 pp.
Cambridge Monographs on Plasma Physics

Principles of Plasma Diagnostics

IAN HUTCHINSON

The most modern and comprehensive book in its field. It joins for the first time, a body of knowledge previously scattered throughout scientific literature. The work's focus on principles will make it useful to all plasma physicists, astrophysicists and theoreticians as well as experimenters.

£17.95 net HB 0 521 38583 0 380 pp.

Plasma Physics: An Introductory Course

Edited by R. O. DENDY

For the last thirty years, international summer schools in plasma physics have been held at Culham Laboratory, site of the Joint European Torus fusion project. This book has been developed from lectures given at these schools, and provides a wide ranging introduction to the theoretical and experimental study of plasmas and their applications.

£60.00 net HB 0 521 43309 6 536 pp. 1993

INSTRUCTIONS TO AUTHORS

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the editorial board, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

JOURNAL OF PLASMA PHYSICS

Volume 51 Part 2 April 1994

CONTENTS

Strong nonlinear stationary Langmuir ($T \ll mc^2$) I. M. ALESHIN, M. A. DROFA AND L. S. KUZMENKOV	177
Reflection and excitation of ion-acoustic waves in a multi- component plasma with negative ions T. ITO AND Y. NAKAMURA	185
Parametric decay instability of an upper-hybrid wave in a two- temperature plasma S. KONAR AND V. RAI	193
Sensitivity of global energy confinement to the boundary condition due to coupling of MHD and transport processes X. H. DENG, C. ZHANG, Y. P. HUO, J. F. WANG AND SHUI WANG	201
Specular reflection as a probe for diagnostics of laser-produced plasmas T. DESAI, H. C. PANT, M. KHAN, S. SARKAR AND B. CHAKRABORTY	211
Magneto-acoustic surface waves on current sheets N. F. CRAMER	221
Conditions for the existence of strong double layers N. JELIĆ, M. ČERČEK, M. STANOJEVIĆ AND T. GYERGYEK	233
A necessary condition for omnigenity in stellarators WALTER DOMMASCHK	261
Kinetic theory for a distribution of ionized dust particles T. K. ASLAKSEN AND O. HAVNES	271
Modulations of slow sausage surface waves travelling along a magnetized slab I. ZHELYAZKOV, M. MURAWSKI, M. GOOSSENS, P. NENOVSKI AND B. ROBERTS	291
Finite-Larmor-radius flute-mode theory with end loss I. A. KOTELNIKOV AND H. L. BERK	309
Relaxation of collisionless plasmas H. WIECHEN AND H. J. ZIEGLER	341
